Contingent States Greater China And Transnational Relations:

Contingent States William A. Callahan, 2004 In the 1990s Greater China became the subject of debate as the site of either the danger of the China threat or the promise of Confucian capitalism William A Callahan argues that Greater China presents challenges not only to economic and political order but also to international relations theory In fact Greater China though absent from geopolitical maps and international law is very much present in economic and cultural exchange and exemplifies the contingent state of international politics Callahan deconstructs the mainstream geopolitical and political economic understandings of Greater China tracing its emergence through an ethnographic analysis of four political problems in East Asia the South China Sea disputes Sino Korean relations the return of Hong Kong and cross straits relations Callahan shows how bureaucrats outlaws tycoons academics workers politicians and hooligans alike produce Greater China through networks of relations in local national regional global and transnational space Finally Contingent States reveals how each of the problems provoked theoretical innovations that depart from standard conceptions of sovereignty democracy and the nation state William A Callahan is senior lecturer of international politics and deputy director of the Center for Contemporary Chinese Studies at the University of Durham England and the author of *Imagining Democracy Reading The Events of May in Thailand and Pollwatching Elections and Civil Society in Southeast Asia* *Liquid Sovereignty: Post-Colonial Statehood of China and India in the New International Order* Aleš Karmazin, 2023-12-22 This book project studies the variation of sovereignty in international order by analysing how the general model of sovereignty is localised in the political practice of two major non Western rising powers namely China and India It aims to investigate how the sovereignty of these states is constituted which includes the question of how sovereignty works and becomes constituted in specific contexts and cases that fall outside the discourses and positions of the so called Westphalian conservative absolutist sovereignty that is dominantly advocated by these two states on a global level The core of this project explores specific contested cases and situates them vis vis the broader approaches of China and India to sovereignty I specifically analyse four particular cases China s approach to sovereignty in relation to Hong Kong and Taiwan and India s approach to sovereignty in relation to Bhutan and Kashmir In doing so I will illustrate that sovereignty is a flexible and plastic phenomenon which can be intertwined with principles models or practices that are usually seen as divergent from or contradicting sovereignty for example those that derive from China s and India s imperial and colonial history *Perspectives on the South China Sea* Murray Hiebert, Phuong Nguyen, Gregory B. Poling, 2014-10-08 The South China Sea is arguably one of the world s most dangerous regions with conflicting diplomatic legal and security claims by major and mid level powers To assess these disputes CSIS brought together an international group of experts from Australia Canada China Indonesia Japan Malaysia the Philippines the United Kingdom the United States and Vietnam This volume gathers these experts analyses to provide a diverse and wide ranging set of perspectives on the region and to explore possibilities for future cooperation *Managing*

the China Challenge Quansheng Zhao,Guoli Liu,2008-09-25 This edited volume addresses one of the most significant issues in international strategic studies today how to meet the challenge of a rising China The contributors take a global view of the topic offering unique and often controversial perspectives on the nature of the China challenge The book approaches the subject from a variety of angles including realist offensive realist institutional power transition interdependence and constructivist perspectives Chapters explore such issues as the US response to the China challenge Japan s shifting strategy toward a rising China EU China relations China s strategic partnership with Russia and India and the implications of unipolarity for China the US and the world In doing so the volume offers insights into some of the key questions surrounding China s grand strategy and its potential effects on to the existing international order *Southeast Asian Studies in China* Saw Swee-Hock,2003-08-01 This book a project of the ASEAN China Study Programme of ISEAS is designed to promote a better understanding between the people of the two regions as China continues to exert a dominant political and economic presence in Southeast Asia Needless to say scholars and academics from both sides have a significant role to play in terms of creating greater awareness of each other through research workshops and conferences Whilst many universities and research institutes in the ASEAN region are conducting studies on various aspects of China it is equally important for the Chinese counterparts to be fully engaged in Southeast Asian Studies in order to deepen their knowledge of the region for mutual benefit The book traces the development of Southeast Asian Studies in China discusses the current status of these studies examines the problems encountered in the pursuit of these studies and attempts to evaluate their prospects in the years ahead **Constructing China** Mobo Gao,2018-07-20 From fear and anxiety to celebration China s rise has provoked a variety of responses across the world In light of this phenomenon how are our understandings of China produced From West to East Mobo Gao interrogates knowledge production rejecting the supposed objectivity of empirical statistics and challenging the assumption of a dichotomy between the Western liberal democracy and Chinese authoritarianism By examining issues such as the Chinese Neo Enlightenment and neoliberalism national interest vested in Western scholarship representations of the Great Leap Forward and the Cultural Revolution and the South China Sea the book asks how is contemporary China constructed By dissecting the political agenda and conceptual framework of commentators on China Gao provocatively urges those not only on the Right but also on the Left to be self critical of their views on Chinese politics economics and history *China Watching* Robert Ash,David Shambaugh,Seiichiro Takagi,2007-01-24 An international team of contributors analyzes the state of European Japanese and American scholarship on China over the last decade exploring in depth the main subjects and trends in research being done on contemporary Chinese politics economy foreign affairs and security studies *One China, Many Taiwans* Ian Rowen,2023-01-15 One China Many Taiwans shows how tourism performs and transforms territory In 2008 as the People s Republic of China pointed over a thousand missiles across the Taiwan Strait it sent millions of tourists in the same direction with the encouragement of Taiwan s politicians and businesspeople Contrary

