Group Rationality in Scientific Research Husain Sarkar, 2011-06-30 Under what conditions is a group of scientists rational How would rational scientists collectively agree to make their group more effective What sorts of negotiations would occur among them and under what conditions What effect would their final agreement have on science and society These questions have been central to the philosophy of science for the last two decades In this book Husain Sarkar proposes answers to them by building on classical solutions the skeptical view two versions of the subjectivist view the objectivist view and the view of Hilary Putnam

Contrast Analysis Robert Rosenthal, Ralph L. Rosnow, 1985 This is the first text for those seeking appropriate statistical approaches to research data that is devoted entirely to the topic of contrasts Contrast analysis permits us to ask more focused questions of our data In return for a small amount of simple computation we get very much greater statistical power and can make very much clearer substantive interpretations of our research results Contrast analysis should be employed in the context of the analysis of variance whenever the numerator degrees of freedom are greater than one which is probably most of the time Unfortunately it is employed relatively rarely by behavioural and social scientists This book makes it possible for non mathematical data analysts to avail themselves of contrasts and thereby simply and efficiently to address the focused questions posed by their theories hypotheses and hunches
