Contemporary Issues In Comparative Psychology:

Contemporary Issues in Comparative Psychology Donald A. Dewsbury, 1990 Contemporary Issues in Comparative Psychology provides an overview of current research in the branch of comparative psychology that lies within the mainstream of the study of animal behaviour The book presents some of the best work being done by psychologists studying animal behaviour and remonstrates the concerns and the achievements of this dynamic field Contemporary Issues in Comparative Psychology should serve as a useful resource for students and professionals working in the fields of psychology zoology ecology and animal behaviour *Comparative psychology at issue*, 1973 Comparative Psychology at Issue Helmut E. Adler, Leonore Loeb Adler, Ethel Tobach, 1973 **Comparative Psychology at Issue** Ethel Tobach, 1973

National Library of Medicine Current Catalog National Library of Medicine (U.S.), 1973 First multi year cumulation covers six years 1965 70 *Cognition, Evolution, and Behavior* Sara J. Shettleworth, 2010-04-10 How do animals perceive the world learn remember search for food or mates communicate and find their way around Do any nonhuman animals count imitate one another use a language or have a culture What are the uses of cognition in nature and how might it have evolved What is the current status of Darwin's claim that other species share the same mental powers as humans but to different degrees In this completely revised second edition of *Cognition Evolution and Behavior* Sara Shettleworth addresses these questions among others by integrating findings from psychology behavioral ecology and ethology in a unique and wide ranging synthesis of theory and research on animal cognition in the broadest sense from species specific adaptations of vision in fish and associative learning in rats to discussions of theory of mind in chimpanzees dogs and ravens She reviews the latest research on topics such as episodic memory metacognition and cooperation and other regarding behavior in animals as well as recent theories about what makes human cognition unique In every part of this new edition Shettleworth incorporates findings and theoretical approaches that have emerged since the first edition was published in 1998 The chapters are now organized into three sections Fundamental Mechanisms perception learning categorization memory Physical Cognition space time number physical causation and Social Cognition social knowledge social learning communication Shettleworth has also added new chapters on evolution and the brain and on numerical cognition and a new chapter on physical causation that integrates theories of instrumental behavior with discussions of foraging planning and tool using **Social Influences on Vocal Development** Charles T. Snowdon, Martine Hausberger, 1997-03-20 For at least 30 years there have been close parallels between studies of birdsong development and those of the development of human language Both song and language require species specific stimulation at a sensitive period in development and subsequent practice through subsong and plastic song in birds and babbling in infant humans leading to the development of characteristic vocalisations for each species This book illustrates how social interactions during development can shape vocal learning and extend the sensitive period beyond infancy and how social companions can induce flexibility even into adulthood

Social companions in a wide range of species including birds and humans but also cetaceans and nonhuman primates play important roles in shaping vocal production as well as the comprehension and appropriate usage of vocal communication. This book will be required reading for students and researchers interested in animal and human communication and its development. **Contemporary Issues in Human Development** Cheryl De la Rey, 1997. This text provides useful and contextual insights by several progressive social scientists. It tackles topics not normally encountered in the more traditional texts including teenage pregnancy, violence, physical disability, childhood sexuality and alcohol misuse in South Africa.

Animal Thinking Randolph Menzel, Julia Fischer, 2011-11-04. Experts from psychology, neuroscience, philosophy, ecology and evolutionary biology assess the field of animal cognition. Do animals have cognitive maps? Do they possess knowledge? Do they plan for the future? Do they understand that others have mental lives of their own? This volume provides a state-of-the-art assessment of animal cognition with experts from psychology, neuroscience, philosophy, ecology and evolutionary biology addressing these questions in an integrative fashion. It summarizes the latest research, identifies areas where consensus has been reached and takes on current controversies. Over the last thirty years, the field has shifted from the collection of anecdotes and the pursuit of the subjective experience of animals to a rigorous hypothesis-driven experimental approach. Taking a skeptical stance, this volume stresses the notion that in many cases, relatively simple rules may account for rather complex and flexible behaviors. The book critically evaluates current concepts and puts a strong focus on the psychological mechanisms that underpin animal behavior. It offers comparative analyses that reveal common principles as well as adaptations that evolved in particular species in response to specific selective pressures. It assesses experimental approaches to the study of animal navigation, decision making, social cognition and communication and suggests directions for future research. The book promotes a research program that seeks to understand animals' cognitive abilities and behavioral routines as individuals and as members of social groups. **Developmental Psychobiology**, 1995. Publishes original research papers from the disciplines of psychology, biology, neuroscience and medicine that contribute to an understanding of behavior development. Research that focuses on development in the embryo, fetus, neonate, juvenile or adult animal and multidisciplinary research that relates behavioral development to anatomy, physiology, biochemistry, genetics or evolution is appropriate. The journal represents a broad phylogenetic perspective on behavior development by publishing studies of invertebrates, fish, birds, humans and other animals. Annals of the New York Academy of Sciences Thomas Lincoln Casey, Gilbert Van Ingen, Charles Lane Poor, Edmund Otis Hovey, Ralph Winfred Tower, 2003. Records of meetings 1808-1916 in v 11-27. **Catalog of Copyright Entries. Third Series** Library of Congress. Copyright Office, 1975. **Psychology Express: Biological Psychology (Undergraduate Revision Guide)** Emma Preece, Dominic Upton, 2014-02-10. This revision guide provides concise coverage of the central topics within Biological Psychology presented within a framework designed to help you focus on assessment and exams and matching the requirements of the BPS. The text is organised so that the basic

principles are outlined first and then expanded upon with a consideration of higher order functions Revision of the basic principles from the early chapters is revisited in later chapters in the context of higher order psychological functioning Sample questions assessment advice and exam tips drive the organisation within chapters so you are able to grasp and marshal your thoughts towards revision of the main topics Features focused on critical thinking practical applications and key research will offer additional pointers for you in your revision process exam preparation A companion website provides supporting resources for self testing exam practice answers to questions in the book and links to further resources
