Thinking Utopia Jörn Rüsen, Michael Fehr, Thomas W. Rieger, 2006-12-01 After the breakdown of socialist and communist systems in the East it had become fashionable to declare the so called end of utopia end of history end of narratives The authors of this volume do not share this view but think that it is time to rehabilitate utopian thought The political concept of Utopia that has given its name to these transcendental projections onto the world has been too narrow to describe and analyze the moving forces of the mind perceiving human existence beyond reality By broadening the perspectives of utopian studies these essays enable the reader to reconstruct scholarly paradigms and strategies of utopian complex and holistic thinking in modern cosmology philosophy sociology in literary historical and political sciences and to compare traditions and ways of Western utopian thought to the practice in the East Urban Eco-Communities in Australia Liam Cooper, Hans A. Baer, 2018-06-28 This book offers one of the first detailed anthropological studies of emergent ecotopianism in urban contexts Engaging directly with debates on urbanisation sustainability and utopia it presents two detailed ethnographic case studies of inner urban Australian eco communities in Adelaide and Melbourne These novel responses to the ecological crisis real social laboratories that attempt to manifest a vision of the eco city in microcosm offer substantial new insights into the concept and creation of sustainable urban communities their attempts to cultivate ways of living that are socially and ecologically nourishing and their often fraught relationship to the capitalist city beyond These studies also suggest the opportunities and limitations of moving beyond demonstration projects towards wider urban transformation as well as exposing the problems of accessibility and affordability that thwart further urban eco interventions and the ways that existing projects can exacerbate issues of gentrification and privilege in a socially polarised city Amidst the challenges of the capitalist city climate change and ecological crisis this book offers vital lessons on the potential of urban sustainability in future cities Contentious Politics and the Welfare State Dominika Polanska, 2019-03-14 This book outlines the history of squatting in Sweden and analyzes the conditions under which squatting has intensified and declined in the country between 1968 and 2017 With close attention to the relationship between civil society and the state in the Swedish context and the manner in which this relationship together with attendant political media and movement based discourses shapes the possibilities that exist for collective action the author draws on two key concepts those of the narrative of consensus and discourse to present an analysis of squatting as a form of contentious politics and the successful story of

civil society development as decisive for its emergence and development in the country A study of the way in which confrontational actors question both the property relations inherent in capitalism and the authority of the welfare state and its institutions Contentious Politics and the Welfare State will appeal to social scientists with interests in urban studies political sociology squatting social movements and the relationship between the welfare state and contentious social actors

The re-emergence of co-housing in Europe Lidewij Tummerts, 2017-10-02 Across Europe the number of co housing initiatives is growing and they are increasingly receiving attention from administrators and professionals who hold high expectations for urban liveability Is co housing a marginal idealist phenomenon or the urban middle class answer to the current housing crisis And has the development of theoretical insight and research kept up with the actual expansion of co housing as a practice These questions were raised during the first European conference on co housing research which took place in Tours France in March 2012 Both the conference and this book aim to move beyond case studies and to look more particularly at the implications and wider perspective of the current co housing trend Using the specific vocabulary of different disciplines and geographic regions the contributions to this book analyse the underlying thinking behind and the expectations projected on diverse models of collaborative housing The authors are aware of the qualities of contemporary co housing but they go beyond advocacy to investigate the conditions under which co housing can be successful as a strategy for housing provision can offer solutions for sustainable urban development or indeed can contribute to involuntary or intentional gentrification This book was originally published as a special issue of the Journal of Urban Research and Practice

Senses of Place: Senses of Time G.J. Ashworth, 2017-03-02 Bringing together case studies from Ireland the Netherlands Canada Germany and Mexico this book examines the link between senses of place and senses of time It suggests that not only do place identities change through time but imagined pasts also provide resources which the present selects and packages for its own contemporary purposes and for forwarding to imagined futures The reasons behind the creation of place image are also explored setting them within political and social contexts In its three main sections Heritage in the Creation of Senses of Place Heritage and Conflicting Identities and Heritage and the Creation of Senses of Place the book examines the creation of place identities at the urban rural regional and international scales It questions how senses of place interact with senses of ethnic cultural identity what the roles of government media residents and tourists are in creating senses of place and how and why all these variables change through time

