Designing Instruction with Generative AI Brent A. Anders, 2025-09-16 Designing Instruction with Generative AI offers a novel set of tools and strategies for leveraging generative AI to create engaging and personalized learning experiences While instructional designers are a tremendous asset to higher education not all colleges or universities have the robust staff needed to support all instructors on staff or large student populations Drawing on a wealth of research professional experience and strategic insights this book equips new and seasoned teaching faculty and trainers with step by step directions on how freely accessible artificial intelligence software can assist with all aspects of the course creation and instruction process and cater to the needs of diverse learners Each chapter offers forward thinking and empirically validated ways to help faculty create and improve instructional materials course design and learning environments while supporting their digital literacies Rather than introduce AI as a means of outsourcing subject area expertise critical thinking or cognitive processes the author instead emphasizes its potential to build on traditionally honed knowledge and foundational instructional design practices From optimizing course alignment and accessibility practices to fostering active learning motivation and engagement educators will find new solutions to common teaching and learning challenges with greater efficiency in time and capacity The Open Access version of this book available at <http://www.taylorfrancis.com> has been made available under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4 0 license

Algorithms of Armageddon George Galdorisi, Sam J Tangredi, 2024-03-12 It is unclear if U S policy makers and military leaders fully realize that we have already been thrust into an artificial intelligence AI race with authoritarian powers Today the United States peer adversaries China and Russia have made clear their intentions to make major investments in AI and insert this technology into their military systems sensors and weapons Their goal is to gain an asymmetric advantage over the U S military The implications for our national security are many and complex Algorithms of Armageddon examines this most pressing security issue in a clear insightful delivery by two experts Authors George Galdorisi and Sam J Tangredi are national security professionals who deal with AI on a day to day basis in their work in both the technical and policy arenas Opening chapters explain the fundamentals of what constitutes big data machine learning and artificial intelligence They investigate the convergence of AI with other

technologies and how these systems will interact with humans Critical to the issue is the manner by which AI is being developed and utilized by Russia and China The central chapters of the work address the weaponizing of AI through interaction with other technologies man machine teaming and autonomous weapons systems The authors cover in depth debates surrounding the AI genie out of the bottle controversy AI arms races and the resulting impact on policy and the laws of war Given that global powers are leading large scale development of AI it is likely that use of this technology will be global in extent Will AI enabled military weapons systems lead to full scale global war Can such a conflict be avoided The later chapters of the work explore these questions point to the possibility of humans failing to control military AI applications and conclude that the dangers for the United States are real Neither a protest against AI nor a speculative work on how AI could replace humans Algorithms of Armageddon provides a time critical understanding of why AI is being implemented through state weaponization the realities for the global power balance and more importantly U S national security Galdorisi and Tangredi propose a national dialogue that focuses on the need for U S military to have access to the latest AI enabled technology in order to provide security and prosperity to the American people **Marconi's International Register** ,1966
