etiological models and methods of assessment With increased recognition of the problem of depression in this population we must also examine appropriate methods of ameliorating the suffering of those afflicted The conference was divided into sections theoretical aspects phenomenology suicide and treatment and the chairmen of these sections have given brief introductions Necessary overlap of topics and methods provided a convergent and validating examination of empirical results which may serve to direct continuing studies As well we hope that thoughtful review may directly influence clinical practice and thereby improve the quality of life for schizophrenic patients

What is Schizophrenia? William F. Flack,Daniel R. Miller,Morton Wiener,1991 William F Flack Jr Daniel R Miller and Morton Wiener What is schizophrenia I This was the seemingly simple question posed to a diverse group of investigators asked to present their views at a conference sponsored by the Frances L Hiatt School of Psychology at Clark University Worcester Massachusetts in June 1990 The plan was to have a small group of theoretically minded clinicians and investigators from different professions and orientations convene to discuss and debate conceptual and metatheoretical issues surrounding schizophrenia Instead of concentrating on the latest empirical findings we were primarily interested in having a series of exchanges 2 about the very different meanings and uses of this concept In our review of the literature on schizophrenia we uncovered what seemed to us to be multiple non overlapping uses of the term For some investigators it appears to be used to specify certain kinds of people for others it is employed to refer to certain kinds of behaviors For still others the term is grounded in biochemical events or in socioculturally specific actions A number of alternatives are explored in the contributors papers in this volume [Search for](#)
