Contraceptive Technology 17th Rev Edn Robert Hatcher, James Trussell, Felicia Stewart, Willard Cates Jr, Gary K Stewart, Felicia Guest, Deborah Kowal, 1998-09-24 Now available in a new UK edition from BMJ Books Contraceptive Technology is a well established practical guide for all providers of reproductive health care It contains realistic advice and straightforward information on all the major forms of contraception including emergency contraception fertility awareness methods and female and male sterilization Edited and written by leading experts it is also acts as a comprehensive reference on other key aspects of contraception including education and counselling HIV AIDS and reproductive health postpartum contraception and lactation preconception care adolescent sexual behaviour pregnancy and childbearing contraceptive efficacy *Reproductive Health and Human Rights* Laura Reichenbach, Mindy Roseman, 2011-09-30 Reproductive Health and Human Rights The Way Forward critically reflects on the past fifteen years of international efforts aimed at improving health alleviating poverty diminishing gender inequality and promoting human rights The volume includes essays by leading scholars and practitioners that are centered on the 1994 United Nations International Conference on Population and Development ICPD and its resulting Programme of Action ICPD an agreement among 179 governments UN agencies and NGOs was intended to shape population and development policy reinterpreted and redefined as reproductive health More

than a decade after the enthusiasm that accompanied ICPD there is growing concern about its effectiveness in the context of global health and development. Reproductive Health and Human Rights addresses that concern. The book grapples with fundamental questions about the relationships among population, fertility, decline, reproductive health, human rights, poverty, alleviation, and development, and assesses the various arguments. Demographic, public health, human rights, based, and economic, for and against ICPD, today. A number of the chapters address institutional challenges to ICPD and consider how the changing political, religious, academic, and disciplinary contexts matter. Other chapters engage operational and conceptual issues and whether ICPD has been able to move the reproductive health agenda forward on topics such as maternal mortality, abortion, HIV/AIDS, adolescents, reproductive technologies, and demography. Finally, several chapters examine how ICPD has been sidelined by emerging health and development agendas and what could be done in response. Unlike any book yet published, *Reproductive Health and Human Rights: The Way Forward* examines the state of the arguments for reproductive health and rights from a multidisciplinary perspective that provides policymakers, scholars, and activists with a better understanding of how reproductive health and rights have developed their place in the global policy agenda and how they might evolve most effectively in the future.

Maternal-Child Nursing Care: Optimizing Outcomes for Mothers, Children, & Families Susan Ward, Shelton Hisley, 2015-06-03. It offers the perfect balance of maternal and child nursing care with the right depth and breadth of coverage for students in today's maternity/pediatric courses. A unique emphasis on optimizing outcomes, evidence-based practice, and research supports the goal of caring for women, families, and children not only in traditional hospital settings but also wherever they live, work, study, or play. Clear, concise, and easy to follow, the content is organized around four major themes: holistic care, critical thinking, validating practice, and tools for care that help students to learn and apply the material.

Essentials of Contraceptive Technology Robert Anthony Hatcher, 1997. *Birth Control Technologies* Michael J. K. Harper, 1983.

Contraception across Cultures Andrew Russell, Mary Thompson, Elisa J. Sobo, 2020-06-04. Contraception is an issue of considerable concern to a great many heterosexually active people. Yet the impact of contraceptive technologies in the world today, in particular their implications for kinship, gender relations, and other aspects of social life, receives relatively little scholarly attention. This book brings a new perspective to the study of contraception by collecting together in one volume leading experts in the fields of contraception, family planning, and reproductive health. Contributors look at the social, economic, political, and cultural contexts in which contraceptive providers and recipients make decisions about whether and what forms of contraception to use. User perspectives, whether those of recipients or providers of contraceptive services, are taken seriously, as are the perspectives of policy makers and development experts. With its in-depth case study approach, this challenging book will appeal to practitioners and planners in the fields of family planning and reproductive health, as well as to students and academics of applied and medical anthropology, health studies, gender, and development studies, or anyone interested in the social, cultural, and ethical issues.