Making Room for People Lei Qu, Evert Hasselaar, 2011 Making Room for People elaborates on preferences in housing It explores how users occupants and citizens can express their needs searching for the enhancement of individual choice and control over their residential environment and the predicted positive spin offs for urban collectives The central question is What are the conditions under which an increase of peoples choice and voice over the places they inhabit contribute to more liveable urban areas The options to make choices and to have a say in urban design and housing matters are used as a conceptual framework Choice and voice are the main concepts

that structure the empirical material International Review of Social History ,1956 *Beyond the Modern-Postmodern Struggle in Education* Ilan Gur-Ze'ev,2007-01-01 This book is an attempt to historically and conceptually address the present human condition and the current specific role of education as a distinctively creative symbolic violence In doing so the book reevaluates the various manifestations and conflicting alternatives to normalizing education The author suggests a unique Diasporic counter education that transcends modern politics postmodern philosophical assumptions and spiritual telos towards an impetus for the re birth of what the author refers to as the enduring improviser It is a first step towards a new critical language that addresses the challenges of globalizing capitalism of the cyberspace of racism and of the new antisemitism that springs from postcolonialism The book calls for a creative rearticulation of the relations between the aesthetic the ethical the intellectual and the bodily dimensions of the cosmos and human life It is an invitation for a new Diasporic religiosity one which turns courageously towards the exile of the gods It addresses the ever strengthening and tempting sophistication of the anti humanistic dimensions of our postmodern pleasure machine of pre modern redemption projects and of modern deceiving offers for emancipation The book is of special relevance for students of critical sociology critical philosophy Jewish philosophy cultural studies feminist studies education and for all friends of the free spirit

Directory of Published Proceedings ,2004 **American Book Publishing Record** ,2004 *Discourse as Cultural Struggle* Shi-xu,2006-11-01 *Discourse as Cultural Struggle* challenges the cultural imbalance in current research traditions and argues for a culturalist perspective in facilitating better intercultural exchange amidst accelerated processes of globalization It is the first engagement with discourses in non mainstream cultures Covering a wide range of issues in public professional media and intercultural communication the twelve original essays here tackle culturally pressing issues by aligning viewpoints from various geopolitical contexts This is a thought provoking book for scholars and researchers of language and communication studies who seek innovative approaches in their fields of interest Here is a book that takes diversity seriously and lifts it to the level of an epistemic paradigm What we know is culturally constituted and discursively articulated this relativism is converted into an absolutism due to historical power relations and we find ourselves a curious situation in which anything that suggests diversity at fundamental levels of thought becomes a serious theoretical problem This book addresses this absurdity and in the context of globalization the exercise is to be welcomed Jan Blommaert University of London This volume opens up new and innovative perspectives for all interested in discourse analysis cross cultural communication and social change It links and relates approaches which originate more in the West with those stemming from the East Thus a challenging debate is finally made possible which ultimately could and should lead to more collaborative research and even more importantly to better and mutual understanding Ruth Wodak Lancaster University This fine volume enters the large field of Discourse Studies by insisting that cultural knowledge of discourses is essential and thus necessary for our understanding of how discourse shapes human communities and relations among them It is a rich

collection of conceptual and case studies a fine addition to our literatures and worthy of our careful study Donal Carbaugh

 issues of the shape and future of the socialist movement and the politics of post modernism The author identifies a tradition
 of socialist thought left communism that is separate from socialist orthodoxy seeking to stage a conversation between this
 marginalized tradition and post modernism Curriculum for Utopia William B. Stanley, 1992-07 This book examines the
 relationship between contemporary forms of critical theory and social reconstructionism as they relate and contribute to the
 construction of a radical theory of education It illustrates many of the persistent issues problems and goals of radical
 educational reform including the importance of developing a language of possibility utopian thought and the critical
 competence necessary to reveal and deconstruct forms of oppression Stanley perceptively and clearly reexamines new
 challenges posed to various forms of critical pedagogy including reconstructionism by the development of postmodern and

poststructuralist theory focusing on the connections and continuities between them *Neue politische Literatur*, 2004

The Modern Ideal Paul Greenhalgh, 2005-10 Over the last three centuries the world has been modernized From the first stirrings of industrialism to the definitive arrival of globalization artists craftspeople and designers have engaged with modernization in order to make sense of the transformations it continually imposes They have been by turns brutally critical and profoundly idealistic about the ongoing state of things The Modern Ideal explores the idea of modernity returning it to its historical context and showing how theory and practice in the modern visual arts emerged over three centuries Concepts which are central to the meaning of modernity are explained including style modernization progress ideology and universality and movements across all disciplines are discussed from neoclassicism to postmodernism The rise of idealism in the modern visual arts is also explored the attempt to create a definitive positive style that was capable of transforming not only art but society as a whole became the obsessive quest of succeeding generations of artists architects and designers By dealing with issues at large in the contemporary art and design scene and by speculating about the next phase of modern practice the book identifies the collapse of idealism in the modern arts as being of central concern today *Contemporary Social Problems* Vincent N.
