This book gathers selected research papers presented at the Third International Conference on Communication and Intelligent Systems ICCIS 2021 organized by National Institute of Technology Delhi India during December 18-19, 2021. This book presents a collection of state-of-the-art research work involving cutting-edge technologies for communication and intelligent systems. Over the past few years, advances in artificial intelligence and machine learning have sparked new research efforts around the globe which explore novel ways of developing intelligent systems and smart communication technologies. The book presents single and multi-disciplinary research on these themes in order to make the latest results available in a single, readily accessible source.

Unlocking the Power of AI Myra Roldan, 2024-01-01 Artificial intelligence adoption is accelerating across industries but many learning teams may not be moving the needle fast enough. Now is the prime opportunity for learning teams to prioritize its usage. However, although some L&D professionals have experimented with generative AI tools, few know what the game-changing technology really is. In this issue of TD at Work, Myra Roldan shares a simplified explanation of how AI works. The difference between traditional AI and generative AI. Sample use cases for L&D professionals to think about. A brief overview of how to get started using AI. Some notes on privacy and ethics. The Tools Resources in this issue are an Artificial Intelligence Tool Evaluation Worksheet and an Artificial Intelligence Project Planning Checklist.
