## **Contemporary Policing Personnel Issues And Trends:**

**Contemporary Policing** Mark L. Dantzker, 1997 Contemporary Policing Personnel Issues Trends is an edited volume that provides students with a complete picture of current policing issues. The collection draws on the ideas of several well known academics and scholars. Arranged thematically, this text fully covers the standard topics in the field including stress, education and training, professional ethics, community policing, and use of force. It then goes a step further than traditional texts to cover current topics such as women in policing, minority groups, criminal analysis, and technological changes. The chapters are concise, clearly written, and combine rich frameworks with illustrations drawn from real experience. M. L. Dantzker is an associate professor of Political Science at Georgia Southern University, teaching in the Justice Studies Program, specializing in policing. He received his Ph.D. in Administration from the University of Texas at Arlington. Prior to entering academia full time, Dr. Dantzker was a police officer in Indiana and in Texas. He has researched, consulted, and published in the areas of police stress, police job satisfaction, educational issues, criminal justice statistics, and police chief requirements. In depth discussion of today's most important policing topics. Comprehensive coverage of standard law enforcement issues. Compilation of ideas from several well known academics and scholars. *Policing in Modern Society* Bruce L. Berg, 1999. Draws upon the use of contemporary examples taken from movies, television, and the print media, this instructor's guide includes chapter outlines, chapter objectives, summaries of chapters, key terms from chapters, a test bank consisting of the following types of questions: choice, true and false, matching, and discussion. *Policing: Toward an Unknown Future* John Crank, Colleen Kadleck, 2013-12-16. The enclosed papers are the culmination of a project. Dr. John Crank and Dr. Colleen Kadleck carried out assessing issues facing the police into the early 21st century. The papers are future oriented in the sense that they anticipate trends visible today. Everywhere the contributing scholars found that the organizational concept, practice, and function of the police were undergoing transition. Yet the seeming state level hardening of the police function was ubiquitous. Two themes were noteworthy. On the one hand, in developing or second world countries, police face endemic problems of corruption, organized crime, and drugs. Police in response are undergoing centralization and intensification of law enforcement activities. In countries with first world economies, Canada, the United States, and Australia, contributors discovered trends toward expansion of the police function, a trend described by Brodeur as toward high policing. It reflects the growing reliance on surveillance for crime control and for the tracking of minority, indigenous, and immigrant populations in crime prevention efforts. The results suggest that governments, sometimes encouraged by their citizenry, seem increasingly to rely on the police to deal with a broad array of social as well as criminal problems. This book was originally published as a special issue of *Police Practice and Research*. Policing and Training Issues Michael Palmiotto, 2003. On almost a daily basis somewhere in the United States, a police officer commits an act that often leads to a question of his or her training. After selection, perhaps the most crucial aspect of police officer development is the training. Even the U.S.

Supreme Court has weighed in on this subject by holding that a police agency and its governing body could be sued for a failure to adequately train or for failing to provide training to police officers. Considering the importance of this topic one would think that there would be numerous books on the subject. Yet to date there are a very limited number. *Policing and Training Issues* is among the first edited works available offering an important array of training topics. In *Policing and Training Issues* Dr Michael Palmiotto and his co authors have created a textbook that examines some of today's most important training subjects. It begins with an overview of police training throughout police history and includes subjects on academy management executive training police corps learning theories and developing skills as well as other specialty subjects such as multicultural training field training officers criminal investigations and community policing. The text concludes with a chapter that integrates all topics covered as well as a look at the future of police training. This new textbook represents an in depth examination of policing and various related training issues through the perspectives of respected academics and practitioners. This textbook will help broaden the reader's understanding of the relationship between the police and their training.

**Policy Studies Journal**, 1972 Police Organization and Management Vivian Anderson Leonard, Harry W. More, 2000. This work describes the basic tenets of organization theory and applies them to the police setting. It describes the problems of integrating the individual into the organization responding to change through community policing motivation leadership and productivity.

*International Perspectives on Community Policing and Crime Prevention* Steven P. Lab, Dilip K. Das, 2003. This book provides insight on the great diversity in community policing and crime prevention as they appear in countries around the world. Various chapters deal with countries that have established formal professional police forces are in transition from colonial status to independence or are emerging democracies faced with the demands associated with major political and social change. All of these efforts are tied together with the recognition that the public needs to be involved in preventing crime. For individuals interested in the concept of community policing and its implications around the globe.

Policing and Violence Ronald G. Burns, Charles E. Crawford, 2002. This comprehensive accurate and timely account of police violence provides readers with a complete understanding of the concept and all that it entails covering its history to future directions and ten different areas of police violence. Each chapter in the reader addresses police violence as it is used by and against officers and all highly competent contributing authors including both practitioners and academics have a strong background in the various areas. Chapter topics examine the research surrounding violent acts the reasons officers feel justified in using excessive force an account of situational factors affecting an officer's likelihood to use or be the victim of violence measurements of deadly force training issues the importance of officer pursuits violence and the community policing philosophy and international rates of violent police citizen encounters and the differences between countries. For use in the police academy and by the ACLU citizen action groups and civilian review boards.
