It's All Analytics - Part II

Scott Burk, David Sweenor, Gary Miner, 2021-09-28 Up to 70% and even more of corporate Analytics Efforts fail. Even after these corporations have made very large investments in time, talent, and money in developing what they thought were good data and analytics programs. Why? Because the executives and decision makers and the entire analytics team have not considered the most important aspect of making these analytics efforts successful. In this Book II of the It's All Analytics series, we describe two primary things: 1. What this most important aspect consists of, and 2. How to get this most important aspect at the center of the analytics effort and thus make your analytics program successful. This Book II in the series is divided into three main parts. Part I: Organizational Design for Success discusses the need for a complete company organizational Alignment of the entire company and its analytics team for making its analytics successful. This means attention to the culture, the company culture. To be successful, the CEO's and Decision Makers of a company organization must be fully cognizant of the cultural focus on establishing a center of excellence in analytics. Simply put, company culture is the most important aspect of a successful analytics program. The focus must be on innovation, as this is needed by the analytics team to develop successful algorithms that will lead to greater company efficiency and increased profits. Part II: Data Design for Success discusses data as the cornerstone of success with analytics. You can have the best analytics algorithms and models available, but if you do not have good data, efforts will at best be mediocre, if not a complete failure. This Part II also goes further into data with descriptions of things like Volatile Data, Memory Storage, and Non-Volatile Data, Memory Storage, in addition to things like data structures and data formats, plus considering things like Cluster Computing, Data Swamps, Muddy Data, Data Marts, Enterprise Data Warehouse, Data Reservoirs, and Analytic Sandboxes, and additionally Data Virtualization, Curated Data, Purchased Data, Nascent Future Data, Supplemental Data, Meaningful Data, GIS, Geographic Information Systems, Geo Analytics, Data Graph, Databases, and Time Series Databases. Part II also considers Data Governance, including Data Integrity, Data Security, Data Consistency, Data Confidence, Data Leakage, Data Distribution, and Data Literacy. Part III: Analytics Technology Design for Success discusses Analytics Maturity and aspects of this maturity, like Exploratory Data Analysis, Data Preparation, Feature Engineering, Building Models, Model Evaluation, Model Selection, and Model Deployment. Part III also goes into the nuts and bolts of modern predictive analytics, discussing such terms as AI, Artificial Intelligence, Machine Learning, Deep Learning, and the more traditional aspects of analytics that feed into modern analytics, like Statistics.

Forecasting Optimization and Simulation Part III also goes into how to Communicate and Act upon Analytics which includes building a successful Analytics Culture within your company organization All in all if your company or organization needs to be successful using analytics this book will give you the basics of what you need to know to make it happen **Working Mother** ,2003-10 The magazine that helps career moms balance their personal and professional lives *Cambridge Learner's Dictionary English-Polish with CD-ROM* Cambridge University Press,2011-05-19 This is a semibilingual Polish version of the Cambridge Learner s Dictionary with definitions in English and Polish translations of the headword for each sense *Cincinnati Magazine* ,2003-04 Cincinnati Magazine taps into the DNA of the city exploring shopping dining living and culture and giving readers a ringside seat on the issues shaping the region **Working Mother** ,2000-10 The magazine that helps career moms balance their personal and professional lives **Promoting Health in Families** Perri J.
