Adaptive Collaborative Control of Multiagent Systems by Event-Triggered Mechanisms Juan Zhang, Huaguang Zhang, Dongsheng Yang, Yanhong Luo, Bowen Zhou, 2025-02-20 This book provides a detailed study of several types of control problems in multi agent systems including consensus output regulation containment and formation problems The research on collaborative control of multi agent systems has attracted engineers and scientists from various disciplines such as control mathematics artificial intelligence and computer engineering This book proposes a control strategy based on adaptive triggering mechanism and establishes a basic energy saving framework it also proposes an adaptive learning rate to replace fixed weights ensuring that the proposed strategy does not rely on any global information of the communication topology and has scalability This book is ideal for students researchers and engineers in collaborative control wireless networks power grids UAVs and more

Morality Politics in American Cities Elaine B. Sharp, Yvette M. Alex-Assensoh, 2005 Topless bars casino gambling needle exchange programs for drug addicts there s no question morality issues remain front and center in urban politics Presenting a systematic analysis of culture war issues at the local level Elaine Sharp shows how American cities deal with these ongoing concerns Drawing on a sample of ten strategically chosen cities she explains differences in how municipalities respond to controversies surrounding sex business abortion clinics legalized gambling gay rights and drug use By analyzing the relative importance of subculture economics and institutional arrangements in the disputes she points the way toward richer and more complete understanding of how different cities respond differently to these hot button issues Far more than a statistical study *Morality Politics in American Cities* is a collection of fascinating stories of real people grappling with down to earth issues and real life drama richly informative case studies that will captivate students and interested citizens alike Mayors public health directors activists and others speak their minds about the pros and cons of these controversies Here are officials in one city confronting the Vatican over funding for abortion services those in another battling a local university over its refusal to provide health benefits to gay partners of faculty members and still others mounting a massive community sponsored attack on topless clubs These stories provide detailed evidence to support classifications needed for comparing cities experience with each of the five morality issues They also corroborate inferences drawn from the comparisons by showing what considerations were in play as local officials grappled with these issues Overall the study shows that cultural factors usually dominate policymaking in local politics except when specific economic interests are at stake and also observes that county level governments are more important than previously thought in terms of morality issue decisions As provocative as it is informative *Morality Politics in American Cities* demonstrates that such issues same sex marriage for example are multidimensional and often difficult to resolve Its conclusions however contingent mark an important step in the ongoing process of understanding important differences in approaches to these issues and clearly show how moral conflicts continue to define American politics

Nonlinear Control and Filtering for Stochastic Networked Systems Lifeng Ma,Zidong Wang,Yuming Bo,2018-12-07 In this book control and filtering problems for several classes of stochastic networked systems are discussed In each chapter the stability robustness reliability consensus performance and or disturbance attenuation levels are investigated within a unified theoretical framework The aim is to derive the sufficient conditions such that the resulting systems achieve the prescribed design requirements despite all the network induced phenomena Further novel notions such as randomly occurring sensor failures and consensus in probability are discussed Finally the theories techniques developed are applied to emerging research areas Key Features Unifies existing and emerging concepts concerning stochastic control filtering and distributed control filtering with an emphasis on a variety of network induced complexities Includes concepts like randomly occurring sensor failures and consensus in probability with respect to time varying stochastic multi agent systems Exploits the recursive linear matrix inequality approach completing the square method Hamilton Jacobi inequality approach and parameter dependent matrix inequality approach to handle the emerging mathematical computational challenges Captures recent advances of theories techniques and applications of stochastic control as well as filtering from an engineering oriented perspective Gives simulation examples in each chapter to reflect the engineering practice

Agenda Setting in a 2.0 World Thomas J. Johnson,2013-07-24 This volume explores agenda setting theory in light of changes in the media environment in the 21st century In the decades since the original Chapel Hill study that launched agenda setting research the theory has attracted the interest of scholars worldwide Agenda Setting in a 2.0 World features the work of a new generation of scholars The research provided by these young scholars reflects two broad contemporary trends in agenda setting A centrifugal trend of research in the expanding media landscape and in domains beyond the original focus on public affairs and a centripetal trend further explicating agenda setting's core concepts

Critical Thinking for College Students Jon Stratton,1999-10-27 The purpose of critical thinking according to this text is rethinking that is reviewing evaluating and revising thought The approach of Critical Thinking for College Students is pragmatic and pluralistic truth is viewed in terms of public confirmation and consensus rather than with regard to naive realism relativism or popular opinion The value of empathy and the legitimacy of diverse points of view are stressed Nevertheless it is necessary to use specific linguistic logical and evidential standards in order to evaluate thought The primary elements of critical thinking are proper definition paraphrasing reconstruction empathy analysis of arguments evaluation of reasoning brainstorming imagination problem solving The opening chapters of the text provide a thorough discussion of linguistic standards of meaning A detailed examination of logical inference and informal fallacies follows The final chapters of the book cover standards of evidence and problem solving Instructor's Manual ISBN 0 8476 9603 0

Time, Politics, and Policies Burdett A. Loomis,1994 Loomis observed the politics of policymaking in Kansas from May

1988 through May 1989 Using specific examples he shows how deadlines occur in regular predictable patterns in the development of issues in subsequent policy decisions and explains how they ultimately narrow the choices presented to any legislative body Educational Tests for Use in Elementary Schools Charles Watters Odell, University of Illinois (Urbana-Champaign campus). Rochefort, Roger W. Cobb, 1994 At the nexus of politics and policy development lies persistent conflict over where problems come from what they signify and based on the answers to those questions what kinds of solutions should be sought Policy researchers call this process problem definition Written for both scholars and students this book explains how and why social issues come to be defined in different ways how these definitions are expressed in the world of politics and what consequences these definitions have for government action and agenda setting dynamics The authors demonstrate in two theoretical chapters and seven provocative case studies how problem definition affects policymaking for high profile social issues like AIDS drugs and sexual harassment as well as for problems like traffic congestion plant closings agricultural tax benefits and air transportation By examining the way social problems are framed for political discussion the authors illuminate the unique impact of beliefs values ideas and language on the public policymaking process and its outcomes In so doing they establish a common vocabulary for the study of problem definition review and critique the insights of existing work on the topic and identify directions for future research *New York Court of Appeals.