to the PRC's efforts to use tourism to incorporate Taiwan into an imaginary One China tourism aggravated tensions between the two polities polarized Taiwanese society and pushed Taiwanese popular sentiment farther toward support for national self-determination. Consequently, Taiwan was performed as a part of China for Chinese group tourists versus experienced as a place of everyday life. Taiwan's national identity grew increasingly plural such that not just one or two but many Taiwans coexisted even as it faced an existential military threat. Ian Rowen's treatment of tourism as a political technology provides a new theoretical lens for social scientists to examine the impacts of tourism in the region and worldwide. **The**

International Politics of EU-China Relations David Kerr, Dr. Liu Fei, 2007-12-13 The EU-China relationship is fast developing in its own context and in the wider context of international politics. In these essays, major scholars from Europe and China debate the nature, problems, and potential of the emerging strategic relationship between these two international actors. **Abstracts of Public Administration, Development, and Environment**, 2005 Twentieth Century

International Relations: Beyond the twentieth century Michael Cox, 2006 "Time is Moving Forward, But We are Moving Faster" Seth M. Harter, 2006 The body of the dissertation examines the evolution of this rivalry through a series of problems the two regions faced as they tried to develop isomorphism: the alignment of the populations resident in citizens of and loyal to a state. Using case studies of migration, border control, resettlement, and remittances, the dissertation charts the influence that each region had on its neighbor. *Critical International Relations Theory After 25 Years* Nicholas John Rengger, Ben Thirkell-White, 2007-09-03 This 2007 book brings together a team of world-class critical theory scholars. **Review of**

International Studies, 2005 **When China Rules the World** Martin Jacques, 2009 For over two hundred years we have lived in a western-made world, one where the very notion of being modern was synonymous with being western. This original and ground-breaking new book argues that the twenty-first century will be different. With the rise of increasingly powerful non-Western countries, the west will no longer be dominant, and there will be many ways of being modern. In this new era of contested modernity, the central player will be China. Far from becoming a western-style society, China will remain highly distinctive. Continental in size and mentality and accounting for one-fifth of humanity, China is a civilization-state whose characteristics, attitudes, and values long predate its existence as a nation-state. China is already having a far-reaching and much-discussed economic impact, but its influence will be far greater than this. China's rise signals the end of the global dominance of the western nation-state and the rise of a world which it will shape in a host of different ways. As it rapidly reassumes its traditional position at the centre of East Asia, the old tributary system will be resurfaced in a modern form. Contemporary ideas of racial hierarchy will be redrawn, and China's age-old sense of superiority will reassert itself. China's rise will change the world as we know it from one made in the west to one increasingly shaped by China. This profound and far-sighted book explains for the first time the deeper meaning of China's arrival as a global power. **U.C. Davis Law**
