Contending Issues in African Development Obioma M. Iheduru, **The Contemporary Challenges of African Development:** Jean Philippe Azany Grah, 2020-11-17 In 1963 there was a French agronomist named Ren Dumont who published a book *False start in Africa* in this book it explains the economic and development difficulties that Africa was facing so since then what is the real situation of Africa today The book is a theory led conceptual account of the contemporary challenges that face African Development and the factors that may interact and influence at the interface of Africa development African natural resources play vital roles in the world economic by providing the raw materials that most of the industrialized countries need for manufacturing goods and supplying services in every sector for economic growth and well being How come that Africa which is full of these natural resources can be the poorest continent Africa has steadily engaged in the challenges of the twenty first century which began at the beginning of liberalization which has increased economic integration even for less developed countries or LDCs to benefit However there are questions about the capabilities of countries belonging LDC especially Africa which has cast doubt on the continent s economic progress and development The growing list of number of key considerations and aspects that Africa needs to deal with is seemed to be impossible to know what to start *Contending Issues in African Development* Obioma M. Iheduru, 2001-02-28 Annotation Examines the issues and dynamics central to Africa s problematic development and situates those issues within the contents unique cultural political economic and social milieu **Confronting the Challenges and Prospects in the Creation of a Union of African States in the 21st Century** E. Ike Udogu, 2010-02-19 Confronting the Challenges and Prospects in the Creation of a Union of African States in the 21st Century frames the discourse around the important issue of African unification against the backdrop of the region s political and economic marginalization Arguably the richest continent in the world in terms of its abundant untapped natural resources and human capital it still lags behind the other regions of the world developmentally Undeniably Africa is at the crossroads in this millennium within the context of the powerful events and effects of the New Globalization One of the central issues that academics and political actors interested in African development must tackle immediately is how to make the region politically and economically relevant in global affairs These objectives could be attained through continental amalgamation Accordingly this book debates and suggests inter alia strategies that might advance Africa s unification effort in order to provide the politico economic clout needed to spur continental development Further it argues that such a Union of African States is critical for promoting the good political life for all Africans *The Mazruiana Collection Revisited* Ali Al'Amin Mazrui, 2005 Consists of 650 annotated entries covering Mazrui s books dissertations edited works about him major essays in books academic journals and conference papers This work contains essays including pamphlets magazine and newspaper articles and audio visual recordings *Guarding the Guardians* Mathurin C. Hounnikpo, 2016-04-22 The relationship between civil society and the armed forces is an essential part of any

polity democratic or otherwise because a military force is after all a universal feature of social systems Despite significant progress moving towards democracy among some African countries in the past decade all too many African militaries have yet to accept core democratic principles regulating civilian authority over the military This book explores the theory of civil military relations and moves on to review the intrusion of the armed forces in African politics by looking first into the organization and role of the army in pre colonial and colonial eras before examining contemporary armies and their impact on society Furthermore it revisits the various explanations of military takeovers in Africa and disentangles the notion of the military as the modernizing force Whether as a revolutionary force as a stabilizing force or as a modernizing force the military has often been perceived as the only organized and disciplined group with the necessary skills to uplift newly independent nations The performance of Africa s military governments since independence however has soundly disproven this thesis As such this study conveys the necessity of new civil military relations in Africa and calls not just for civilian control of the military but rather a democratic oversight of the security forces in Africa
