I. Diaz, 1987 *Contributions to Nonlinear Partial Differential Equations* C. Bardos, J. Hernandez, J. I. Diaz, A. Damlamian, 1986-05-01 Contributions to Nonlinear Partial Differential Equations J. I. Diaz, 1987 **Recent Contributions to Nonlinear Partial Differential Equations** Henri Berestycki, Haim Brézis, 1981 *Contributions to Nonlinear Partial Differential Equations* Claude Bardos, 1983 **Applications of Nonlinear Partial Differential Equations in Mathematical Physics**, 1965 Contributions to Nonlinear Elliptic Equations and Systems Alexandre N. Carvalho, Bernhard Ruf, Ederson Moreira dos Santos, Sergio H. M. Soares, Thierry Cazenave, 2015-11-14 This volume of contributions pays tribute to the life and work of Djairo Guedes de Figueiredo on the occasion of his 80th birthday The articles it contains were born out of the ICMC Summer Meeting on Differential Equations 2014 Chapter also dedicated to de Figueiredo and held at the Universidade de S o Paulo at S o Carlos Brazil from February 3 7 2014 The contributing authors represent a group of international experts in the field and discuss recent trends and new directions in nonlinear elliptic partial differential equations and systems Djairo Guedes de Figueiredo has had a very active scientific career publishing 29 monographs and over one hundred research articles His influence on Brazilian mathematics has made him one of the pillars of the subject in that country He had a major impact on the development of analysis especially in its application to nonlinear elliptic partial differential equations and systems throughout the entire world The articles collected here pay tribute to him and his legacy and are intended for graduate students and researchers in mathematics and related areas who are interested in nonlinear elliptic partial differential equations and systems *Nonlinear Partial Differential Equations* A Benkirane, J P Gossez, 1996-04-11 This book presents a collection of selected contributions on recent results in nonlinear partial differential equations from participants to an international conference held in Fes Morocco in 1994 The emphasis is on nonlinear elliptic boundary value problems but there are also papers devoted to related areas such as monotone operator theory calculus of variations Hamiltonian systems and periodic solutions Some of the papers are exhaustive surveys while others contain new results published here for the first time This book will be of particular interest to graduate or postgraduate students as well as to specialists in these areas **H(enri) Berestycki & H. Brézis ed. Recent contributions to nonlinear partial differential equations**, 1981 *Backward Stochastic Differential Equations* N El Karoui, Laurent Mazliak, 1997-01-17 This book presents the texts of seminars presented during the years 1995 and 1996 at the Universit Paris VI and is the first attempt to present a survey on this subject Starting from the classical conditions for existence and unicity of a solution in the most simple case which requires more than basic stochartic calculus several refinements on the hypotheses are introduced to

obtain more general results

Nonlinear Systems and Their Remarkable Mathematical Structures Norbert Euler, Maria Clara Nucci, 2019-12-06 Nonlinear Systems and Their Remarkable Mathematical Structures Volume 2 is written in a careful pedagogical manner by experts from the field of nonlinear differential equations and nonlinear dynamical systems both continuous and discrete This book aims to clearly illustrate the mathematical theories of nonlinear systems and its progress to both non experts and active researchers in this area Just like the first volume this book is suitable for graduate students in mathematics applied mathematics and engineering sciences as well as for researchers in the subject of differential equations and dynamical systems Features Collects contributions on recent advances in the subject of nonlinear systems Aims to make the advanced mathematical methods accessible to the non experts Suitable for a broad readership including researchers and graduate students in mathematics and applied mathematics

Contributions to Nonlinear Analysis Thierry Cazenave, David Costa, Orlando Lopes, Raúl Manásevich, Paul Rabinowitz, Bernhard Ruf, Carlos Tomei, 2007-08-10 This paper is concerned with the existence and uniform decay rates of solutions of the wave equation with a source term and subject to nonlinear boundary damping $u_t u_t u$ in $0 \leq t \leq T$ $0 \leq x \leq 1$ $u(x, 0) = u_0(x)$ $u_t(x, 0) = u_1(x)$ $u(0, t) = u(1, t) = 0$ where Ω is a bounded domain of \mathbb{R}^n with a smooth boundary $\partial\Omega$ Here ν and ν_i are closed and disjoint and represents the unit outward normal ν_i to $\partial\Omega$ Problems like (1.1) more precisely $u_t u_t u$ in $0 \leq t \leq T$ $0 \leq x \leq 1$ $u(x, 0) = u_0(x)$ $u_t(x, 0) = u_1(x)$ $u(0, t) = u(1, t) = 0$ were widely studied in the literature mainly when $f \geq 0$ see [6, 13, 22] and a long list of references therein When $f \leq 0$ and $f \neq 0$ this kind of problem was not well studied by Lasiecka and Tataru [15] for a very general model of nonlinear functions $f(s) \leq 0$ but assuming that $f(s) \leq 0$ that is f represents for $i = 1, \dots, n$ each i an attractive force

Symmetry and Exact Solutions of Nonlinear Mathematical Physics Equations Gangwei Wang, Xiangpeng Xin, Samir A. El-Tantawy, 2024-08-13 Nonlinear problems originating from applied science that is closely related to practices contain rich and extensive content It makes the corresponding nonlinear models also complex and diverse Due to the intricacy and contingency of nonlinear problems unified mathematical methods still remain far and few between In this regard the comprehensive use of symmetric methods along with other mathematical methods becomes an effective option to solve nonlinear problems
