Contesting Earth's Future Michael E. Zimmerman, 2023-11-15 Radical ecology typically brings to mind media images of ecological activists standing before loggers saws staging anti nuclear marches and confronting polluters on the high seas Yet for more than twenty years the activities of organizations such as the Greens and Earth First have been influenced by a diverse less publicized group of radical ecological philosophers It is their work the philosophical underpinnings of the radical ecological movement that is the subject of *Contesting Earth's Future* The book offers a much needed balanced appraisal of radical ecology's principles goals and limitations Michael Zimmerman critically examines the movement's three major branches deep ecology social ecology and ecofeminism He also situates radical ecology within the complex cultural and political terrain of the late twentieth century showing its relation to Martin Heidegger's anti technological thought 1960s counterculturalism and contemporary theories of poststructuralism and postmodernity An early and influential ecological thinker Zimmerman is uniquely qualified to provide a broad overview of radical environmentalism and delineate its various schools of thought He clearly describes their defining arguments and internecine disputes among them the charge that deep ecology is an anti modern proto fascist ideology Reflecting both the movement's promise and its dangers this book is essential reading for all those concerned with the worldwide ecological crisis
