Wroblewski,2023-07-10 To grow your ecommerce business you need to gain more clients And to achieve it you have to provide high quality customer experience Sounds logical But the more visitors on your website the more questions your support agents have to handle And here is the challenge you need to face to successfully grow your store How to serve more clients answer more questions and maintain the highquality of support at the same time There are two ways The first is to constantly hire new support agents It probably will work but the cost you ll have to take for constantly recruiting and training new employees will be huge The second way is connected to technology that took the ecommerce industry and not only this one by a storm and will stay with us for a long time If not forever The AI Science Citation Index ,1994 Vols for 1964 have guides and journal lists Improve customer experience with chatbots Beata Stefanowicz,2023-02-13 We have come a long way in the past 70 years since chatting to a computer was first mentioned A chatbot is a computer program that communicates with human users over text or through a speech to text system Businesses can use chatbots to communicate with their customers and recreate the in store shopping experience online Ecommerce companies can do this by Welcoming

visitors to their online store
Offering support within arm's reach
Showing personalized deals
Using proactive sales techniques
Helping customers find the right products
Upselling items and services
Handling complaints on auto pilot
Offering membership cards
Collecting feedback from shoppers
Offering multilingual support
Many ecommerce brands are already taking advantage of chatbots to get ahead of their competitors. Why not try them for yourself and see what this technology can do for your business.

AI Agents vs. AI Chatbots: A Strategic Guide for B2B Customer Service
Branislav Bozanic, 2025-04-01
In 2021, Uber was expanding at a staggering rate, but growth came at a cost. After pandemic-related restrictions eased, the multinational American transportation company faced severe driver shortages and regulatory hurdles that slowed the hiring of new drivers. Wait times surged, prices fluctuated, and customer frustration grew. One of the biggest bottlenecks was due to customer support. The high volume of tickets coming in across multiple channels required manual processing. And therein lay their problem: Even Uber couldn't keep up with all the customer support demands. This resulted in slow response times, inconsistent resolutions, and high operational costs. However, their team didn't panic. There was an obvious solution: AI-driven technologies. More precisely, an AI-powered robotic process automation (RPA) system. Uber quickly implemented RPA to categorize tickets and handle repetitive and time-consuming customer support tasks. The results? Processing time for common issues dropped from days to minutes. Customer satisfaction skyrocketed with faster response times. Cost savings were massive, with the company revenue growing from 17 to 32 billion US dollars the following year. Thanks to chatbots and now AI agents, automating customer service is getting easier, cheaper, and more scalable. These digital assistants can answer customer questions and automate simple tasks based on a specific set of data. But only one of them can also make dynamic decisions, plan actions, and even learn from experiences, offering unparalleled service. Curious to know which one is the all-around solution that is more suitable for the B2B ecosystem? This ebook aims to demystify the differences between AI Agents and AI Chatbots, provide their respective benefits, and help businesses make the right choice according to their unique customer service requirements.
