It combines in depth conceptual reflection with a rich selection of paradigmatic case studies from contemporary media culture. The editors have gathered a distinguished group of international scholars working at the interstices of comics studies and game studies to explore two interrelated areas of inquiry. The first part of the book focuses on hybrid medialities and experimental aesthetics between comics and videogames; the second part zooms in on how comics and videogames function as transmedia expansions within an increasingly convergent and participatory media culture. The individual chapters address synergies and intersections between comics and videogames via a diverse set of case studies ranging from independent and experimental projects via popular franchises from the corporate worlds of DC and Marvel to the more playful forms of media mix prominent in Japan. Offering an innovative intervention into a number of salient issues in current media culture, *Comics and Videogames* will be of interest to scholars and students of comics studies, game studies, popular culture studies, transmedia studies and visual culture studies.

Artificial Intelligence in Architecture and the Built Environment Michal Sourek, 2025-01-22 Imagine if every architect had an apprentice who could consistently observe and understand their intentions, take over routine tasks and monitor technical, environmental and economic constraints. This apprentice would continually improve, freeing the architect to concentrate on truly creative work. This book outlines a plan to turn this vision into reality. It evaluates the development of artificial intelligence from its inception to the present, focusing on the last two decades of applying AI in architectural design and planning. The current state of architectural practice is also examined. Integrating architecture, computer science, AI, robotics, economics, law, neurobiology and philosophy, the vision is built on three key premises: i) authentic poetic creativity that transcends parameterization and algorithmizing; ii) innovative learning strategies and training approaches not yet applied concerning architectural design; and iii) the convergence of architecture's inherent spatiality with virtual reality technology and new theories of human thinking and intelligence poised for implementation in machine learning. **Popular Photography**, 1994-10 *Path to Singularity* J. Craig Wheeler, 2024-11-19 In a rapidly changing world, are we on the brink of creating technology that outpaces our ability to control it? Astrophysicist J. Craig Wheeler, former president of the American Astronomical Society, takes a critical look at the technological advances shaping our future. From artificial intelligence to

genetic engineering Wheeler explores how these innovations are interconnected and the potential they hold for humanity's evolution. He warns of a future where autonomous machines outsmart us and genetic modifications challenge our very essence. With thought-provoking insights into the ethical dilemmas we face, Wheeler stresses the importance of staying informed and proactive.

Key Questions Raised by Wheeler: Will there be jobs for those willing to work in a future dominated by automation? How might social media companies manipulate our decisions, potentially stripping us of free will? Could AI influence or even dictate our voting behaviors? If widespread mental connectivity becomes a reality, could we see the emergence of a collective consciousness that erases individuality? Have we exhausted Earth's resources, and is population control necessary? What implications arise if we solve aging? How will society adapt to the challenges of perpetual youth? What are the realistic prospects of migrating to space as Earth becomes increasingly inhospitable? Our decisions today will determine if we control technology or if it controls us.

Through an engaging narrative, Wheeler not only outlines the challenges but also offers practical advice on how we can retain control over our technological destiny. Includes a Foreword by Neil DeGrasse Tyson.
