Department of Law, 1906 Rediscovering the Democratic Purposes of Education Lorraine McDonnell, P. Michael Timpane, Roger W. Benjamin, 2000 Why do America's public schools seem unable to meet today's social challenges As competing interest groups vie over issues like funding and curricula we seem to have lost sight of the democratic purposes originally intended for public education Public schools were envisioned by the Founders as democratically run institutions for instilling civic values but today's education system seems more concerned with producing good employees than good citizens Meanwhile our country's

diversity has eroded consensus about citizenship and the professionalization of educators has diminished public involvement in schools This volume seeks to demonstrate that the democratic purposes of education are not outmoded ideas but can continue to be driving forces in public education Nine original articles by some of today's leading education theorists cut a broad swath across the political spectrum to examine how those democratic purposes might be redefined and revived It both establishes the intellectual foundation for revitalizing American schools and offers concrete ideas for how the educational process can be made more democratic The authors make a case for better empirical research about the politics of education in order to both reconnect schools to their communities and help educators instill citizenship An initial series of articles reexamines the original premise of American education as articulated by important thinkers like Jefferson and Dewey A second group identifies flaws in how schools are currently governed and offers models for change A final section analyzes the value conflicts posed by the twin strands of democratic socialization and governance and their implications for education policy Spanning philosophy history sociology and political science this book brings together the best current thinking about the specifics of education policy vouchers charter schools national testing and about the role of deliberation in a democracy It offers a cogent alternative to the exchange paradigm and shows how much more needs to be understood about an issue so vital to America's future

Documents of the Assembly of the State of New York New York (State). Legislature. Assembly,1906 Annual Report of the Attorney General of the State of New York New York (State). Attorney General's Office,1906 Includes a section called Opinions of the Attorney General **Madras State Administration Report** Madras (India : State),1902 **Models of Value** James Thompson,1996 In this account political economy and the novel clearly arise as solutions to a crisis in the notion of value Exploring the ways in which these different genres responded to the crisis political economy by reconceptualizing wealth as capital and the novel by refiguring intrinsic or human worth in the form of courtship narratives Thompson rereads several literary works including Defoe's *Roxana* Fielding's *Tom Jones* and Burney's *Cecilia* along with influential contemporary economic texts *Models of Value* also traces the discursive consequences of this bifurcation of value and reveals how history and theory participate in the very novelistic and economic processes they describe In doing so the book bridges the opposition between the interests of marxism and feminism and the distinctions which newly made in the eighteenth century continue to inform our discourse today Report on the Administration of the Province of Assam Assam (India),1899 **Report on the Administration of the Madras Presidency** Madras (India : Presidency),1902
