**Contemporary Techniques in Architecture** Ali Rahim, 2002-04-17 This publication addresses the most far reaching and innovative developments in digital practice to have taken place in the last five years. It demonstrates how experimental architects are being challenged at a new rigorous intellectual level and are going beyond the strictures of the conceptual into the realm of the material. As digital techniques are starting to be successfully assimilated and translated into design methodology, they are also for the first time being seen through to architectural realisation. This is illustrated here at the scale of space material programme and construction. The title includes the work of high profile philosophers, architects and engineers such as Manuel Delanda who wrote *1000 Years of Non Linear History*, Greg Lynn, Foreign Office Architects and Cecil Balmond of Ove Arup who has worked with Daniel Libeskind on his proposal for the Spiral Building, London, as well as with Philip Johnson and Studio Baad on the Chavasse Park Project featured here. *Contemporary Techniques in Architecture* takes architectural publishing's treatment of the digital to a new level, looking at its potential in a realised form as well as a creative medium. Johan Bettum, Scott Cohen, Foreign Office Architects, Kolatan MacDonald Studio, Greg Lynn, Objectile, OCEAN North, Ali Rahim, Servo.

**Contemporary Techniques in Architecture**, 2002-04-17 *Contemporary Techniques in Architecture* addresses the translation of techniques in design methodology to their architectural realisation at the scale of space material programme and construction. It challenges technique driven experimental architects at the next intellectually rigorous level, that of exploring concepts and translating them into their material counterparts. How do you think through the building of avant garde forms? The title includes the work of high profile philosophers, architects and engineers such as Manuel Delanda who wrote *1000 Years of Non Linear History*, Greg Lynn and Foreign Office Architects and Cecil Balmond of Ove Arup who worked with Daniel Libeskind on his proposal for the Spiral Building for the V & A Museum in London, as well as with Philip Johnson and Studio Baad on the Chavasse Park Project featured here. Intellectually stimulating and visually engaging, with its inclusion of spectacular writing, designs, manufactured prototypes and full scale buildings, *Contemporary Techniques in Architecture* takes architectural publishing's treatment of the digital to a new level, looking at its potential in a realised form as well as a creative medium. Johan Bettum, Scott Cohen, Foreign Office Architects, Kolatan MacDonald Studio, Greg Lynn, Objectile, OCEAN North, Ali Rahim, Servo.

**Autogenic Structures** Evan Douglas, 2013-10-31 This book offers an alternative vision for the future of architecture, a timely and invaluable contribution to the debate concerning emergent surfaces and the next generation of building membranes in this era of extreme computational control. Areas covered include the future relationship between structure and ornament, the value of mass customization for the next generation of modular building components, the role of smart materials in creating a sustainable universe. Critical essays are combined with cutting edge work to form an inspiring manual of varied digital and analog techniques. Highly illustrated with over 300 photographs, illustrations and drawings, *Autogenic Structures* is for anyone curious to learn about a visionary approach to the development

