## **Conscious Flight Into The Empyrean:**

Conscious Flight Into the Empyrean Anjali Narottam Bagwe, 1999 A Visual Journey In Meditation Conscious Flight into the Empyrean is a touching revelation of the mystical experience brought to us by a modern woman of the Nineties The author learns meditation and in a flash she is catapulted into a world where pillars of light flower within twinkling stars encircle her form snakes twirl on top of her head and invisible hands clean out the inside of her head with tiny brushes and other instruments She travels through tunnels of light has brief glimpses of past lives and zooms into the incredible experience of oneness with the universe becoming the sky the river and the sea This rare depiction of the visual unfolding of the Kundalini energy challenges conventional views of perception and experience The book is a first hand account of an extraordinary voyage into the subtle realms with the author's own illustrations of the visions seen in her daily meditations

*1000: The Levels of Consciousness and the Stages of Awakening* Ramaji, Ananda Devi, 1000 is the 820 page complete guide to LOCs Levels of Consciousness and the Stages of Awakening 1000 is a uniquely accessible breakthrough book that explains the complete spiritual path from beginning to end Students of meditation prayer self inquiry enlightenment non duality Advaita yoga and Eastern religion will find it to be an unusually spirited fiercely candid passionate work

*Entheogens, Myth, and Human Consciousness* Carl A. P. Ruck, Mark Alwin Hoffman, 2012-12-11 ENTHEOGENS MYTH AND HUMAN CONSCIOUSNESS is a much needed accessible exploration into the role of psychoactive sacraments entheogens in religion mythology and history and also includes most treatments of the subject focus on modern scientific research psychotherapy are auto bibliographic accounts or are agenda driven or otherwise naive and myopic A great mystery of altered states of consciousness and species development is expanding with new archeological and anthropological discoveries Religious story telling myth is a timeless journey Surprisingly it's not about truth It's about finding one's self in the midst of the discovery of the Other It is the story of what is separate and unknown that creates self consciousness Our entire life consists ultimately in the discovery of the Other which gives meaning to the discovery of the self The arts and language are the fossil remnants scattered on our path ENTHEOGENS MYTH AND HUMAN CONSCIOUSNESS discusses the influence of psychoactive substances on consciousness human evolution and mystical experiences It explores how religion mythology art and culture stem from entheogenic consciousness and why it's important to us today Entheogens or psychoactive sacraments have a long storied history that has played an essential role in the evolution of consciousness mythology culture religion art and even history and politics ENTHEOGENS MYTH AND HUMAN CONSCIOUSNESS outlines this suppressed yet seminal undercurrent of history giving examples of the role of entheogens from the primal shamanic religions through the historical religions esoteric mystical traditions including the Mystery Religions alchemy and Freemasonry and into contemporary expressions Authors Ruck and Hoffman draw upon decades of research and personal experience in discussing the best documented examples of historically important entheogenic evidences various ongoing

threads of research and speculation to muse upon the meaning of it all Our hominid ancestors experienced a spiritual awakening at the very dawn of consciousness that set them apart from the other creatures of our planet It was a journey to another realm induced by a special food that belonged to the gods This was a plant that was animate with the spirit of deity It was an entheogen It was the visionary vehicle for the trip of the first shaman The story was told over and over again until it achieved the perfect form of a myth The realm was imagined as a topographical place the outer limit of the cosmos the fiery empyrean or its geocentric opposite our own planet Gaia Myths multiplied over time but they always preserved this primordial truth These myths provide a road map a scenario if you can read them for whoever today wants to follow However it is not an easy journey and it is also fraught with many dangers of getting lost of finding no return Access to the entheogens is now largely prohibited or strictly licensed The restrictions constitute an infringement of cognitive freedom limiting the further evolution of human potential into productive creative imagination and experiences that lie beyond the normal the traditional province of shamans who can understand the speech of plants and animals change shape at will and journey both physically and in the spirit to distant exotic realms In addition religions have staked out territorial claims to this realm of spiritual consciousness They have colonized it identified it with their god often reserving the access for their own elite Similarly trade in drugs both medicinal and illegal has colonized the entheogens making them only chemicals rationally depriving them of their spirit

ENTHEOGENS MYTH AND HUMAN CONSCIOUSNESS is a guide for the curious that provides a historical overview of the role that entheogens have played in the development of our unique supremacy as a species and offers also pathways and advice for reconnecting with the primordial sources of nature's power

ENTHEOGENS MYTH AND HUMAN CONSCIOUSNESS investigates the role entheogens have played in the evolution of humankind's attempt to define reality in a context of metaphysical or theological dimensions Although other botanical intoxicants will be considered cannabis daphne opium Syrian rue datura mandrake none with the possible exception of mandrake seem to have lent themselves so readily to metaphoric personifications which make this the subject for a course on mythology The source of humankind's fascination and repulsion for fungi indeed leads to a fundamental consideration of the psychological nature of mankind's fascination or awareness of what in the categorization of religions is termed animism and rituals of ecstatic shamanism In addition the linking of bread and wine as sacramental foods is due to parallel concepts of controlled fungal growth as a simulacrum of the cosmos itself The goal is not so much to acquire factual knowledge of this vast subject but to open up pathways for reflection upon the basic nature of human existence and consciousness The narrative is the awesome history of discovery and the findings of ancient rituals that meld into twentieth century controversy and criticism of psychedelics The future of humanity and the direction of twenty first century brain science is challenged as well as our sense of social convention

