## Contours For Ritual:

**Contours for Ritual** Martha McFerren, 1988      Guide to the Study of Ancient Magic David Frankfurter, 2019-03-19 In the midst of academic debates about the utility of the term magic and the cultural meaning of ancient words like *mageia* or *khesheph* this *Guide to the Study of Ancient Magic* seeks to advance the discussion by separating out three topics essential to the very idea of magic The three major sections of this volume address 1 indigenous terminologies for ambiguous or illicit ritual in antiquity 2 the ancient texts manuals and artifacts commonly designated magical or used to represent ancient magic and 3 a series of contexts from the written word to materiality itself to which the term magic might usefully pertain The individual essays in this volume cover most of Mediterranean and Near Eastern antiquity with essays by both established and emergent scholars of ancient religions In a burgeoning field of magic studies trying both to preserve and to justify critically the category itself this volume brings new clarity and provocative insights This will be an indispensable resource to all interested in magic in the Bible and the Ancient Near East ancient Greece and Rome Early Christianity and Judaism Egypt through the Christian period and also comparative and critical theory Contributors are Magali Bailliot Gideon Bohak Veronique Dasen Albert de Jong Jacco Dieleman Esther Eidinow David Frankfurter Fritz Graf Yuval Harari Naomi Janowitz Sarah Iles Johnston Roy D Kotansky Arpad M Nagy Daniel Schwemer Joseph E Sanzo Jacques van der Vliet Andrew Wilburn

**Ritual, Play, and Belief in Evolution and Early Human Societies** Colin Renfrew, Iain Morley, Michael Boyd, 2018 This book presents unique new insights into the development of human ritual and society through our heritage of play and performance

**Ultimate Ambiguities** Peter Berger, Justin Kroesen, 2015-11-01 Periods of transition are often symbolically associated with death making the latter the paradigm of liminality Yet many volumes on death in the social sciences and humanities do not specifically address liminality This book investigates these ultimate ambiguities assuming they can pose a threat to social relationships because of the disintegrating forces of death but they are also crucial periods of creativity change and emergent aspects of social and religious life Contributors explore death and liminality from an interdisciplinary perspective and present a global range of historical and contemporary case studies outlining emotional cognitive artistic social and political implications      *Ingmar Bergman and the Rituals of Art* Paisley Livingston, 1982      **Ritual Opera,**

**Operatic Ritual** David Johnson, 1989      *Kings and Clans* David S. Newbury, 1991 *Kings and Clans* questions the assumption that clans as traditionally defined by anthropologists and historians are static structures that hamper political centralization By reconstructing the history of kings and clans in the Kivu Rift Valley on the border of today's Rwanda and Zaire at a time of critical social change David Newbury enlarges our understanding of social process and the growth of state power in Africa In the early nineteenth century many factors contributed to the creation of new social relations in the Lake Kivu region ecological change population movement the expansion of the Rwandan state from the east the rise of new political units to the west and the movement of many population groups and their ritual forms through the area Newbury looks in particular at

the role of clans in the establishment of a new kingdom on Ijwi Island in Lake Kivu Drawing on detailed ethnographic observations of the social and ritual organizations of Ijwi society an extensive body of oral data and evidence from written sources Newbury shows that the clans of Ijwi were not static formations nor did the establishment of a royal family on the island emerge from military conquest and internal social breakdown Instead clan identities changed over time and these changes actually facilitated the creation of kingship on Ijwi Through a detailed examination of succession struggles of local factors influencing the outcome of such struggles and of specific clan participation in public rituals that legitimize royalty Newbury s study illustrates the importance of clan identities in both the creation of state power and its reproduction over time Back cover
