Consciousness in Transition Joel S. Goldsmith, 1997 The lectures presented in Consciousness In Transition are significant because they are among the first of what can be called the Infinite Way writings Goldsmith's new students requested classes and instruction in how to live the Infinite Way principles to make them a part of daily life In these early talks Goldsmith began to amplify these spiritual principles giving specific instruction on how to live and move and have your being in this state of consciousness This lecture series lays out a living way of meditation spiritual healing effective prayer and true abundance a life of connectedness to the Source He emphasized that the truth he spoke about was the same truth that has been passed down by saints seers and teachers through the ages and that it is the same truth that is within each and every individual in the world

**Transformation of the Self in the thought of Schleiermacher** Jacqueline Mariña, 2008-04-24 Often referred to as the father of modern theology F D E Schleiermacher occasioned a revolution in theology having a decisive impact on all subsequent theology In this original study Jacqueline Mariña argues that Schleiermachers philosophical ethics constitutes a completely original project and is arguably his most important achievement Mariña examines Schleiermachers claim that the self relates to the whence of all that is through the ground of self consciousness and shows how this understanding allowed him to develop a philosophical system integrally linking religion and ethics Because this whence relates to self consciousness in the way of a formal cause the most important criteria for what constitutes genuine religion are the ethical fruits expressive of a proper relation to the divine In Christian Faith Schleiermacher argues that insofar as the personal self consciousness has been transformed through openness to this whence the actions that arise from it too will be different from those of the former self This book is an analysis of how Schleiermacher conceived of this transformation the conditions of its possibility and the nature of its effects This is accomplished through an examination of his metaphysics of the self especially Schleiermachers understanding of the

immediate self consciousness and its relation to the divine causality the nature of self consciousness and personal identity the nature of agency and the relation between self and society This book demonstrates that Schleiermachers achievement offers a compelling live option for contemporary debates concerning the relation of religion and morality **Cumulative**

**A Hegelian Theory of Divine Revelation** Jason Barton,2025-09-26 This book explores what G W F Hegel meant by God Was he referring to the Lutheran conception of the Christian God Or was he referring to a heterodox conception of God more in line with his philosophical speculations Through a close reading of Hegel s Lectures on the Philosophy of Religion this book offers a detailed answer to this question It contends that Hegel assigns two meanings to the concept of God an inward facing perspective and an outward facing perspective From the inward facing perspective Hegel ventured to authentically capture how world historical religions respectively portray the divine from their own conceptual representational and practical positions From the outward facing perspective Hegel identifies divinity with absolute spirit in its odyssey like movement toward self recognition The concept of God for Hegel encompasses both of these meanings It is argued that one cannot approximate an accurate comprehension of Hegel s God without analyzing divine revelation In contrast to previous books this book firmly grounds Hegel s religious phenomenology in historical and logical factors Through such a grounding A Hegelian Theory of Divine Revelation attempts to achieve a clarified understanding of the character of Hegelian divine revelation and ultimately a clarified understanding of Hegel s concept of God This book is essential reading for all scholars and researchers of German idealism and of the philosophy of religion especially those focusing on the thought of G W F Hegel *Manual of Psychology ...* George Frederick Stout,1898 *Subject Guide to Books in Print* ,1991
