## **Confini Borders:**

**Borders and the Politics of Space in Late Medieval Italy** Luca Zenobi, 2023 Space matters It situates our history structures our daily lives and often determines what we can and cannot do Borders are central to this reality This book explores how borders were understood made and encountered at the end of the Middle Ages and what they can tell us about the spatial fabric of society at the threshold of modernity Borderlands and Liminal Subjects Jessica Elbert Decker, Dylan Winchcock, 2017-11-15 Borders are essentially imaginary structures but their effects are very real This volume explores both geopolitical and conceptual borders through an interdisciplinary lens bridging the disciplines of philosophy and literature With contributions from scholars around the world this collection closely examines the concepts of race nationality gender and sexuality in order to reveal the paradoxical ambiguities inherent in these seemingly solid binary oppositions while critiquing structures of power that produce and police these borders As a political paradigm liminality may be embraced by marginal subjects and communities further blurring the boundaries between oppressive distinctions and categories

Chianti Classico Bill Nesto, Frances Di Savino, 2016-09-20 This book tells the story of the ancient land named Chianti and the modern wine appellation known as Chianti Classico In 1716 Tuscany's penultimate Medici ruler Cosimo III anointed the region of Chianti along with three smaller areas in the Florentine State as the world's first legal appellations of origin for wine In the succeeding centuries this milestone was all but forgotten By the late nineteenth century the name Chianti rather than signifying this historic region and its celebrated wine identified a simple Italian red table wine in a straw covered flask In the twenty first century Chianti Classico emerged as one of Italy's most dynamic and fashionable wine zones Chianti Classico relates the fascinating evolution of Chianti as a wine region and reveals its geographic and cultural complexity Bill Nesto MW and Frances Di Savino explore the townships of Chianti Classico and introduce readers to the modern day winegrowers who are helping to transform the region The secrets of Sangiovese the principal vine variety of Chianti are also revealed as the book unlocks the myths and mysteries of one of Italy's most storied wine regions The publication of Chianti Classico coincides with the three hundredth anniversary of the Medici decree delimiting the region of Chianti on September 24 1716

exposes the relation between rhetoric and ideology Barbara Spackman looks at Italian fascism as a matter of discourse with virility as the master code that articulates and melds its disparate elements In her analysis rhetoric binds together the elements of ideology with virility as the key To reveal how this works Spackman traces the circulation of virility in the discourse of the Italian regime and in the rhetorical practices of Mussolini himself She tracks the appearance of virility in two of the sources of fascist rhetoric Gabriele D Annunzio and F T Marinetti in the writings of the futurist Valentine de Saint Point and the fascist feminist Teresa Labriola and in the speeches of Mussolini A critical and timely contribution to the current reappraisal of fascist ideology this book will interest anyone concerned with the relations between gender sexuality and fascist discourse *A New Dictionary of the Italian and English Languages* Giuspanio Graglia,1865 **Italian Pocket**

web find the equation of the line in all three forms listed above two of the forms require slope so let's find that first slope  $m = \frac{\Delta y}{\Delta x} = \frac{5 - 4}{5 - 2} = \frac{9}{3} = 3$  now we can plug in  $m$  and one of the points say 5 5 to get point slope form  $y - y_1 = m(x - x_1)$

web what is the equation for a vertical line the slope is undefined and where does it cross the y axis in fact this is a special case and we use a different equation not y but instead we use x like this  $x = 1.5$  every point on the line has x coordinate 1.5 that is why its equation is  $x = 1.5$
