## **Contingencies Of Value Alternative Perspectives For Critical Theory:**

*Contingencies of Value* Barbara Herrnstein Smith, 1988 Charges of abandoned standards issue from government offices laments for the loss of the best that has been thought and said resound through university corridors While revisionists are perplexed by questions of value critical theory haunted by the heresy of relativism remains captive to classical formulas Barbara Herrnstein Smith's book confronts the conceptual problems and sociopolitical conflicts at the heart of these issues and raises their discussion to a new level of sophistication Polemical without being rancorous *Contingencies of Value* mounts a powerful critique of traditional conceptions of value taste judgment and justification Through incisive discussions of works by among others David Hume Immanuel Kant Northrop Frye Georges Bataille Jacques Derrida Richard Rorty and Jürgen Habermas Smith develops an illuminating alternative framework for the explanation of these topics All value she argues is radically contingent Neither an objective property of things nor merely a subjective response to them it is the variable effect of numerous interacting economies that is systems of apportionment and circulation of goods Aesthetic value moral value and the truth value of judgments are no exceptions though traditional critical theory ethics and philosophy of language have always tried to prove otherwise Smith deals in an original way with a wide variety of contemporary issues from the relation between popular and high culture to the conflicting conception of human motives and actions in economic theory and classical humanism In an important final chapter she addresses directly the crucial problem of relativism and explains why a denial of the objectivity of value does not as commonly feared and charged produce either a fatuous egalitarianism or moral and political paralysis

*Contingencies of Value* Barbara Herrnstein Smith, 1998      **Critical Theory And The Literary Canon**

E. Dean Kolbas, 2018-03-09 Kolbas stakes out new territory in assessing the war over literary canon formation a subject that contemporary polemicists have devoted much ink to Throughout this succinct manuscript Kolbas ranges through the sociology and politics of culture aesthetic theory and literary theory to develop his point that texts not only must should be situated in the historical and material conditions of their production but also evaluated for their very real aesthetic content One reason this is an important issue Kolbas contends is that the canon is not simply enclosed in the ivory tower of academia its effects are apparent in a much wider field of cultural production and use He begins by critiquing the conservative humanist and liberal pluralist positions on the canon which either assiduously avoid any sociological explanation of the canon or treat texts as stand ins for particular ideologies Kolbas is sympathetic to the arguments of Bourdieu et al regarding positioning the canon in a wider field of cultural production than the university but argues that theirs are purely sociological explanations of aesthetics i.e. there is no objective aesthetic content that ignore art's autonomous realm which he argues à la Adorno exists if only problematically Ultimately he argues that critical theory particularly the arguments of Adorno on aesthetics offers the most fruitful path for evaluating the canon despite the approach's clear flaws His vision is a sociological one but one that treats the components of the canon as possessing objective aesthetic content albeit content that

shifts in meaning over history      *Rethinking Objectivity* Allan Megill,1994 Although objectivity is a term used widely in many areas of public discourse from discussions concerning the media and politics to debates over political correctness and cultural literacy the question What is objectivity is often ignored as if the answer were obvious In this volume Allan Megill has gathered essays from fourteen leading scholars in a variety of fields history anthropology philosophy psychology history of science sociology of science feminist studies literary studies and accounting to gain critical understanding of the idea of objectivity as it functions in today s world In diverse essays the authors provide fascinating studies of objectivity in such areas as anthropological research corporate and governmental bureaucracies legal discourse photography and the study and practice of the natural sciences Taken together Megill argues this volume calls for developing a notion of objectivities The absolute sense of objectivity that is objectivity as a God s eye view must be supplemented and in part supplanted by disciplinary procedural and dialectical senses of objectivity This book will be of great interest to a broad range of scholars as it presents current thinking on a topic of fundamental concern across the disciplines in the humanities and social sciences Contributors Barry Barnes Dagmar Barnouw Lorraine Code Lorraine Daston Johannes Fabian Kenneth J Gergen Mary E Hawkesworth Barbara Herrnstein Smith Evelyn Fox Keller George Levine Allan Megill Peter Miller Andy Pickering Theodore M Porter      *Grounds of Literary Criticism* Suresh Raval,1998 This sophisticated and wide ranging look at literary criticism addresses the major theorists of today and proposes a constructive approach to challenging critical debates Disclosing conflict as the inevitable outcome of historical change Suresh Raval refuses the stark either or choice between the foundationalist stance which seeks to find the right answers and the relativist position which denies the possibility of identifying right and wrong Raval explores the question of conflict in literary criticism and theory by analyzing how different theories have treated key issues not to resolve these problems but to show why they resist decisive solution      **Normative Jurisprudence** Robin West,2011-08-22 Normative Jurisprudence aims to reinvigorate normative legal scholarship that both criticizes positive law and suggests reforms for it on the basis of stated moral values and legalistic ideals It looks sequentially and in detail at the three major traditions in jurisprudence natural law legal positivism and critical legal studies that have in the past provided philosophical foundations for just such normative scholarship Over the last fifty years or so all of these traditions although for different reasons have taken a number of different turns toward empirical analysis conceptual analysis or Foucaultian critique and away from straightforward normative criticism As a result normative legal scholarship scholarship that is aimed at criticism and reform is now lacking a foundation in jurisprudential thought The book criticizes those developments and suggests a return albeit with different and in many ways larger challenges to this traditional understanding of the purpose of legal scholarship      **The Values of Literary Studies** Rónán McDonald,2015-11-24 In The Values of Literary Studies Critical Institutions Scholarly Agendas leading scholars illuminate the purpose and priorities of literary criticism      **Minds Wide Shut** Gary Saul Morson,Morton Schapiro,2023-01-31 A timely exploration of intellectual

