Conflicting Missions? Tom Loveless, 2011-04-01 Ask people whether teachers unions are good or bad for education and you are likely to receive a wide variety of opinions A 1998 Gallup Poll asked whether teachers unions helped hurt or made no difference in the quality of education in U S public schools Twenty seven percent responded that unions helped 26 percent that they hurt and 37 percent that they made no difference 10 percent of those surveyed said they did not know Although teachers unions were first organized in the nineteenth century and collective bargaining has been a fact of life in most communities since the 1960s the body of literature evaluating the impact of teachers unions on American education is surprisingly small Conflicting Missions helps close the knowledge gap by providing a clear balanced analysis of the role of teachers unions in education reform The volume emerges from a 1998 conference organized by the Program on Education Policy and Governance at Harvard University The contributors represent a broad array of disciplinary backgrounds and methodological approaches including some of the unions harshest critics and most loyal supporters In examining the relationship of teachers unions and educational reform the authors approach the subject from several directions They ask whether unions affect educational productivity most notably in terms of student achievement They analyze how teachers unions function as professional organizations concerned with the occupation of teaching as institutional actors defending interests within a bureaucratic system of education and as political actors wielding influence on legislation and elections Reflecting a variety of perspectives and opinions Conflicting Missions offers a balanced analysis of a controversial topic It is a useful starting point for readers who want to discover the complexity of teachers unions and their influence both positive and negative on the national effort to improve America s schools

teaching as institutional actors defending interests within a bureaucratic system of education and as political actors wielding influence on legislation and elections Reflecting a variety of perspectives and opinions *Conflicting Missions* offers a balanced analysis of a controversial topic It is a useful starting point for readers who want to discover the complexity of teachers unions and their influence both positive and negative on the national effort to improve America s schools **The SAGE Handbook of Educational Leadership** Fenwick W. Handbook of Education Politics and Policy Bruce S. Cooper,James G. Cibulka,Lance D. Fusarelli,2008-06-30 Written by a mix of established and rising stars in school politics policy law finance and reform this comprehensive Handbook provides a three part framework that helps organize this relatively new and loosely organized field of study A central theme running through the book is how to harness politics to school equity and improvement Key features include Thematic Discussions detailed discussions of key topics in educational politics are organized by themes and competing perspectives The overarching themes are 1 the goals of the U S political system justice equity opportunity efficiency and choice 2 the means and resources for reaching these goals and 3 the political behaviors and compromises that seek to mitigate ideological differences and conflicts of interest Research Oriented in addition to summarizing the latest research connected to key topics each chapter exemplifies and reports on the methods and techniques for further exploration of these topics Reform Oriented throughout the book and especially in the summarizing chapter authors provide suggestions for improving the political behaviors of key educational groups and individuals unions superintendents politicians school boards teachers and parents

School Reform, Corporate Style Dorothy Shipps,2006 Like other big city school systems Chicago s has been repeatedly reformed over the last century Yet its schools have fallen far short of citizens expectations and left a gap between the performances of white and minority students Many blame the educational establishment for resisting change Other critics argue that reform occurs too often still others claim it comes not often enough Dorothy Shipps reappraises the tumultuous history of educational progress in Chicago revealing that the persistent lack of improvement is due not to the extent but rather the type of reform Throughout the twentieth century managerial reorganizations initiated by the business community repeatedly altered the governance structure of schools as well as the relationships of teachers to children and parents but brought little improvement while other more promising reform models were either resisted or crowded out Shipps chronicles how Chicago s corporate actors led abetted or restrained nearly every attempt to transform the city s school system then asks whether schools might be better reformed by others To show why city schools have failed urban

children so badly she traces Chicago's reform history over four political eras revealing how corporate power was instrumental in designing and revamping the system Her narrative encompasses the formative era of 1880-1930 when teachers unions moderated business plans previously unexplored business activism from 1930 to 1980 when civil rights dominated school reform and the decentralization of the 1980s She also covers the uneasy cooperation among business associations in the 1990s to install the mayor as head of the school system a governing regime now challenged by privatization advocates Business people may be too wedded to a stunted view of educators to forge a productive partnership for change Unionized teachers bridle at the second class status accorded them by managers If reform is to reach deeply into classrooms Shipps concludes it might well require a new coalition of teachers unions and parents to create a fresh agenda that supersedes corporate interests This study clearly shows that in Chicago as elsewhere urban schooling is intertwined with politics and power By reviewing more than a century of corporate efforts to make education work Shipps makes a strong case that it's high time to look elsewhere perhaps to educators themselves for new leadership

The Politics of Education Reform Eran Tamir, 2006

Why

School Reform Is Failing and What We Need to Do about It Jerry Wartgow, 2007-12-14 Why School Reform Is Failing and What We Need to Do about It evolved from a review of the educational and managerial theory and history that shaped our contemporary public education system This theoretical construct is then interpreted through more than forty years of valuable experience acquired by the author while working in the trenches of education reform This book's amalgamation of theory and practice is translated into ten lessons learned from attempts to reform and improve public education to date It provides the perspective of a practitioner as to how and why the unintended consequences of well intentioned people have hindered rather than helped to reform and improve our schools It calls for us to pause take a deep breath and learn from the experiences of the past before launching the latest reform de jour in a frenzied quest to find a silver bullet or quick fix to the many varied and complex issues that are enmeshed in education reform More importantly it presents a roadmap and recommendations for steps that need to be taken to reform school reform so that we can realize meaningful and sustainable improvements in student achievement
