Surveillance Education Nolan Higdon, Allison Butler, 2024-08-02 Surveillance Education explores the pervasive use of digital surveillance technologies in schools and assesses its pernicious effects on students Recognizing that the use of digital technologies will persist the authors instead offer practical ways to ameliorate their impact In our era of surveillance capitalism digital media technologies are ever more intertwined into the educational process Schools are presented with digital technologies as tools of convenience for gathering and grading student work as tools of support to foster a more equitable learning environment and as tools of safety for predicting or preventing violence or monitoring mental emotional and physical health Despite a dearth of evidence to confirm their effectiveness digital data collection and tracking is often presented as a way to improve educational outcomes and safety This book challenges these fallacious assumptions and argues that the use of digital media technologies has caused great harm to students by subjecting them to oppressive levels of surveillance impinging upon their right to privacy and harvesting their personal data on behalf of Big Tech In doing so the authors draw upon interviews from K 12 and higher education students teachers and staff civil rights and technology lawyers and educational technological programmers The authors also provide practical guidance for teachers administrators students and their families seeking to identify and combat surveillance in education This urgent eye opening book will be of interest to students and educators with interests in critical media literacy and pedagogy and the sociology of technology and education

Working for a Future Lisette Nieves, Noel S. Anderson, Becca Huntting, 2024-06-10 This book builds on the success of Working to Learn Palgrave Macmillan 2020 by focusing on the future of work and how young people especially low income young people and young people of color are pursuing college and career goals through work based learning experiences yet encountering an increasingly racially and socioeconomically stratified labor market and educational system Through policy analysis and case studies both from US and abroad the authors will present the argument for why these models warrant revisitation innovation and investment and elevate profiles of young workers nonprofits corporate partners and governments today who are using