Entheogens have been deemed be prohibited controlled substances and as such is an infringement of cognitive freedom Whatever the danger of potential abuse the substance is not the fault but the user The hammer is not

guilty but the carpenter who misuses it because of deficient training In order to exonerate the executioner in Classical antiquity the axe was brought to trial and found guilty The prohibition has drastically retarded the investigation into the therapeutic potential of proscribed drugs including their efficacy in curing addiction Some of these substances also offer the potential for accessing levels of cognition and consciousness beyond the ordinary the traditional provenance of mystics and shamans like bilocation clairvoyance and zoomorphism

**Guru, Gratitude and Grace** Shubhda Vaid, 2022-07-12 When I focused on the spot I could see sharp rays of light emanating from her Ajna chakra and entering mine My eyes started burning and my whole body went into a spin I came to know later that this was Shaktipat and what had happened earlier was Jagran of Kundalini Shakti My initial meditational experiences were sometimes scary and sometimes amusing There were times when I would growl like a lion or hiss like a cobra Sometimes my body would go into an uncontrollable spin or I would keep shaking my head vigorously I would be a lama fighting with another lama or a Tantrik on a cremation ground making loud noises Other people at the group meditation were getting disturbed and upset over my behavior In no way should this path be considered easy or inferior In surrender your whole being your wants and desires your entire personality gets annihilated till a stage where you don't exist it's only the Guru who exists Why would one fall in love Isn't love supposed to uplift you Is it such petty emotion that makes you fall The only thing the world needs is love The only thing anyone needs is love unconditional love and acceptance of I Am No reason no logic no mind

*The Faith of a Physicist* John C. Polkinghorne, 2014-07-14 Is it possible to think like a scientist and yet have the faith of a Christian Although many Westerners might say no there are also many critically minded individuals who entertain what John Polkinghorne calls a wistful wariness toward religion they feel unable to accept religion on rational grounds yet cannot dismiss it completely Polkinghorne both a particle physicist and Anglican priest here explores just what rational grounds there could be for Christian beliefs maintaining that the quest for motivated understanding is a concern shared by scientists and religious thinkers alike Anyone who assumes that religion is based on unquestioning certainties or that it need not take into account empirical knowledge will be challenged by Polkinghorne's bottom up examination of Christian beliefs about events ranging from creation to the resurrection The author organizes his inquiry around the Nicene Creed an early statement that continues to summarize Christian beliefs He applies to each of its tenets the question What is the evidence that makes you think this might be true The evidence Polkinghorne weighs includes the Hebrew and Christian scriptures their historical contexts and the possible motivations for their having been written scientific theories and human self consciousness as revealed in literary philosophical and psychological works He begins with the words We believe and presents understandings of the nature of humanity showing for example that Cartesian theory evolution and natural selection do not tell the entire story of what humans are about especially in light of many sources that attest to our spirituality Moving through the Creed Polkinghorne considers the concept of divinity and God as creator in discussions that cover the Theory of Everything the Big

Bang Theory and the possibility of divine presence within reality so that God is not simply an outside observer Chapters on Jesus analyze the different ways events are described in the Gospels and the way motivation for belief is conveyed for example how do these writings explain why a young man killed in public disgrace could inspire a following when other major world religious leaders lived to become highly revered elders in their communities Faith seeking understanding is according to Polkinghorne like the scientific quest Both are journeys of intellectual discovery in which those who survey experience from an initially chosen point of view must be open to correction in the light of further experience Religion he writes has long known that ultimately every human image of God proves to be an inadequate idol The Faith of a Physicist based on the prestigious 1993 Gifford Lectures delivers a powerful message to scientists and theologians theists and atheists alike Originally published in 1994 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905

**Mysticism: A Study in Nature and Development of Spiritual Consciousness** Evelyn Underhill, 2017-02-15 Remaining a classic in its field this book explains first how mysticism relates to such things as vitalism theology psychology symbolism and magic This treatment may seem unusual for Christian mysticism but it relates widely to the world as we know it and the different practices therein Part Two explores the awakening purification and illumination of yourself and gives solid groundwork for such things as voices visions dreams and other mystical experience In the Mother's Light Rishabhchand, 1951 **Voices**, 1920 Magazine of new poetry

*Science and Christian Belief* J. C. Polkinghorne, 1994 An attempt to apply scientific habits of thought to the core of Christian belief and to examine in turn the central tenets of the creeds in the light of a thoroughly modern world view The result is an intellectual presentation of orthodox Christianity **Pagan Papers** Kenneth Grahame, 1898 **Whispers and Echoes** C.
