Youth, Faith, and Artificial Intelligence Zaremohzzabieh, Zeinab, Abdullah, Rusli, Al-Issa, Riyadh Salim, Ahrari, Seyedali, 2025-08-29 As AI continues to reshape society its intersection with the younger generation and faith has presented opportunities and ethical questions For the youth navigating their beliefs and identity has become increasingly difficult in this modern world AI can serve as a tool and a hindrance to spiritual exploration and a challenge to traditional values Faith communities in turn are grappling with how to engage youth meaningfully in an era shaped by algorithms virtual interactions and machine learning Youth Faith and Artificial Intelligence explores the rapid advancement of AI and its impact on the way we interact with the youth This book examines how theological perspectives can help youth navigate the complexities of an AI driven society Covering topics such as AI youth and engagement this book is an excellent resource for sociologists researchers academicians educators and more

AI UNPLUGGED: A TEENAGER'S TAKE ON THE FUTURE Advait Kothuri, Artificial Intelligence AI is everywhere It s in the way we ask our phones for directions the recommendations we see when shopping online and even in the medical breakthroughs that save lives To many AI feels like an intimidating complex field reserved for experts with years of experience I don t see it that way I m Advait Kothuri a 15 year old passionate about AI and this book is my attempt to make AI accessible to everyone young or old tech savvy or not AI is not just for engineers or scientists it s for anyone who wants to understand the world around them in a new way When I first tried explaining AI to my 80 year old grandfather he didn t understand it It s just something computers do right he asked But as I gave him simple reallife examples like how his smartphone automatically corrects his words or how YouTube suggests videos based on what he likes he started to see AI all around him That was an eye opening moment for me If I could make AI relatable to my grandfather why not to everyone This book is structured around that very idea Inspired by the storytelling style of Slumdog Millionaire where the protagonist s life experiences help him answer complex questions I ve connected AI concepts to everyday moments while growing up Whether it s recognizing patterns in a soccer game understanding bias in algorithms through daily interactions or seeing how AI can help detect arthritis early this book is designed to make AI feel intuitive and approachable Since this book is about AI and covers a lot of Generative AI GenAI I wanted to immerse myself in the technology as much as possible Every single image in this book including those for each chapter and the cover page has been created using AI powered tools such as OpenAI s DALL E and Perplexity ai Additionally I have used AI models such as Anthropic s Claude OpenAI s ChatGPT Google s Gemini and Perplexity ai to generate large amounts of text refine ideas and explore various perspectives This was not just an exercise in automation but a way to demonstrate the creative and practical capabilities of AI firsthand This is not just a book for students or engineers it s for parents teachers business owners and anyone curious about AI but unsure where to start AI is already shaping our world and understanding it is no longer optional it s essential AI isn t magic or a mystery it s simply another tool that when understood can empower all of us in ways we

never imagined The future of AI doesn't belong to just a few it belongs to all of us Whether you're 15 or 80 tech savvy or not I hope this book helps you see AI in a whole new light Let's explore it together *Academia Next* Bryan

Alexander,2020-01-14 From the renowned futurist a look at how current trends will transform American higher education over the next twenty years 2020 Most Significant Futures Work Award Winner Association of Professional Futurists The outlook for the future of colleges and universities is uncertain Financial stresses changing student populations and rapidly developing technologies all pose significant challenges to the nation's colleges and universities In *Academia Next* futurist and higher education expert Bryan Alexander addresses these evolving trends to better understand higher education's next generation Alexander first examines current economic demographic political international and policy developments as they relate to higher education He also explores internal transformations within postsecondary institutions including those related to enrollment access academic labor alternative certification sexual assault and the changing library paying particularly close attention to technological changes Alexander then looks beyond these trends to offer a series of distinct scenarios and practical responses for institutions to consider when combating shrinking enrollments reduced public support and the proliferation of technological options Arguing that the forces he highlights are not speculative but are already in play Alexander draws on a rich extensive and socially engaged body of research to best determine their likeliest outcomes It is only by taking these trends seriously he writes that colleges and universities can improve their chances of survival and growth An unusually multifaceted approach to American higher education that views institutions as complex organisms *Academia Next* offers a fresh perspective on the emerging colleges and universities of today and tomorrow
