Contested Ground Collective Action And The Urban Neighborhood

John Emmeus Davis, John Edward Davis

Contested Ground Collective Action And The Urban Neighborhood:

Contested Ground John Emmeus Davis, John Edward Davis, 1991 Drawing critically and selectively from Marxian theories of conflict and neo Weberian theories of housing classes John Emmeus Davis argues that the political life of residential communities can be explained largely in terms of the competing interests that groups possess by virtue of different and distinctive ways of relating to their community's domestic property and buildings that are used for shelter

Contested Ground John Emmius Davis, 2018-08-06 One of the most striking characteristics of urban protest and social conflict in the United States Britain and other nations of the West over the last three decades is the frequency with which these political events have been organized not where people work but where they live The residential communities in which people have their homes raise their children and relate to each other more as neighbors than as co workers have become veritable seedbeds of collective action *Contested Ground* provides a new approach to understanding how and why such community based action occurs Drawing critically and selectively from Marxian theories of conflict and neo Weberian theories of housing classes John Emmeus Davis argues that the political life of residential communities can be explained largely in terms of the competing interests that groups possess by virtue of different and distinctive ways of relating to their community's domestic property and buildings that are used for shelter In Part I of his book he proposes domestic property interests as the cornerstone of a theoretical framework for exploring the appearance and disappearance the development and decline and the cooperation and conflict of the organized groups of the homeplace In Part II he tests the plausibility of this framework against the social and political realities of an inner city neighborhood known as the West End in Cincinnati Ohio A neighborhood shaped by successive waves of private investment and disinvestment city neglect and city planning urban renewal and gentrification the domestic property of the West End has been the contested ground from which many community organizations have grown Using archival records oral histories and organizational documents Davis unfolds the story of the rise and fall of these grassroots groups Davis's concluding chapters evaluate the theoretical and practical implications of his approach He believes that his analysis may complement neo Marxian theories of urban development and capitalist reproduction and also provide new insight into ways in which planners activists and policy makers can influence the internal politics of the urban neighborhood

Revitalizing Urban Neighborhoods William Dennis Keating, Norman Krumholz, Philip Star, 1996 Since the 1950s and the advance of urban renewal local governments and urban policy have focused heavily on the central business district However such development has all but ignored the inner city neighborhoods that continue to struggle in the shadows of high rise America This analysis of urban neighborhoods in the United States from 1960 to 1995 presents fifteen essays by scholars of urban planning and development Together they show how urban neighborhoods can and must be preserved as economic cultural and political centers

Unfair Housing Mara S. Sidney, 2003 It is difficult to ignore the fact that even as the United States becomes much more racially and ethnically diverse

our neighborhoods remain largely segregated The 1968 Fair Housing Act and 1977 Community Reinvestment Act promised to end discrimination yet for millions of Americans housing options remain far removed from the American Dream Why do most neighborhoods in American cities continue to be racially divided The problem suggests Mara Sidney lies with the policies themselves She contends that to understand why discrimination persists we need to understand the political challenges faced by advocacy groups who implement them In *Unfair Housing* she offers a new explanation for the persistent color lines in our cities by showing how weak national policy has silenced and splintered grassroots activists Sidney explains how political compromise among national lawmakers with divergent interests resulted in housing legislation that influenced how community activists defined discrimination what actions they took and which political relationships they cultivated As a result local governments became less likely to include housing discrimination on their agendas existing laws went unenforced and racial segregation continued A former undercover investigator for a fair housing advocacy group Sidney takes readers into the neighborhoods of Minneapolis and Denver to show how federal housing policy actually works She examines how these laws played out in these cities and reveals how they eroded activists capability to force more sweeping reform in housing policy Sidney also shows how activist groups can cultivate community resources to overcome these difficulties looking across levels of government to analyze how national policies interact with local politics In the first book to apply policy design theories of Anne Schneider and Helen Ingram to an empirical case Sidney illuminates overlooked impacts of fair housing and community reinvestment policies and extends their theories to the study of local politics and nonprofit organizations Sidney argues forcefully that understanding the link between national policy and local groups sheds light on our failure to reduce discrimination and segregation As battles over fair housing continue her book helps us understand the shape of the battlefield and the prospects for victory

The Community Development Reader James DeFilippis, Susan Saegert, 2013-03-05 The *Community Development Reader* is the first comprehensive reader in the past thirty years that brings together practice theory and critique concerning communities as sites of social change With chapters written by some of the leading scholars and practitioners in the field the book presents a diverse set of perspectives on community development These selections inform the reader about established and emerging community development institutions and practices as well as the main debates in the field The second edition is significantly updated and expanded to include a section on globalization as well as new chapters on the foreclosure crisis and emerging forms of community

The Urban Wisdom of Jane Jacobs Sonia Hirt, Diane Zahm, 2012-10-02 Here for the first time is a thoroughly interdisciplinary and international examination of Jane Jacobs s legacy Divided into four parts I Jacobs Urban Philosopher II Jacobs Urban Economist II Jacobs Urban Sociologist and IV Jacobs Urban Designer the book evaluates the impact of Jacobs s writings and activism on the city the professions dedicated to city building and more generally on human thought Together the editors and contributors highlight the notion that Jacobs s influence goes beyond planning to philosophy economics sociology and design