dogmatism in politics economics religion and literature and what can be done to fight it Polarization may be pushing democracy to the breaking point But few have explored the larger interconnected forces that have set the stage for this crisis namely a rise in styles of thought across a range of fields that literary scholar Gary Saul Morson and economist Morton Schapiro call fundamentalist In *Minds Wide Shut* Morson and Schapiro examine how rigid adherence to ideological thinking has altered politics economics religion and literature in ways that are mutually reinforcing and antithetical to the open mindedness and readiness to compromise that animate democracy In response they propose alternatives that would again make serious dialogue possible Fundamentalist thinking Morson and Schapiro argue is not limited to any one camp It flourishes across the political spectrum giving rise to dueling monologues of shouting and abuse between those who are certain that they can t be wrong that truth and justice are all on their side and that there is nothing to learn from their opponents who must be evil or deluded But things don t have to be this way Drawing on thinkers and writers from across the humanities and social sciences Morson and Schapiro show how we might begin to return to meaningful dialogue through case based reasoning objective analyses lessons drawn from literature and more The result is a powerful invitation to leave behind simplification rigidity and extremism and to move toward a future of greater open mindedness moderation and perhaps even wisdom

**Romanticism, History, Historicism** Damian Walford Davies, 2009-01-21 The re turn to history in Romantic Studies in the 1980s marked the beginning of a critical orthodoxy that continues to condition if not define our sense of the Romantic period twenty five years on Romantic New Historicism s revisionary engagements have played a central role in the realignment of the field and in the expansion of the Romantic canon In this major new collection of eleven essays critics reflect on New Historicism s inheritance its achievements and its limitations Integrating a self reflexive engagement with New Historicism s history and detailed attention to a range of Romantic lives and literary texts the collection offers a close up view of Romanticism s hybrid present and a dynamic vision of its future

**Feminism and the Politics of Literary Reputation** Charlotte Templin, 1995 Soon after its publication in 1973 *Fear of Flying* brought Erica Jong immense popular success and media fame Alternately pegged sassy and vulgar Jong s novel embraced the politics of the women s liberation movement and challenged the definition of female sexuality Yet today more than twenty years and several books later literary reputation continues for the most part to elude Jong Typecast by her adversaries as a media seeking sensationalist Erica Jong has been unfairly side stepped by academia Charlotte Templin contends In this carefully researched study augmented by personal interviews with Jong Templin assembles and analyzes the medley of responses to Jong s books by reviewers critics writers academics and the media by liberals conservatives and feminists She examines the diverse opinions on the merit and relevance to contemporary life of *Fear of Flying* the invocation of a high culture low culture dichotomy to discredit *How to Save Your Own Life* the anatomy of literary success with Fanny Jong s reception in a postfeminist age and the trivialization of Jong s works that is inevitable with mass media exposure Templin also shows how

antagonistic reviewers tend to identify Jong with her fictitious characters a practice more common when the author is a woman and judge her to be guilty of the sin of not being a proper woman In turn she shows how reviewers reveal something of their own values and ideological biases in their critiques and how literary reputations are built destroyed and altered over time The first book to make a detailed examination of the reputation of a woman writer *Feminism and the Politics of Literary Reputation* provides an excellent case study for the literary reception of women writers within a broad cultural context Templin s analysis offers valuable insight into the reception of women writers especially commercially successful women writers and dramatically illustrates the relation of literary reputation to popular appeal and cultural mores **Kritikon**
