Crowell, Ian M. Evans, Clifford R. O'Donnell, 2013-03-08 The conference on which this volume is based was one of a series of symposia initiated by the Department of Psychology at the University of Hawaii at Manoa on the theory and research surrounding topics of interest to the faculty and germane to the Hawaiian community In order to encourage interaction around specific themes the symposium series has assembled a small select group of scholars to exchange knowledge ideas and enthusiasm with the resident faculty students and the community at large The first two symposia concentrated on cross cultural themes Marsella Tharp Marsella DeVos Hsu 1985 The third one addressed a significant social problem aggression and violence in children At the time that our plan was being developed Hawaii along with mainland states was experiencing or at least expressing widespread alarm over the involvement of children and youth in violent crime in belligerence at school as perpetrators of aggression at home and as victims of physical abuse This symposium was planned around a major area within the department the Clinical Studies Program The Clinical

Studies Program has developed along two interrelated lines of concentration one emphasized the foundation of clinical psychology in basic science and the other expanded its purview into the broader community covering prevention systems change and social networks

The Control of Aggression and Violence, 1972 **Aggression** Leonard Berkowitz, 1993

In this wide ranging discussion of the social psychology of human aggression Leonard Berkowitz examines the findings of behavioral research about conditions and circumstances that promote anger and aggression Emphasizing that aggression takes numerous forms and has many causes Berkowitz distinguishes between instrumental aggression assaults carried out to benefit the attacker in some way and emotional impulsive or expressive aggression He points out that they have different origins and aims and are best controlled in different ways Although he gives much attention to the conditions promoting deliberate instrumental aggression Berkowitz also shows that many assaults are highly emotional acts He therefore considers conceptions of emotion and the nature of anger and offers a new theory of the factors affecting impulsive aggression The discussion throughout is based on both laboratory experiments and real world field studies Berkowitz summarizes what behavioral scientists have learned about the nature of highly aggressive personalities and the family and childhood backgrounds of those who are disposed to violent antisocial behavior He also reports important studies of the effects of violence depicted in the mass media In discussing conditions that lead to child abuse spouse battering and murder Berkowitz identifies such risk factors as childhood experiences frustration poverty and personal and social stresses as well as external events and situations that bring hostile ideas to mind He also examines biological influences such as hereditary factors hormones and alcohol that promote aggressive tendencies Reviewing studies of the use of punishment and legal controls e g the death penalty gun control laws the author discusses how this socially destructive behavior might be reduced He presents research on the effectiveness of various psychological procedures including the supposedly cathartic methods instrumental training and cognitive and anger control techniques This general introduction to the research and theorizing about human aggression seeks to promote understanding of the fundamental causes of destructive conduct the conditions that can increase the chances of aggressive behavior and the most effective steps that could be taken to reduce the likelihood of violence in society

Author note Leonard Berkowitz is Vilas Research Professor in Psychology at the University of Wisconsin Madison The internationally known recipient of a distinguished scientist award by the American Psychological Association he is the author of several books and more than 170 articles

Cultures of Fetishism L. Kaplan,2016-03-01 In her latest book Dr Louise Kaplan author of the groundbreaking *Female Perversions* explores the fetishism strategy a psychological defense that aims to tame subdue and if necessary murder human vitalities Through an exploration of such cultural phenomena as footbinding reality television and the construction of robots Kaplan demonstrates how in a technology driven world an understanding of the fetishism strategy can help to preserve the human dialogue that is the basis of all human relationships Kaplan writes from the heart as well as from the intellect

The Social Psychology of Aggression Barbara Krahé,2001 This text provides an overview of the field of aggression It presents an account of both theoretical and applied issues and explores strategies designed to control reduce and prevent aggression on both an individual and societal level

Anger, Aggression and Violence Paul R. Robbins,2000-08-19 Violence has been a part of the human condition for a long time Evidence from the distant past of hominids shows traces of violence inflicted by other hominids The history of our own species has more than its share of violent encounters sometimes rising to the level of sheer brutality Indeed the examples of human inhumanity are so numerous and so diverse one might entertain the thesis that violence is hardwired as it were into the genetic makeup of our species The thesis underlying this book is that in order to better understand violence it is important to examine anger and aggression and the interrelationship among the three concepts Feelings of anger often precede aggressive and violent acts If we learn how to control anger better we can expect a reduction in violent acts And aggression itself may be channeled into behaviors which can be useful rather than destructive This book addresses the problem of anger by using an interdisciplinary approach drawing on research from psychology anthropology sociology and history as well as statistical data provided by criminologists

