Consciousness At The Crossroads Conversations With Dalai Lama On Brain Science And Buddhism:

Consciousness at the Crossroads Dalai Lama XIV Bstan-'dzin-rgya-mtsho, 1999 This book addresses some of the most fundamental and troublesome questions that have driven a wedge between the realms of Western science and religion for centuries

Where Buddhism Meets Neuroscience H.H. the Fourteenth Dalai Lama, 2018-10-30 Designed as a conversation between the Dalai Lama and Western neuroscientists this book takes readers on a journey through opposing fields of thought showing that they may not be so opposing after all Is the mind an ephemeral side effect of the brain's physical processes Are there forms of consciousness so subtle that science has not yet identified them How does consciousness happen Organized by the Mind and Life Institute this discussion addresses some of the most troublesome questions that have driven a wedge between Western science and religion Edited by Zara Houshmand Robert B Livingston and B Alan Wallace *Where Buddhism Meets Neuroscience* is the culmination of meetings between the Dalai Lama and a group of eminent neuroscientists and psychiatrists The Dalai Lama's incisive open minded approach both challenges and offers inspiration to Western scientists This book was previously published under the title *Consciousness at the Crossroads*

His Holiness the 14th Dalai Lama Shambhala Publications, 2016-12-06 This is a short guide to the works of His Holiness the Fourteenth Dalai Lama offering most especially a quick glimpse of His Holiness's books published in English by Shambhala Publications including *Snow Lion* It includes information on books both for practicing Buddhists and for general readers

Pneumatology and the Christian-Buddhist Dialogue Amos Yong, 2012-07-26 This project at the interface of Buddhist Christian studies comparative theology and Christian systematic theology proceeds by way of exploring questions related to the presence and activity of the Holy Spirit in a 21st century world of many faiths

Meditations of a Buddhist Skeptic B. Alan Wallace, 2013-11-01 Renowned Buddhist philosopher B Alan Wallace reasserts the power of shamatha and vipashyana traditional Buddhist meditations to clarify the mind's role in the natural world Raising profound questions about human nature free will and experience versus dogma Wallace challenges the claim that consciousness is nothing more than an emergent property of the brain with little relation to universal events Rather he maintains that the observer is essential to measuring quantum systems and that mental phenomena however conceived influence brain function and behavior Wallace embarks on a two part mission to restore human nature and to transcend it He begins by explaining the value of skepticism in Buddhism and science and the difficulty of merging their experiential methods of inquiry Yet Wallace also proves that Buddhist views on human nature and the possibility of free will liberate us from the metaphysical constraints of scientific materialism He then explores the radical empiricism inspired by William James and applies it to Indian Buddhist philosophy's four schools and the Great Perfection school of Tibetan Buddhism Since Buddhism begins with the assertion that ignorance lies at the root of all suffering and that the path to freedom is reached through knowledge Buddhist practice can be viewed as a progression from agnosticism not knowing to gnosticism knowing acquired through the maintenance of exceptional mental health mindfulness and

introspection Wallace discusses these topics in detail identifying similarities and differences between scientific and Buddhist understanding and he concludes with an explanation of shamatha and vipashyana and their potential for realizing the full nature origins and potential of consciousness The Dialogical Spirit Amos Yong,2014-10-22 Contemporary proposals for Christian theology from postliberalism to Radical Orthodoxy and beyond have espoused their own methodological paradigms Those who have ventured into this domain of theological method however have usually had to stake their claims vis a vis trends in what may be called the contemporary post al age whether of the postmodern post Christendom post Enlightenment post Western or postcolonial varieties This volume is unique among offerings in this arena in suggesting a way forward that engages on each of these fronts and does so from a particularistic Christian perspective without giving up on Christian theology s traditional claims to universality This is accomplished through the articulation of a distinctive dialogical methodology informed by both pentecostalism and evangelicalism one rooted in the Christian salvation history narrative of incarnation and Pentecost that is yet open to the world in its many and various cultural ethnic religious and disciplinary discourses Amos Yong here engages with twelve different interlocutors representing different ecumenical religious and disciplinary perspectives The Dialogical Spirit thus not only proffers a model for Christian theological method suitable for the twenty first century global context but also exemplifies this methodological approach through its interactions across the contemporary scholarly academic and theological landscape *The Emory-Tibet Science Initiative, a Novel Journey in Cross-Cultural Science Education* Arri Eisen,Meena M. Balgopal,Gillian Hue,Robin Nusslock,Joel Zivot,2022-05-10 **The Tibet Journal** ,2000 **Buddhism with an Attitude** B.
