Control Of Cardiovascular Diseases In Developing Countries Research Development And Institutional Strengthening:

Control of Cardiovascular Diseases in Developing Countries Committee on Research, Development, and Institutional Strengthening for Control of Cardiovascular Diseases in Developing Countries, Institute of Medicine, 1998-10-13
Cardiovascular diseases CVD are increasing in epidemic proportions in developing countries CVD already accounts for almost 10 percent of the developing world's burden of disease and is likely to become the developing world's leading cause of death There is reason for hope however given that huge potential exists for applying R D to control this emerging epidemic both in creating powerful new interventions such as vaccines and dietary supplements and in guiding behavior In addition a considerable body of evidence suggests that current risk factor prevention programs and low cost case management of CVD offer feasible cost effective ways to reduce CVD mortality and disability in developing country populations Large scale CVD control efforts are lacking however and thus governments and individuals are left to make choices about health and health care services without the benefit of appropriate knowledge This report was designed to promote a policy dialogue on CVD based on informed knowledge of R D opportunities that offer effective affordable and widely applicable responses in developing countries The report examines a the emerging burden of CVD in developing countries b the future worldwide burden of CVD c current prevention and treatment of CVD in developing countries d R D to support CVD control e opportunities and priorities for R D and the need for institutional arrangements for collaboration in facing the epidemic

Control of Cardiovascular Diseases in Developing Countries Christopher Paul Howson (ed), 1998 Epidemiology and Prevention of Cardiovascular Diseases: A Global Challenge Darwin R. Labarthe, 2010-03-23 *Evidence-Based Cardiology* Salim Yusuf, John A. Cairns, A. John Camm, Ernest L. Fallen, Bernard J. Gersh, 2008-04-15 This second edition is a ground breaking clinical text with a strong emphasis on rigorous evidence Leaders in the field discuss best practice in the light of systematic reviews and randomised control trials and how best to treat where the information is less clear Case histories provide intriguing discussions on how to apply the evidence in real life situations Evidence based Cardiology also includes free access to the latest evidence which is automatically posted on a companion website **Encyclopedia of Immigrant Health** Sana Loue, Martha Sajatovic, 2014-06-20 There is increasing interest in the scientific literature on immigrant health and its impact on disease transmission disease prevention health promotion well being on an individual and population level health policy and the cost of managing all these issues on an individual institutional national and global level The need for accurate and up to date information is particularly acute due to the increasing numbers of immigrants and refugees worldwide as the result of natural disasters political turmoil the growing numbers of immigrants to magnet countries and the increasing costs of associated health care that are being felt by governments around the world Format and Scope The first portion of the encyclopedia contains chapters that are approximately 25 to 40 manuscript pages in length

Each overview chapter includes a list of references and suggested readings for cross referencing within the encyclopedia. The opening chapters are Immigration in the Global Context, Immigration Processes and Health in the U S A, Brief History, Alternative and Complementary Medicine, Culture Specific Diagnoses, Health Determinants, Occupational and Environmental Health, Methodological Issues in Immigrant Health Research, Ethical Issues in Research with Immigrants and Refugees, Ethical Issues in the Clinical Context. The second portion of the book consists of alphabetical entries that relate to the health of immigrants. Entries are interdisciplinary and are drawn from the following fields of study: anthropology, demographics, history, law, linguistics, medicine, population studies, psychology, religion, and sociology. Each entry is followed by a listing of suggested readings and suggested resources and also links to related terms within the whole book.

Outstanding Features The book adopts a biopsychosocial/historical approach to the topics covered in the chapters and the entries. Each entry includes suggested readings and suggested resources. The chapters and entries are written at a graduate level that is accessible to all academics, researchers, and professionals from diverse backgrounds. We consider the audience for the entries to be well educated but a non expert in this area. The primary focus of the book is on the immigrant populations in and immigration to magnet countries. References are made to worldwide trends and issues arising globally. In addition to the comprehensive subject coverage, the text also offers diverse perspectives. The editors themselves reflect the multidisciplinary nature of the topics with expertise in psychiatry, law, epidemiology, anthropology, and social work. Authors similarly reflect diverse disciplines.

Coronary Artery Disease - ECAB R R Kasliwal, 2009-04-15 Coronary artery disease or CAD is the end result of the process of accumulation of atheromatous plaques within the walls of the arteries supplying the myocardium. Atherosclerosis is a chronic systemic disease process affecting all the vascular beds in body and many factors responsible for its evolution have been identified. A rising incidence of this disease among people of Indian origin and an emerging role of genetic factors leading to atherosclerosis necessitates modifications in our strategies to handle it. The importance of the risk factors in causation of the disease need to be emphasized even more and masses need to be educated about the role of lifestyle modifications in its management. Further early detection of preclinical or sub clinical disease would add another dimension to the overall preventive strategy for this condition. This book is designed to update the readers on the evergrowing list of risk factors for CAD and the increasing significance of lifestyle modifications in prevention of the disease. Besides these, the therapeutic approach towards this chronic disease and methods of early detection has also been discussed. Typical supportive case scenarios are also included to exemplify and highlight the various points discussed. Thus it provides an excellent opportunity to widen one's perspective in this area.
