Contemporary Structure in Architecture Leonard Michaels, 1950 *Contemporary Structure in Architecture (Classic Reprint)* Leonard Michaels, 2017-11-24 Excerpt from Contemporary Structure in Architecture In this book I have endeavoured to bridge the gap between the way of thinking of architect and engineer a gap which must be bridged if architecture is to take full advantage of the revolutionary development of contemporary structure and not regard it merely as a means of taking greater liberties with the forms arising out of structural principles no longer employed I need not elaborate further upon the nature of the book since this is made clear in the Foreword and Postscript to the authors of which I am greatly indebted for their contributions I have found it convenient to first the complete range of contemporary structure in order to place in true perspective the architectural potentialities of structural materials and 2 structural vocabulary which confronts the architect to day The subsequent analysis of the effects and influence of contemporary structure on the trends of architectural design can then be followed with this structural vocabulary as a back ground drawing upon it as necessary for the illustration of developments and potentialities I should like here to meet one possible criticism This book is concerned with structural potentialities in relation to architectural design with what has been done and what can be done within the limits of reasonable economy An architect does not often seek the cheapest method of construction without having regard to other factors such as appearance maintenance durability etc and cost has therefore not been a criterion in selecting the structures illustrated for if it had been the scope of the book might have been much more limited I have also avoided as far as possible the question of relative cost since this is bound to vary not only from one country to another and from one locality to another but also from one decade to another or even from year to year On the other hand I have endeavoured to indicate methods of economising in material which if not always leading to an overall saving in cost at the present time seem to provide a sound basis for seeking economy About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works *Power in Buildings* Hugh Ferriss, 2011-10-01 A welcome republication of a scarce title from America s greatest architectural draftsman First published in 1953 and long out of print the sixty bold drawings and informed text trace Ferriss s personal odyssey through the modern architecture of America from 1929 to 1953 Dams bridge anchorages grain elevators skyscraper projects and viaducts are delineated in Ferriss s rich and somewhat brooding chiaroscuro style while he surprises us with illustrations of such landmarks as the Johnson Wax building Taliesin West Lever House and the then unbuilt United Nations Headquarters Contemporary

Contemporary Architecture in China Architectural Creation Magazine,2011-03-10 Contemporary Architecture in China features new architecture by focusing on 30 structures built since 1999 These buildings located in ten different cities over a vast geographical area cover a wide variety of types from residential to commercial to public use China s architecture can be seen as a mirror of the country s development as a whole During China s reform and opening up in the past 30 years the country and its architecture have undergone great changes developing at an overwhelming speed In the past ten years in particular as China has strengthened its global ties it has also experienced increasingly close cooperation between Chinese and foreign architects This

communication and exchange of ideas has resulted in an impressive number of internationally recognized design projects. While introducing details of construction including date, location, use, and technical information, the book also focuses on the aesthetic contribution these innovative buildings have made to China's urban landscape. The book's abundant images further enhance the reader's understanding of architectural styles and design features. Developments in construction and engineering, as well as trends in architectural design, can also be traced, giving readers a better understanding of today's China and its dynamic architecture.

Crucial Words Gert Wingårdh, Rasmus Wærn, 2012-11-05. The conditions in which present-day architecture is produced are partly local and singular and partly global and universal. Understanding contemporary architecture means understanding all of these aspects. What are the pivotal themes? Gert Wingårdh and Rasmus Wærn, Sweden's most active architect and its best-known architecture critic, asked themselves this question and made a selection of approximately fifty terms and concepts including Branding Collaborators, Corporate Desire, Future, Everyday, Ornament, and Wheelchair. The result is a very special dictionary with humorous illustrations and original articles by interesting protagonists such as Denise Scott Brown, Kenneth Frampton, Massimiliano Fuksas, Hans Ibelings, Peter Blundell Jones, Vittorio Magnago Lampugnani, Hans Ulrich Obrist, Juhani Pallasmaa, Joseph Rykwert, Jaime Salazar, Axel Sowa, and Wilfried Wang. A special highlight is the text by Nobel laureate Orhan Pamuk: *Die Voraussetzungen unter welchen heutige Architektur entsteht*, sind teils lokal und einmalig bedingt, teils sind sie von globaler und allgemeingültiger Natur. Zeitgenössische Architektur verstehen heisst all diese Aspekte verstehen. Welches sind dabei die entscheidenden Themen? Gert Wingårdh und Rasmus Wærn, Schwedens aktivster Architekt beziehungsweise bekanntester Architekturkritiker, haben sich diese Frage gestellt und eine kritische Auswahl von rund 50 Begriffen getroffen: etwa Branding Collaborators, Corporate Desire, Future, Everyday, Ornament, Wheelchair. Dadurch ist ein ganz spezielles, witzig illustriertes Begriffswörterbuch entstanden mit Originalbeiträgen von so interessanten Protagonisten wie etwa Denise Scott Brown, Massimiliano Fuksas, Hans Ibelings, Peter Blundell Jones, Vittorio Magnago Lampugnani, Hans Ulrich Obrist, Juhani Pallasmaa, Joseph Rykwert, Jaime Salazar, Axel Sowa, Wilfried Wang. Ein besonderes Highlight ist der Text von Nobelpreisträger Orhan Pamuk: *New Architecture and Technology*. Gyula Sebestyén, Christopher Pollington, 2007-06-07. Many books have covered the topics of architecture, materials, and technology. *New Architecture and Technology* is the first to explore the interrelation between these three subjects. It illustrates the impact of modern technology and materials on architecture. The book explores the technical progress of building, showing how developments both past and present are influenced by design methods. It provides a survey of contemporary architecture as affected by construction technology. It also explores aspects of building technology within the context of general industrial, social, and economic developments. The reader will acquire a vocabulary covering the entire range of structure types and learn a new approach to understanding the development of design.

Structure as Architecture Andrew Charleson, 2014-09-01. *Structure as Architecture* presents a comprehensive analysis of the indispensable role of
