Khayum,2003-04-30 Important lessons for policy makers are provided here as contributors evaluate the effectiveness of
domestic economic policies and the recommendations of international organizations such as the World Bank regarding the
economic development of developing countries Challenges posed by debt problems corruption population dynamics poverty
and the absence of adequate human and physical capital are highlighted Contributors cast doubts on the conclusions of the
prevailing theories of economic development with patterns of economic change over the course of the 20th century Their
findings point out the issue of inadequate social capability as a critical factor in understanding the lack of economic
development in many developing countries They suggest that contemporary theorizing tends to pinpoint necessary but
insufficient conditions for the successful implementation of development strategies in these countries **Contemporary
