Urban Development in the Margins of a World Heritage Site Adèle Esposito,2025-10-01 This volume addresses the relationship between the UNESCO World Heritage Site of Angkor Cambodia and the nearby town of Siem Reap While previous work on heritage sites has mainly focused on protected areas this book shifts the attention to the margins where detrimental tourism driven urban development may take place By delimiting a protected site a non heritage space is created in which spatial fragmentation disruptive development processes and unjust power plays can occur In post war Cambodia liberalization and collective aspirations for progress have provided a strong incentive for modernization

Controversial interests compete in the arena of urban development and real estate development prevails over planned growth At the same time Siem Reap's marginal position allows for some freedom in architectural and urban design In the shadow of institutional control this architectural space expresses alternative visions of the Khmer heritage and connects them with images of urban modernity

Sustainable Management of Historic Settlements in Asia Niyati Jigyasu, Anjali Krishan Sharma, 2025-01-09 The book addresses the contribution of Intangible Cultural Heritage to the sustainable management of historic cities and towns Through the unique diverse and dynamic illustrations from Asia it provides insights into the interrelationships of intangible and tangible cultural attributes and their significance on the sustainability of these areas Historic cities and towns large and small along with their natural and man made environments have a distinct identity and embody the values of traditional urban cultures Evolved by tangible built forms and intangible elements as cultural practices and expressions meanings and values attributed to them they are in a state of continuous change The built environment acts as a place or a site where most of these expressions are shaped These areas are significant for their social cohesion and economic stronghold that dates back over generations and centuries Over the years there have been many theoretical discussions about the interrelationships of tangible and intangible but is challenging to manage in practice especially in historic urban areas There is a lack of understanding of the complexity and pervasiveness of intangible values and their direct relationship with the physical structure of the town city This book strives to address the various challenges emphasising the intricate relationships between the tangible and intangible aspects of