of architecture      **Impact** Ali Rahim, Hina Jamelle, 2020-12-02 This issue of AD explores the working discipline of architecture as it impacts the material culture within which it is always embedded An architecture of impact uses advanced digital techniques in such a way that its material assembly supersedes its use of the digital Until now this type of architecture has been formally and materially bound by restrictive conventional methodologies which the digital project has moved from the scale of installations to three dimensional building sized fabrications Unless architects turn to a new culture of making architecture shaped by even innovative digital technology will become irrelevant Architectural projects that are more subversive in how they are created and that lose their digital signature have greater potential to be at the forefront of the discipline's new materialisations This issue illustrates these ideas and their architectural impact Contributors Kutun Ayata Ben van Berkel Hernan Diaz Alonso David Goldblatt Thomas Heatherwick Ferda Kolatan Ascan Mergenthaler Antoine Picon Casey Rehm Patrik Schumacher and Philip F Yuan Featured architects Archi Union Contemporary Architecture Practice HDA X Heatherwick Studio Herzog de Meuron Ishida Rehm Studio Pininfarina SHoP Architects SU 11 UNStudio and Young Ayata and Zaha Hadid Architects      Pulsation in Architecture Eric Goldemberg, 2012 Pulsation in Architecture highlights the role of digital design as the catalyst for a new spatial sensibility related to rhythmic perception It proposes a novel critical reception of computational architecture based on the ability of digital design to move beyond mere instrumentality and to engage with core aspects of the discipline the generative engine of digital architecture reinvigorates a discourse of part to whole relationships through the lens of rhythmic affect There is a paradigm shift in spatial perception due to the intense use of computational techniques and the capacity to morph massive amounts of data in spatial patterns rhythm plays a pivotal role in the articulation of the topology of buildings generating the atmospheric character that induces moods and throbbing sensations in space Pulsation introduces the fundamental animate capacity of living form and reshapes our perception of architectural space across the multiple scales of a project from digital inception to fabrication An emerging thread of rhythmic sensibility loosely binds a survey of contemporary design practices including contributions by Peter Eisenman Jeff Kipnis Greg Lynn UNStudio Preston Scott Cohen Reiser Umemoto Asymptote Ali Rahim Hernan Diaz Alonso Ruy Klein Gage Clemenceau NOX Evan Douglas Studio kokkugia and MONAD Studio      Contemporary Architecture and the Digital Design Process Peter Szalapaj, 2014-04-23 Contemporary Architecture and the Digital Design Process introduces the reader to new developments in the computer modelling of design form in contemporary architectural practice through a series of detailed case studies The book illustrates how evolving design practices use and exploit the potential of new computing technologies in a wide range of areas and application A central thesis of this book is that technology follows design demand rather than design adjusting to available new technology Designers are not merely passive recipients of prescribed computing tools and techniques Instead they are increasingly able to express their intuitive design ideas through the rational medium of computing The book features several contemporary building projects each of which introduces a range of CAD and

computing issues based upon the work of creative architectural and engineering design practices These include the offices of Frank O Gehry Peter Cook and Colin Fournier Anthony Hunt Associates Peter Hubner Szyskowitz Kowalski and Faulkner Brown All these examples show what architects need to know and the skills they need to acquire to use advanced CAD technology *Beginning Design Technology* Mike Christenson, 2015-12-22 *Beginning Design Technology* introduces how design technologies work together including tools materials and software such as Adobe Photoshop Adobe Illustrator Autodesk AutoCAD and others It teaches you how to think about each design tool whether a software program or physical modelmaking so that you will select one for its strengths for a specific task and know when and how to combine it with other tools Topics include working with building information texturing digital and physical artifacts translating information from one form or file format to another constructing at full scale and making digital and physical models Chapter Summaries exercises discussion questions a glossary an appendix of common software commands and an annotated bibliography will help you find what you need quickly and put the information into practice *Zeitgeist in Babel* Ingeborg Hoesterey, 1991-01-22 Collection of essays which indicate the complex constellation of greatly differing interpretive formations concerning the term postmodernism *Brazil's Modern Architecture* Elisabetta Andreoli, Adrian Forty, 2004 Brazil's architecture is strikingly distinct from Latin America as a whole and diverse in itself Yet coverage of the architecture of twentieth century Brazil is all too often confined to the work of one man Oscar Niemeyer or the buildings of two cities Rio de Janeiro and S o Paulo In *Brazil's Modern Architecture* a new generation of Brazilian cities and historians sets the record straight providing a truly comprehensive survey and analysis of twentieth century Brazilian architecture This tome embodies a vivid re interpretation of Brazilian architecture throughout the course of the twentieth century from the first modern houses of the 1920s and Le Corbusier's seminal visits to the country through the well known heroic period of the 1940s 1950s to its post 1964 crisis and up to contemporary developments Works are examined from the inside by explaining the cultural context that is crucial to a truly nuanced understanding of Brazilian architecture With bold originality this book clarifies the often paradoxical relation between Brazil's political social and economic history and its architectural development Transcending past convention it identifies with unprecedented insight the momentous architectural breakthroughs of twentieth century Brazil with its tumultuous historical life Where previous studies saw disintegration this volume illustrates the often unrecognized threads of continuity between the most recent architectural work and that of the high Modernist era of the mid century Presented with elegant flair and argued with lively sophistication *Brazil's Modern Architecture* is accessible and thought provoking for the reader and groundbreaking for the history of architecture
