## **Content Based Access To Multimedia Information From Technology Trends To State Of The Art:**

**Content-Based Access to Multimedia Information** Brad Perry, Shi-Kuo Chang, J. Dinsmore, David Doermann, Azriel Rosenfeld, Scott Stevens, 2013-03-14 In the past five years the field of electrostatic discharge ESD control has undergone some notable changes Industry standards have multiplied though not all of these in our view are realistic and meaningful Increasing importance has been ascribed to the Charged Device Model CDM versus the Human Body Model HBM as a cause of device damage and presumably premature latent failure Packaging materials have significantly evolved Air ionization techniques have improved and usage has grown Finally and importantly the government has ceased imposing MIL STD 1686 on all new contracts leaving companies on their own to formulate an ESD control policy and write implementing documents All these changes are dealt with in five new chapters and ten new reprinted papers added to this revised edition of ESD from A to Z Also the original chapters have been augmented with new material such as more troubleshooting examples in Chapter 8 and a 20 question multiple choice test for certifying operators in Chapter 9 More than ever the book seeks to provide advice guidance and practical examples not just a jumble of facts and generalizations For instance the added tailored versions of the model specifications for ESD safe handling and packaging are actually in use at medium sized corporations and could serve as patterns for many readers

**Content-Based Video Retrieval** Milan Petkovic, Willem Jonker, 2013-06-29 The area of content based video retrieval is a very hot area both for research and for commercial applications In order to design effective video databases for applications such as digital libraries video production and a variety of Internet applications there is a great need to develop effective techniques for content based video retrieval One of the main issues in this area of research is how to bridge the semantic gap between low level features extracted from a video such as color texture shape motion and others and semantics that describe video concept on a higher level In this book Dr Milan Petković and Prof Dr Willem Jonker have addressed this issue by developing and describing several innovative techniques to bridge the semantic gap The main contribution of their research which is the core of the book is the development of three techniques for bridging the semantic gap 1 a technique that uses the spatio temporal extension of the Cobra framework 2 a technique based on hidden Markov models and 3 a technique based on Bayesian belief networks To evaluate performance of these techniques the authors have conducted a number of experiments using real video data The book also discusses domain solutions versus general solution of the problem Petković and Jonker proposed a solution that allows a system to be applied in multiple domains with minimal adjustments They also designed and described a prototype video database management system which is based on techniques they proposed in the book [Lectures on Information Retrieval](#)

**Lectures on Information Retrieval** Maristella Agosti, Fabio Crestani, Gabriella Pasi, 2003-05-15 Information Retrieval IR is concerned with the effective and efficient retrieval of information based on its semantic content The central problem in IR is the quest to find the set of relevant documents among a large collection containing the information sought satisfying a user's information need usually

expressed in a natural language query Documents may be objects or items in any medium text image audio or indeed a mixture of all three This book presents 12 revised lectures given at the Third European Summer School in Information Retrieval ESSIR 2000 held at the Villa Monastero Varenna Italy in September 2000 The first part of the book is devoted to the foundation of IR and related areas the second part on advanced topics addresses various current issues from usability aspects to Web searching and browsing
