progressive fatal disease characterized by poor on the job performance **Interpreting Education** Abraham Edel,1989

literature on power must extend beyond the confines of organization and management theory The argument underlying the volume is that broad exploration is essential because management studies of power have been for the most part severely constrained tending to view power from a functionalist perspective In so doing issues of how power becomes embedded in existing organizational structures cultures practices rules and regulations have been ignored **Management and the Enterprise in the People's Republic of China** Dexter Colboyd Dunphy,1986 **Handbook of Research on Educational Administration** Norman J.
