*Charting the AI Transition in Education and Business Environments* James Hutson, TJ Rains, 2024-11-18. This book delineates a comprehensive framework designed to ultimately assist organizations as they navigate the critical juncture often termed the inflection point in adopting generative Artificial Intelligence (AI). Addressing the exigent shift in organizational strategy mandated by Industry 4.0 and urging a transition from mere digital transformation to what is being progressively understood as generative transformation, it fills a conspicuous lacuna in both academic and practical discourses by presenting a timely synthesis of research, empirical studies, and case analyses. The authors utilize an interdisciplinary methodology bridging the epistemological divide between the technological intricacies of generative AI and its effective implementation within institutional frameworks. Reorienting the focus of organizational leaders from a simplistic replacement paradigm to one of technological human augmentation, it works toward a prescriptive blueprint for enabling organizations to

adopt generative AI without compromising their most valuable asset human intellectual and emotional capital Fostering interdisciplinary dialog among academics industry professionals and policymakers it fills a critical gap in current discourses and serves as a catalyst for future research and collaboration *The Role of Sustainability and Artificial Intelligence in Education Improvement* Joanna Rosak-Szyrocka,Justyna Żywiołek,Anand Nayyar,Mohd Naved,2023-11-21 This book is devoted to the issues faced by universities in the field of distance learning during and after COVID as well as in digitalization times The book devotes a lot of space to the issues of Web 3 0 in university e learning Industry 4 0 artificial intelligence and digital equity The aim and scope of this book is to draw a holistic picture of education before and after COVID the psychological effects of COVID in education and using modern technologies application in education taking into consideration aspects of sustainability development Industry 4 0 and Society 5 0 The authors also raise the issue of artificial intelligence investigation in learner instructor interaction Features To elaborate the functions of online education and numerous pedagogical strategies based on electronic learning to aid teachers and students with the tools required to succeed in the 21st century via engaging virtual experiences To analyze tools provided by Ed Tech firms and the effect of digital tools on maintaining the educational process in times of crisis and after pandemic To create a roadmap for higher education institutions and provide tips regarding how to improve the effectiveness of the hybrid learning system To understand e learning characteristic in the era of Industry 4 0 and Society 5 0 and characteristics of the different web generations To use AI applications to improve connections and relationships between students and teachers and in education in the future The book is both scientific and educational It can be used at the university level and by anyone interested in the topics it covers
