Start-up Wolf Olivia Yijian Liu, 2024-05-28 Transnational entrepreneurs with technological know how have been promoted by the Chinese state and academic literature as a central force for regional development of

industrial competitiveness But what motivates them and what do they experience and aspire to when building a start up in China This book answers these questions by examining how socially privileged entrepreneurial talents adopt and champion the wolf culture a fast paced competitive and aspirational work culture that has become prevalent since China's mass promotion of entrepreneurship and innovation Based on extensive field research including participant observation and interviews in Shenzhen's high tech industry this book challenges the popular notion of entrepreneurship as entirely self initiated and passion driven Outlining the concrete instruments of governance of the local state the author argues that transnational talent from elite schools or elite professions is often entrepreneured in China Moreover she argues that the different standards of selection of entrepreneurial talents by state and market actors create localised precarious conditions for them This book offers fascinating insights into the contradictions inherent in the Chinese model of entrepreneurship Start up Wolf will appeal to scholars and students of China studies the anthropology of entrepreneurship science and technology studies and economic geography as well as business practitioners interested in innovation and high tech start ups The Open Access version of this book available at <http://www.taylorfrancis.com> has been made available under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4.0 license
