Technology Enhanced Medical and Health Education Joshua Owolabi, 2025-11-18 Technology has immense potential to advance medical and health education and medical practice and to greatly improve the experiences of learners and service receivers. However, many medical and health educators currently do not have the requisite skills, exposure, and capacity to use the advanced and relatively sophisticated technologies currently available to add value to student and trainee experiences. This book addresses this current skills gap, providing a comprehensive yet readable introduction to and summary of this rapidly developing field, helping medical and health educators to make the most of the technology available to enhance and improve the student learning experience while adhering to principles that are in alignment with accepted medical education practices where standardization remains a key consideration. Key Features: Fills gaps in previous training to equip medical and health educators with requisite knowledge, skills, and attitude to embrace technological advancements. Considers tech integration into each major division of health and medical education. Provides strategies for leading innovation in health and medical education. Addresses educational management and leadership aspects with an emphasis on standardization and optimization in educational technologies. This new book provides a much-needed standard text on the effective use of technology for all educators involved in teaching medical students and other health professions globally.

*Artificial Intelligence and Education - Shaping the Future of Learning*, 2024-10-02 The book discusses the impact of artificial intelligence (AI) on education, exploring both the opportunities and challenges it brings. It aims to provide a comprehensive understanding of how AI is reshaping the educational environment, from personalized learning experiences and intelligent tutoring systems to administrative efficiencies and ethical considerations. The book also addresses the implications of AI on traditional educational models and the broader societal

context sparking a dialogue about AI's potential for enhancing learning outcomes and preparing students for an AI-driven world. Overall, it aims to inspire innovation and critical thinking in the field of education.

**Digital Ecosystems: Interconnecting Advanced Networks with AI Applications** Andriy Luntovskyy, Mikhailo Klymash, Igor Melnyk, Mykola Beshley, Alexander Schill, 2024-07-29. This book covers several cutting-edge topics and provides a direct follow-up to former publications such as *Intent-based Networking* and *Emerging Networking*, bringing together the latest network technologies and advanced AI applications. Typical subjects include 5G/6G clouds, fog, leading-edge LLMs, large-scale distributed environments with specific QoS requirements for IoT, robots, machine and deep learning chatbots, and further AI solutions. The highly promising combination of smart applications, network infrastructure, and AI represents a unique mix of real synergy. Special aspects of current importance such as energy efficiency, reliability, sustainability, security, and privacy, telemedicine, e-learning, and image recognition are addressed too. The book is suitable for students, professors, and advanced lecturers for networking, system architecture, and applied AI. Moreover, it serves as a basis for research and inspiration for interested professionals looking for new challenges.