Psycho-Social Health of Youths Alka Wadkar,2025-12-15 This comprehensive book of interdisciplinary nature uses indigenous research findings to examine issues affecting the psycho social health of adolescents and young adults It explores the psychological social and biological factors that hinder the well being of youth while proposing intervention and the way forward Lucidly written to aid understanding this volume links theory and research in psychology to the Indian social sphere by providing real life examples and case studies It explores the causes of clinical psychological disorders and maladaptive behaviour which when neglected can adversely affect an individual s personality It points to the detriments of gender based socialization abusive marriages addiction and traumatic events such as sexual harassment and emotional abuse The book suggests measures to cope with trauma prevent suicidal ideation and build resilience and empathy to foster post traumatic healing This book will help readers overcome stress disturbed interpersonal and intrapersonal relations and difficulties regarding communication and

negative thoughts It will also be useful to students researchers professionals counsellors life skills trainers and general readers to help them achieve greater success and happiness in life Clinical Handbook of Schizophrenia Kim T. Mueser,Dilip V. Jeste,2008-03-27 Reviewing the breadth of current knowledge on schizophrenia this handbook provides clear practical guidelines for effective assessment and treatment in diverse contexts Leading authorities have contributed 61 concise chapters on all aspects of the disorder and its clinical management In lieu of exhaustive literature reviews each chapter summarizes the state of the science highlights key points the busy practitioner needs to know and lists recommended resources including seminal research studies invaluable clinical tools and more Comprehensive authoritative and timely the volume will enable professionals in any setting to better understand and help their patients or clients with severe mental illness Human Aggression and Violence Phillip R. Shaver,Mario Mikulincer,2011 Violence and aggression have existed as long as mankind and the need to understand and control these forces has only continued to grow throughout history Thanks to the advance of psychological research within the social and behavioral sciences as well as several other scientific disciplines we have more knowledge than ever before about the genetic developmental interpersonal and cultural causes of aggression Yet these findings have not been integrated into meaningful discussions about how to transform aggression research into practical applications With so many answers to the question What makes a person violent there is surprisingly little insight into How do we prevent violence In this comprehensive book editors Phillip R Shaver and Mario Mikulincer have assembled chapters from international experts to provide a broad based and multidisciplinary analysis of aggression and violence their negative consequences and promising interventions Five sections examine major theoretical perspectives genetic and environmental determinants and the psychological and relational processes underlying human violence and aggression The tone of the book is realistic in its investigation of violence as an inherent part of human genetics and interaction but hopeful in its exploration of researched based interventions aimed at reducing violence in future generations In its assessment of aggression and violence across individual relational and societal levels this book will engage a broad audience Practitioner's Guide to Empirically Supported Measures of Anger, Aggression, and Violence George F Ronan,Laura Dreer,Kimberly Maurelli,Donna Ronan,James Gerhart,2013-07-26 This book contains three sections Part I includes an introductory chapter and an applied chapter on conducting a risk assessment Part II provides a description of how the measures were organized and quick view tables that provide easy access to measures with enough information to allow for an estimate of the likelihood that reading additional information about a particular measure would prove fruitful Measures are organized alphabetically into tables for measures of anger aggression or violence Each of the tables provides the name of the measure the purpose for which the measure was developed and the targeted population The tables also provide information on the method of assessment the amount of time required to use the measure and the page number where additional information is available Part II also contains the review of each measure Part III provides examples of

measures that can be copied for research or clinical purposes **The SAGE Handbook of Evolutionary Psychology** Todd K. Shackelford, 2021-08-04 Evolutionary psychology is an important and rapidly expanding area in the life social and behavioral sciences and this Handbook represents the most comprehensive and up to date reference text in the field today Over three volumes the Handbook provides a rich overview of the most important theoretical and empirical work in the field Chapters cover a broad range of topics including theoretical foundations the integration of evolutionary psychology with other life social and behavioral sciences as well as with the arts and the humanities and the increasing power of evolutionary psychology to inform applied fields including medicine psychiatry law and education Each of the volumes has been carefully curated to have a strong thematic focus covering The foundations of evolutionary psychology The integration of evolutionary psychology with other disciplines and The applications of evolutionary psychology The SAGE Handbook of Evolutionary Psychology is an essential resource for researchers graduate students and advanced undergraduate students in all areas of psychology and in related disciplines across the life social and behavioral sciences Neurobiology of Aggression Mark P Mattson, 2003-03-24 Aggression is a highly conserved behavioral adaptation that evolved to help organisms compete for limited resources and thereby ensure their survival However in modern societies where resources such as food shelter etc are not limiting aggression has become a major cultural problem worldwide presumably because of its deep seeded roots in the neuronal circuits and neurochemical pathways of the human brain In Neurobiology of Aggression Understanding and Preventing Violence leading experts in the fields of the neurobiology neurochemistry genetics and behavioral and cultural aspects of aggression and violence provide a comprehensive collection of review articles on one of the most important cross disciplinary issues of our time Rather than summarize the topics covered by each author in each chapter I present a schematic diagram to guide the reader in thinking about different aspects of aggressive and violent behavior from its neurobiological roots to environmental factors that can either promote or prevent aggression to visions of some of the most horrific acts of violence of our times and then towards the development of strategies to reduce aggressive behavior and prevent violence It is hoped that Neurobiology of Aggression Understanding and Preventing Violence will foster further research aimed at understanding the environmental genetic and neurochemical roots of aggression and how such information can be used to move forward towards the goal of eliminating violence
