**Confound and Destroy** Martin Streetly, 1979-09-01      **Confound and Destroy** Martin Streetly, 1978-01-01 Den mindst kendte enhed i Bomber Command under krigen var 100 Group der varetog den elektroniske krigsførelse mod Tyskland Her skildres denne krigsforms indvirkning på det tyske luftforsvar      *The Oil Campaign 1944-45* Steven J. Zaloga, 2022-06-23 A new illustrated history of one of the key air campaigns of late World War II the American effort to cripple Germany's oil production and grind its armed forces to a halt With retreating German forces losing their oilfields on the Eastern Front Germany was reliant on its own facilities particularly for producing synthetic oil from coal However these were within range of the increasingly mighty Allied air forces In 1944 the head of the US Strategic Air Forces General Carl Spaatz was intent on a new campaign that aimed to cripple the German war machine by depriving it of fuel The USAF's Oil Campaign built up momentum during the summer of 1944 and targeted these refineries and plants with its daylight heavy bombers Decrypted German communications made it clear that the Oil Campaign was having an effect against the Wehrmacht Fuel shortages in the autumn of 1944 forced the Luftwaffe to ground most of its combat units except for fighters involved in the defense of the Reich Fuel shortages also forced the Kriegsmarine to place most of its warships in harbor except for the U boats and greatly hampered German army campaigns such as the Battle of the Bulge in December 1944-45 This fascinating book packed with key photos and illustrations examines the controversies and debates over the focus of the US bombing campaign in the final year of the war and the impact it had on the war effort overall      *Confound and Destroy* Martin Streetly, 1978 Den mindst kendte enhed i Bomber Command under krigen var 100 Group der varetog den elektroniske krigsførelse mod Tyskland Her skildres denne krigsforms indvirkning på det tyske luftforsvar      *Wizardry for air campaigns : signals intelligence support to the cockpit*, 2001 In order for all applications of airpower including counter air deep interdiction strike air landing and combat search and rescue to succeed they must be informed by comprehensive data on targets Moreover it would be helpful if intelligence included the intentions and capabilities of opponents Getting signals intelligence data to the cockpit and pilots for instantaneous use on the battlefield is the objective Signals intelligence can provide needed information but its collection processing analysis and distribution is secretive Consequently an operator is slow to get even minimal data Real time signals intelligence support to the cockpit is an on going challenge but it is not as cosmic or fantasy based as some believe Three historical examples illustrate what can be done when operations and intelligence ensure that critical data reach the battlefield in a timely fashion      *The History of Air Intercept Radar & the British Nightfighter 1935-1959* Ian White, 2007-05-30 This detailed history of Air Intercept radar traces the development of this vital military technology with the Royal Air Force during WWII In the years after World War I the United Kingdom was desperate to develop some form of protection from an enemy air strike As early as 1923 the British Army had devised sound mirrors that could detect aircraft up to twelve miles away This technical history traces the development of military radar technology from this early experimental

phase to the creation of the first air to air radar systems and their uses in battle Historian Ian White sets this fascinating narrative within the larger political military economic and technological context of the era Through World War II Air Intercept radar was a vital asset in protecting RAF bomber forces as well as the country itself But developing the technology required the tireless work of physicists and engineers in the Air Ministry Research Establishment particularly members of the Establishment s Airborne Group working under Dr Edward Bowen Their Airborne Interception radars such as the AI Mk IV were used in Blenheim night fighters during the winter Blitz and by Mosquito during the Baedeker Raids This in depth history covers the introduction of centimetric technology at the Telecommunications Research Establishment the creation of centimetric AI and their installation in the Beaufighter and later marks of the Mosquito It describes the creation of the Radiation Laboratory at MIT and concludes with a section on further developments during the Cold War

**Short Stirling Units of World War 2** Jonathan Falconer, 2018-04-19 Of the RAF s trio of four engined heavy bombers in World War 2 the mighty Short Stirling was the first to enter service in August 1940 From its first raid in February 1941 the Stirling was at the forefront of the British night bombing offensive against Germany before unacceptably high losses forced its relegation to second line duties later in the war In its modified form as the Mark IV the Stirling fulfilled vital roles with the RAF as a paratroop transport and glider tug on D Day at Arnhem and on the Rhine crossing as well as flying countless Special Duties operations over Occupied Europe and Norway Its last gasp was in 1948 49 when a handful of Mk Vs were acquired by the Royal Egyptian Air Force to bomb Israel in the First Arab Israeli War Containing numerous first hand combat accounts from the crews that flew the bomber and detailed profile artwork Short Stirling Units of World War 2 uncovers the history of one of the RAF s greatest World War 2 bombers

**The Build Up** Martin W. Bowman, 2013-01-19 For the Allies as well as Germany it will be the longest day So said Field Marshall Erwin Rommel of the operations on D Day and he was correct This is the first volume of a most impressive tribute and comprehensive five part work that includes a multitude of personal military and civilian accounts of the aerial operations which were carried out on D Day At fifteen minutes after midnight on 6 June 1944 Operation Overlord the Allied invasion of Hitler s Festung Europe became reality The logistics of landing almost 250 000 men by amphibious craft seems almost unimaginable yet a massive aerial umbrella of 3 000 RAF and USAAF fighters fighter bombers and heavy bombers headed for France and more than 1 000 transport aircraft dropped more than 17 000 paratroopers to secure the flanks and beach exits of the assault area Air superiority in the invasion areas was total It was a day that changed the whole course of the war and resulted in the first steps to final victory in Europe Copious quotes from American and British and Dominion forces fighting men sailors airmen from the occupied countries and their German opponents tell of incredible illuminating and often understated actions of extraordinary courage companionship and a common fear of death or serious injury which offer a more personalized view of D Day This first volume sets an impressive precedent for the rest of the series
