South Africa,2004 This volume is the first of its kind of terms of documenting the complexities and multi faceted nature of the
mass carnage in Sudan Apart from the political and economic imbalances between the Northern and Southern regions of the
country which incited the conflict these are many other issues stemming from a vibrant history of colonial African and Arab
role which should be factored into the equation This volume examines riot only in a holistic perspective the prevailing
situation and future challenges facing Sudan but also incorporates the largest part of the agreements and accords signed by
the belligerent parties for the last few decades in the same text BOOK JACKET Clothing and Footwear in African
Industrialisation Dorothy McCormick,Christian Myles Rogerson,2004 There is a broad consensus amongst development
specialist that in order to grow and develop African countries need to industrialise and at a greater rate than they are doing
at present In searching for the reasons for the disappointing industrial progress so far observers have tended to take a broad
look at the industrial sector as a whole The work reported in this volume takes a different approach It sets out from the
premise that two industries clothing and footwear offer excellent starter opportunities for baseline industrial growth
Garments and footwear are low tech industries in so far that use stable well diffused technology They generate only low level
research and development needs require only basic skills and operate on low economies of scale whilst having the capacity to
absorb large numbers of semi skilled workers and make extensive use of local resources Additionally they offer considerable
export potential This collection of papers focuses on the changing role and potential of the clothing and footwear sectors in
industrialisation in Africa The examples elucidated are the clothing and footwear sectors in Ethiopia Kenya South Africa and
Tanzania Taken together these four countries provide a representative cross sector of African countries and present a range
of different issues relating to the continent s clothing and footwear economy More generally the volume seeks to contribute
to a greater appreciation of the impacts of globalisation on industrial development trajectories **America's Trade**

September 11 Norman Mlambo,2006 **The Oil Paradox** C. I. Obi,2004 The dominant trend in environmental studies has
assumed that people ruin the natural environment The contributors to Greening the Great Red Island Madagascar in Nature
and Culture challenge this assumption not for its elements of obvious truthfulness but its oversimplification Diverse social
environmental perspectives on Madagascar demonstrate that Madagascar s rural people have dynamic historical and
complex relationships with their environments Conservation organisations working to preserve Madagascar s biological
megadiversity may achieve negative results if they start with the wrong assumptions Combining potent theoretical and
methodological analysis with detailed case studies from across the island of Madagascar this collection will appeal to those
