## **Control And Freedom Power And Paranoia In The Age Of Fiber Optics:**

*Control and Freedom* Wendy Hui Kyong Chun, 2008-09-26 A work that bridges media archaeology and visual culture studies argues that the Internet has emerged as a mass medium by linking control with freedom and democracy How has the Internet a medium that thrives on control been accepted as a medium of freedom Why is freedom increasingly indistinguishable from paranoid control In *Control and Freedom* Wendy Hui Kyong Chun explores the current political and technological coupling of freedom with control by tracing the emergence of the Internet as a mass medium The parallel and paranoid myths of the Internet as total freedom total control she says stem from our reduction of political problems into technological ones Drawing on the theories of Gilles Deleuze and Michel Foucault and analyzing such phenomena as Webcams and face recognition technology Chun argues that the relationship between control and freedom in networked contact is experienced and negotiated through sexuality and race She traces the desire for cyberspace to cyberpunk fiction and maps the transformation of public private into open closed Analyzing pornocracy she contends that it was through cyberporn and the government's attempts to regulate it that the Internet became a marketplace of ideas and commodities Chun describes the way Internet promoters conflated technological empowerment with racial empowerment and through close examinations of William Gibson's *Neuromancer* and Mamoru Oshii's *Ghost in the Shell* she analyzes the management of interactivity in narratives of cyberspace The Internet's potential for democracy stems not from illusory promises of individual empowerment Chun argues but rather from the ways in which it exposes us to others and to other machines in ways we cannot control Using fiber optic networks light coursing through glass tubes as metaphor and reality *Control and Freedom* engages the rich philosophical tradition of light as a figure for knowledge clarification surveillance and discipline in order to argue that fiber optic networks physically instantiate and thus shatter enlightenment

CONTROL AND FREEDOM: POWER AND PARANOIA IN THE AGE OF FIBER OPTICS. Wendy Hui Kyong Chun, **New Media, Old Media** Wendy Hui Kyong Chun, Thomas Keenan, 2006 In this history of new media technologies leading media and cultural theorists examine new media against the background of traditional media such as film photography and print in order to evaluate the multiple claims made about the benefits and freedom of digital media

The Metabolist Imagination William O. Gardner, 2020-04-14 Japan's postwar urban imagination through the Metabolism architecture movement and visionary science fiction authors The devastation of the Second World War gave rise to imaginations both utopian and apocalyptic In Japan a fascinating confluence of architects and science fiction writers took advantage of this space to begin remaking urban design In *The Metabolist Imagination* William O. Gardner explores the unique Metabolism movement which allied with science fiction authors to foresee the global cities that would emerge in the postwar era This first comparative study of postwar Japanese architecture and science fiction builds on the resurgence of interest in Metabolist architecture while establishing new directions for exploration Gardner focuses on how these innovators created unique versions of shared concepts including

futurity megastructures capsules and cybercities making lasting contributions that resonate with contemporary conversations around cyberpunk climate change anime and more The Metabolist Imagination features original documentation of collaborations between giants of postwar Japanese art and architecture such as the landmark 1970 Osaka Expo It also provides the most sustained English language discussion to date of the work of Komatsu Saky considered one of the big three authors of postwar Japanese science fiction These studies are underscored by Gardner s insightful approach treating architecture as a form of speculative fiction while positioning science fiction as an intervention into urban design making it a necessary read for today s visionaries

**Control and Freedom** Wendy Hui Kyong Chun,2006 Wendy Hui Kyong Chun explores the current political technological coupling of freedom with control by tracing the emergence of the Internet as a mass medium She argues that the parallel myths of the Internet as total freedom total control stem from our reduction of political problems into technological ones Edited Clean Version

Raiford Guins,2008-12-31 According to Guins these new control technologies are designed to embody an ethos of neoliberal governance through the very media that have been previously presumed to warrant management legislation and policing Repositioned within a discourse of empowerment security and choice the action of regulation he reveals has been relocated into the hands of users

**Capital and Ressentiment** Joseph Vogl,2022-10-27 The proliferation of social media has provided ideal conditions in which feelings of anger and frustration can be expressed and shared forming a deep pool of resentment that is being drawn upon and exploited by populist and authoritarian leaders In his new book Joseph Vogl shows how this dynamic is rooted in the fusing of finance capital and information in a new form of information capitalism that is reshaping the affective economy of our societies The capital accumulation strategies of powerful new platforms and social media are pushing people into fragmented opposing and conflictual communities where resentment is nurtured and grows The feelings of grievance and rejection generated by capitalism are redirected into attacks on migrants foreigners and others thereby deflecting their critical potential and bolstering the system that is their source It is the cunning of resentment that provides the key to understanding why despite the profusion of communication

in our social media age global finance and information capital can be neither understood nor attacked as a totalizing power This brilliant analysis of the ways in which information capitalism is transforming the affective economy of our societies will be of great interest to anyone concerned with the forces that are shaping our societies today *Science-fiction Studies*

,2007 **The Oxford Handbook of Film and Media Studies** Robert Kolker,2008-09-11 This handbook examines film and new media in the light of their convergence It draws on leading scholars in the field to discuss traditional areas of history and theory of film and digital media Its focus however is on the cycle of technologically driven arts Film was born of a number of experiments in reproducing motion all of which culminated in the nineteenth century projection of short films The creation of digital media resulted from experiments in alternative forms of representation in the early 1960s John Whitney began creating avant garde films from digital graphics around 1960 and some of his ideas and methods were incorporated by Stanley Kubrick in 2001 A Space Odyssey By the early 1990s commercial filmmakers began to employ digital effects in their work By the late nineties digital arts had come fully into their own both in the form of stand alone or interactive artworks and films created with and for the computer At the same time digital effects had completely overtaken optical printing and matte painting in film From special effects to creating realistic backgrounds and crowds the digital is infiltrating all aspects of filmmaking The infiltration is about to become a takeover as celluloid is replaced by high definition digital recording and projection processes Many aspects of film will change as this latest convergence takes place Already cultural response to film has changed as viewers begin to teach themselves about film through supplementary material on DVDs and to make their own films on home computers But this handbook is not a technical history or manual Quite the contrary it is a scholarly work discussing the aesthetics economics and cultural results of these changes and convergences The book balances traditional scholarship and analysis with essays addressing technological change and the concurrent changes in cultural responses to these changes responses already acknowledged by the profession *Dark side of the machine* Karen Chase Walker,2010
