How AI Thinks Nigel Toon, 2024-02-08 THE 2 TIMES BESTSELLER Artificial intelligence is going to have a massive impact on everyone's lives an accessible and sensible read that helps demystify AI Deborah Meaden entrepreneur and star of *Dragon's Den* Nigel Toon is a visionary leader in the field of artificial intelligence a must read Marc Tremblay Distinguished Engineer Microsoft Those who understand how AI thinks are about to win big We are used to thinking of computers as being a step up from calculators very good at storing information and maybe even at playing a logical game like chess But up to now they haven't been able to think in ways that are intuitive or respond to questions as a human might All that has changed dramatically in the past few years Our search engines are

becoming answer engines Artificial intelligence is already revolutionising sectors from education to healthcare to the creative arts But how does an AI understand sentiment or context How does it play and win games that have an almost infinite number of moves And how can we work with AI to produce insights and innovations that are beyond human capacity from writing code in an instant to unfolding the elaborate 3D puzzles of proteins We stand at the brink of a historic change that will disrupt society and at the same time create enormous opportunities for those who understand how AI thinks Nigel Toon shows how we train AI to train itself so that it can paint images that have never existed before or converse in any language In doing so he reveals the strange and fascinating ways that humans think too as we learn how to live in a world shared by machine intelligences of our own creation

Moral Codes Alan F. Blackwell, 2024-08-06 Why the world needs less AI and better programming languages Decades ago we believed that robots and computers would take over all the boring jobs and drudgery leaving humans to a life of leisure This hasn't happened Instead humans are still doing boring jobs and even worse AI researchers have built technology that is creative self aware and emotional doing the tasks humans were supposed to enjoy How did we get here In *Moral Codes* Alan Blackwell argues that there is a fundamental flaw in the research agenda of AI What humanity needs Blackwell argues is better ways to tell computers what we want them to do with new and better programming languages More Open Representations Access to Learning and Control Over Digital Expression in other words MORAL CODE Blackwell draws on his deep experiences as a programming language designer which he has been doing since 1983 to unpack fundamental principles of interaction design and explain their technical relationship to ideas of creativity and fairness Taking aim at software that constrains our conversations with strict word counts or infantilizes human interaction with likes and emojis Blackwell shows how to design software that is better not more efficient or more profitable but better for society and better for all people Covering recent research and the latest smart tools Blackwell offers rich design principles for a better kind of software and a better kind of world
