[Selected Works of E. L. Lehmann](#) Javier Rojo, 2012-01-14 These volumes present a selection of Erich L Lehmann's monumental contributions to Statistics These works are multifaceted His early work included fundamental contributions to hypothesis testing theory of point estimation and more generally to decision theory His work in Nonparametric Statistics was groundbreaking His fundamental contributions in this area include results that came to assuage the anxiety of statisticians

that were skeptical of nonparametric methodologies and his work on concepts of dependence has created a large literature. The two volumes are divided into chapters of related works. Invited contributors have critiqued the papers in each chapter and the reprinted group of papers follows each commentary. A complete bibliography that contains links to recorded talks by Erich Lehmann and which are freely accessible to the public and a list of Ph D students are also included.