They set out to answer such questions as What explains Jacobs's lasting appeal and is it justified Where was she right and where was she wrong What were the most important themes she addressed And although Jacobs was best known for her work on cities is it correct to say that she was a much broader thinker a philosopher and that the key to her lasting legacy is precisely her exceptional breadth of thought

Introduction to Housing Katrin B. Anacker, Andrew T. Carswell, Sarah D. Kirby, Kenneth R. Tremblay, 2018-06 This foundational text for understanding housing housing design homeownership housing policy special topics in housing and housing in a global context has been comprehensively revised to reflect the changed housing situation in the United States during and after the Great Recession and its subsequent movements toward recovery The book focuses on the complexities of housing and housing related issues engendering an understanding of housing its relationship to national economic factors and housing policies It comprises individual chapters written by housing experts who have specialization within the discipline or field offering commentary on the physical social psychological economic and policy issues that affect the current housing landscape in the United States and abroad while proposing solutions to its challenges

Transforming Chinese Cities Mark Wang, Pookong Kee, Jia Gao, 2014-04-03 The urbanisation of China over the last three decades has been a hugely significant development both for China's reform process and for the world more generally This book presents recent research findings on China's continuing urban transformation Subjects covered include the decline of the rural urban divide the spatial restructuring of Chinese urban centres and urban infrastructure migrant workers new housing and new communities and green responses to urban environmental problems The book is particularly valuable in that it includes much new work by scholars based inside China

Community Building Paul W. Mattessich, Barbara R. Monsey, Corinna Roy, 1997 This practical guide shows you what really does and doesn't contribute to community building success It reveals 28 keys to help you build community more effectively and efficiently You won't find another single report that pulls out common lessons from across community building initiatives about what works You can use this report to find out what community characteristics contribute to successful community building make sure key processes such as communications and technical assistance are in place determine if community leaders or organizers have essential qualities such as a relationship of trust and flexibility and evaluate the likely success of a proposed project or get a struggling effort back on track Examples definitions and a detailed bibliography make this report even more valuable Wilder Research Center scoured the literature contacted resource centers and spoke with community development experts across the country The result is concrete understandable research based on real life experiences The 28 factors in this report are grouped by 1 characteristics of the community 2 characteristics of the community building process and 3 characteristics of community building organizers Detailed descriptions and case examples of how each factor plays out are followed by practical questions you can use to assess your work In addition to the factors you also get working definitions for community community building and many other terms a list of resources and contacts in the field an explanation of how

the research was done and a complete bibliography of all the studies used in this report Now you can save time looking for best practice information With this concise report you ve got the tools to help your community building work succeed

Environment & Planning ,2004 The Creation of a Community Land Trust Program in Oakland, California Amy Beth Cohen,2002 **Shelterforce** ,1990 **History in Urban Places** David Allan Hamer,1998 Hamer argues that four stages of history are represented by historic districts The first is the history that the district actually embodies the second is the story of what happened to the district from the time the historically significant events occurred until the present when those events are judged to be significant the third is the process leading to the district s classification as historic and the fourth is the history of the district once the designation is official **Transnational Activism and Environmental Conflicts in the United States-Mexico Border Region** Basilio Verduzco Chávez,1997 *Theories of Urban Politics* David Judge,Gerry Stoker,Harold Wolman,1995-07-11 This textbook provides a comprehensive overview of the main theories which structure debate about urban politics It looks at aspects of power taking in both traditional and more recent theories It considers the nature of public bureaucracy and the importance of those officials with a leadership role in city government It examines the way that citizens are involved in the processes of urban politics and it puts urban politics in context in terms of the social and economic environment and the complex architecture of government in which it has to operate Adapt du r sum de l diteur

Neighborhood Health Centers Dixie Wiles Ray,1992 **Inter-group Conflict in Chicago** Jeremy Denton Browning,1994 **The Role of Organizations in Neighborhood Decline** Jacqueline Olvera,2000 **Fighting Sprawl and City Hall** Michael F. Logan,1995-09 The line is drawn in cities of the American West on one side chambers of commerce developers and civic boosters advocating economic growth on the other environmentalists and concerned citizens who want to limit what they see as urban sprawl While this conflict is usually considered to have its origins in the rise of environmental activism during the late 1960s opposition to urban growth in the Southwest began as early as the economic boom that followed World War II Evidence of this resistance abounds but it has been largely ignored by both western and urban historians **Fighting Sprawl and City Hall** now sets the record straight tracing the roots of antigrowth activism in two southwestern cities Tucson and Albuquerque where urbanization proceeded in the face of constant protest Logan tells how each of these cities witnessed multifaceted opposition to post war urbanization and a rise in political activism during the 1950s For each city he describes the efforts by civic boosters and local government to promote development showing how these booster government alliances differed in effectiveness tells how middle class Anglos first voiced opposition to annexations and zoning reforms through standard forms of political protest such as referendums and petitions then documents the shift to ethnic resistance as Hispanics opposed urban renewal plans that targeted barrios Environmentalism he reveals was a relative latecomer to the political arena and became a focal point for otherwise disparate forms of resistance Logan s study enables readers to understand not only these similarities in urban activism but also important differences for

example Tucson provides the stronger example of resistance based on valuation of the physical environment while Albuquerque better demonstrates anti annexation politics For each locale it offers a testament to grass roots activism that will be of interest to historians as well as to citizens of its subject cities *Economic Development & Law Center Report*
National Economic Development and Law Center (U.S.),1993
