History and the Historians of Medieval Spain Peter Linehan,1993 A study of medieval Spain and its historians from the chroniclers of the Middle Ages to the revisionists of the post Franco era This book reveals history in the making during the 800 years between the Roman period and what is now described as the birth of the modern state

Emperors and Power in Early Byzantium Liz James,2001 The role of the Byzantine emperor has been exhaustively

analyzed the place of the Byzantine empress often perceived as an appendate to male imperial power is more problematic Elizabeth James begins her study with Helena mother of the first Christian emperor Constantine the Great and ends with Eirene the only woman to rule as an emperor in Byzantium More than simply a biography of each empress in the period between the fourth and eighth centuries this book analyzes the nature of female imperial power during that time What rights and responsibilities what access to power if any did the office of empress carry

Christians, Muslims, and Jews in Medieval and Early Modern Spain Mark D. Meyerson, Edward D. English, 2000 The essays in this interdisciplinary volume examine the social and cultural interaction of Christians Muslims and Jews in Spain during the medieval and early modern periods Together the essays provide a unique comparative perspective on compelling problems of ethnoreligious relations Christians Muslims and Jews in Medieval and Early Modern Spain considers how certain social and political conditions fostered fruitful cultural interchange while others promoted mutual hostility and aversion The volume examines the factors that enabled one religious minority to maintain its cultural integrity and identity more effectively than another in the same sociopolitical setting This volume provides an enriched understanding of how Christians Muslims and Jews encountered ideological antagonism and negotiated the theological and social boundaries that separated them

Texts and Identities in the Early Middle Ages Richard Corradini, 2006 For seven years a collaboration between the Institute for Medieval Studies of the Austrian Academy of Sciences and the Universities of Utrecht Cambridge Leeds and Paris I Sorbonne provided the opportunity for young researchers to discuss and coordinate their work The title of the project and of this volume Texts and identities provides the framework for case studies in different fields of early medieval history They include apparently disparate topics such as historiography and hagiography monastic spaces and memories lay and ecclesiastic legislation as well as liturgy and penance Rather than defining a common field of research the meetings from which these papers have emerged derived their coherence from their common methodological framework This approach combines two elements on the one hand emphasis has been laid on the careful analysis of the transmission of texts and of the manuscript evidence on the other research has focused on the problem of identity or rather of processes of identification including the perception of differences between specific social political and religious communities In the combination of these two approaches the extant texts from the early medieval period are not only seen as mere reflections of ethnic social and cultural identities but also as media that gave meaning to social practices and were often intended to inspire guide change or prevent action directly or indirectly The written texts that have been transmitted to us can be seen as part of a cultural effort to shape the present by means of restructuring the past The often discordant voices of medieval authors allow modern historians to grasp something of the multiplicity of the early medieval world and of the disagreements conflicts idiosyncrasies and individual perceptions among the people who lived in that period Many contributions in this volume propose specific methods for studying changing identities They analyse differences between similar texts over time or specifically changes in texts in the course of their

transmission The papers collected in this volume illustrate that texts were integral parts of a world in transformation

Princely Virtues in the Middle Ages, 1200-1500 István Pieter Bejczy, Cary J. Nederman, 2007 This book sheds light on a previously neglected theme that of the meaning and function of virtues in a political context by analysing Latin texts occasionally in combination with vernacular ones from the thirteenth to fifteenth centuries that define, legitimize or criticize secular rule by using catalogues of virtues original

The Age of Hippotaxotai Ilkka Syv  ne, 2004

The Visigoths in History and Legend J. N. Hillgarth, 2009 This book explores one of the central myths of Spain the idea that Spanish culture arose from that of the Visigoths It begins with a sketch of Visigothic history then proceeds to explore attitudes towards the Goths and legends and myths that developed around them from late antiquity to the twentieth century such ideas proved influential among those who saw the Goths as their spiritual if not literal ancestors The focus is on the myth of the Goths as expressed in literature of a broadly historical nature many authors have played a significant role in forming and shaping this myth and thus in shaping the mentality of their contemporaries and descendants The Gothic myth was of great use to the different monarchies that succeeded the Goths after the Arabic invasion of 711 Visigothic kings were adopted as models by one age after another from the rudimentary kingdom of Asturias in the ninth century to the world monarchy of Spain under the Catholic Kings and the Habsburgs Over the centuries adroit improvements on history and even outright fabrications influenced the creation of an idealized epic past to which Spaniards look even today This study of the evolution and persistence of the myth of Spain's Gothic roots is essential reading for scholars of Spanish history
