The swift integration of virtual classrooms, videoconferencing and social media during the pandemic has left teachers navigating uncharted territory. Many who once vehemently resisted technology now stand on the precipice of a digital revolution in education. This dichotomy poses a pressing problem: a dearth of documented research and guidance for educators seeking to measure the true value of these technologies in the post-pandemic era. *Exploring Technology-Infused Education in the Post-Pandemic Era* offers guidance and solutions to the challenges faced by educators. As teachers stand on the brink of a pivotal decision, the research community lags behind in providing the necessary insights to inform their choices. The questions loom large: What technologies emerged during the pandemic and have they proven effective in the classroom? Can these innovations seamlessly coexist with traditional instructional methods? The void in documented research leaves educators in a quandary, lacking the evidence needed to make informed decisions about the integration of technology into their teaching practices. This critical gap impedes progress and hinders the unleashing of the full potential of 21st century educational tools. *LISS 2024* Daqing Gong, Yixuan Ma, Jonathan Foster-Pedley, Juliang Zhang, 2025-08-29 This proceedings volume focuses on the AI and data-driven technical and management innovation in logistics informatics and services.
