Diffusions in Architecture:
Artificial Intelligence and Image Generators Matias del Campo, 2024-02-07 DIFFUSIONS IN ARCHITECTURE A guide to

diffusion models and their impact on design with insight on how this novel artificial intelligence technology may disrupt the industry. *Diffusions in Architecture: Artificial Intelligence and Image Generators* delves into the impact of Generative AI models and their effect on architecture design and aesthetics. The book presents an in-depth analysis of how these new technologies are revolutionizing the field of architecture and changing the way architects approach their work. The architects presented in the book focus on the application of specific AI techniques and tools used in generative design such as Diffusion models, Dall-E2, Stable Diffusion, and MidJourney. It discusses how these techniques can generate synthetic images that are both realistic and imaginative, creating new possibilities for architectural design and aesthetics. Twenty-two leading designers and theorists offer their insights, providing disciplinary depth by covering the full impact of these learning tools on architecture. *Applications for Artificial Intelligence and Digital Forensics in National Security* Reza Montasari, 2023-09-11

This book delivers insights into how social science and technology might aid new advancements in managing the complexity inherent within national and international security landscape. The digital policing landscape is dynamic and intricate, emanating from crimes that are both persistent and transnational. Globalization, human and drug trafficking, cybercrime, terrorism, and other forms of transnational crime can have a significant impact on societies around the world. This necessitates a reassessment of what crime, national security, and policing mean. Recent global events such as human and drug trafficking, the COVID-19 pandemic, violent protests, cyber threats, and terrorist activities underline vulnerabilities residing in our current security and digital policing posture. As an interdisciplinary collection of studies, this book encapsulates concepts, theories, and technology applications, offering a comprehensive analysis of current and emerging trends and threats within the context of national and international security. Undertaking an evidence-based approach, this book offers an extraordinarily perceptive and detailed account of issues and solutions related to the complex national and international security landscape. To this end, the book presents insights into emerging and potential technological and methodological solutions, as well as advancements in relation to integrated computational and analytical solutions that could be deployed for the purposes of national and international security. It provides a comprehensive analysis of technical, ethical, legal, privacy, and civil liberty challenges stemming from the aforementioned advancements and accordingly offers detailed recommendations supporting the design and implementation of best practices, including technical, ethical, and legal approaches for national and international security. The research contained in the book fits well into the larger body of work on various aspects of AI, cybersecurity, national security, digital forensics, cyberterrorism, ethics, human rights, cybercrime, and law. It provides a valuable reference for LEAs and security organizations, policymakers, cybersecurity experts, digital forensic practitioners, researchers, academicians, graduates, and advanced undergraduates, and other stakeholders with an interest in national and global security. *Handbook of Artificial Intelligence at Work* Martha Garcia-Murillo, Ian MacInnes, Andrea Renda, 2024-02-12. With the advancement in processing power and storage, now enabling algorithms to expand their

capabilities beyond their initial narrow applications technology is becoming increasingly powerful This highly topical Handbook provides a comprehensive overview of the impact of Artificial Intelligence AI on work assessing its impact on an array of economic sectors their resulting nature of work and the subsequent policy implications of these changes

Diversity in Visual Representations of the Past Jo Zalea Matias,Nicola Scheyhing,Doris Gutsmedl-Schumann,2025-09-26 This volume presents an overview of the diversity or lack thereof in visual representations of the European past that are found in archaeology museums and media While publications discussing gender stereotypes in European archaeological media exist other identities remain underrepresented namely Black Indigenous and People of Color BIPOC those with visible and invisible disabilities and very young and very old This volume offers insight into these gaps in European media and archaeology while also providing alternative explanations for interpreting these often stereotyped identities and methodologies for inclusion The chapters within this volume are divided into four themes Themes cover the development of images of the past and discusses how images are chosen in museums The book identifies who is missing in images of the past with topics on representing individuals with disabilities children in museums the Other in Roman art and Scythians in museums and books and critiques approaches to representation and diversity in media such as in textbooks popular media and children s books Finally the book challenges the lack of diversity and a proliferation of stereotypes in images of the past and asks how do we improve on them and create new ones Overall this book addresses the need for diversity in images both within academic archaeology and with the broader public

Bioinspired Strategic Design Daniel J. Finkenstadt,Tojin T. Eapen,2024-07-08 Organizations are commonly thrust into hostile operating environments where they are required to make strategic decisions that involve significant and costly tradeoffs Such hostile environments may be endemic such as an economic recession or idiosyncratic such as a predatory action by an adversary Many features of such hostile environments parallel those of living organisms that also demonstrate fine tuned strategies to improve their survivability under adverse conditions How can organizations use these bioinspired strategies to survive and even potentially innovate This book shows that the same three capabilities essential for the survival of living organisms in harsh environments efficiency resilience and prominence are also critical for organizations in their process of navigating through their own hostile environments Throughout the book the authors provide organizational executives with a systematic framework for thinking about strategic decision making in a hostile environment leaning on analysis of real world cases to draw out ontologies and methods for guiding their teams through disruptions change management innovation and process improvements In the first part organizations are provided with a systematic approach to analyzing three survivability influences forces resources and observers and their interrelationships While all three influences are active across all organisms and organizations the exact nature of their interrelationship and the significance of each influence are unique to every organism or organization The framework helps organizations nail down the specific features of their operating environment that can help or hinder

survivability by analyzing the three influences Organizations can respond to external influences by developing three pronged capabilities efficiency resilience and prominence ERP that respond to the three survivability influences Organizations often struggle with identifying the appropriate strategies to apply under different conditions Fortunately nature provides several mechanisms that can be analogically applied to guide business strategies The book contains many illustrations and examples of strategic principles observed among living organisms that can help an organization develop ERP capability Finally the book introduces seven strategic design heuristics Combination Elimination Separation Segmentation Replication Dynamics and Maximization observed in a living system that can be flexibly utilized to generate ideas to achieve strategic ends
