**Issues in Continuing Professional Development** Graham Peeke, 2000. In the context of the United Kingdom's further education (FE) system, continuous professional development (CPD) can be considered to include study for further qualifications and formal and informal in college development programs. The tradition has been for teachers to determine their own development. In situations where resources to support development are scarce, however, it becomes more important to ensure that CPD responds to the needs of the organization. A systematic framework for CPD of FE teachers and managers is needed. It could consist of three stages as follows: 1. required updating in areas covered by initial qualifications where knowledge and practice moves on and required acquisition of skills and knowledge for those who have changed roles or assumed additional roles; 2. development routes for those who wish to continue developing their teaching role by specializing or becoming expert teachers and for those teachers who wish to develop as managers; and 3. required training or qualification of principals. Established qualifications such as advanced certificates, diplomas and CPD awards can play an important part in CPD. Standards can inform the development of qualifications and set expectations with regard to designing CPD activities, constructing individual development plans and assisting in informal learning.
