answer the research questions a quantitative study on people's current opinions and attitudes towards AI and how it will change as a part of the outbreak of the pandemic was conducted. Specifically the study deals with artificial intelligence in customer service, the change of AI in companies due to Covid 19 and how people generally view the topic of AI. The participants surveyed were anonymous of different age groups, occupations and origins as this topic affects everyone today and it is important to pay attention to the opinion of the general population. The targeted use of artificial intelligence in customer relationship management to make the work of companies and their employees more efficient and of higher quality also about the customer is on the rise. More and more sales are generated by this technology and more and more AI controlled tools are being developed which make customer management more successful and thus intensify the relationship between customers and companies. **Tomorrow** Gregory Georgiou, 1994. Virtual Reality, genetic engineering, high definition television. What were once science fiction are now today's reality and could well be tomorrow's greatest investment opportunities. *Investing in the Technologies of Tomorrow* spotlights the technologies which will change the way we live in the 21st century and identifies the companies which will bring these technologies to fruition. This fascinating book discusses the money making potential for each technology and provides investors with the tools to select the companies destined to become the Apple Computers and Microsofts of the 21st century. According to the U.S. government the domestic market for emerging technologies will hit 350 billion in annual sales by the end of the century while the world market will approach 1 TRILLION. Indeed emerging technologies are important because they could very well determine who wins and who loses the battle for global economic dominance in the 21st century. For investors who pick the next technological winners the rewards will be enormous. Just look at the huge stock price gains in many technology companies in recent years: Genentech up 361% in 16 months, Digital Equipment up 917% in 37 months and Wang Labs up 1543% in 34 months. Clearly high tech means high profits. But investing in the Technologies of Tomorrow is far more than an investment book. It is a compelling vision of how technology will change our lives in the 21st century. Consider some of the possibilities: floating trains that move as fast as airplanes, tiny robots that

are injected in patients to perform surgeries virtual reality machines that can simulate any human experience ranging from space travel to sex With each technology this book explains the challenges to achieve widespread commercialization Most importantly author Gregory Georgiou an award winning financial journalist pinpoints the companies investors should watch Right now there are dozens of small publicly held companies working on breakthrough technologies Although not every company will hit it big undoubtedly there will be some huge successes Somewhere out there hides the next AT T or Microsoft Technology is the greatest force for change in our lives Whether you are an investor looking for opportunities or whether you simply want to understand the mysteries of the 21st century Investing in the Technologies of Tomorrow will surpass your expectations It is superbly written glimpse into the future BOOK JACKET Title Summary field provided by Blackwell North America Inc All Rights Reserved      **Proceedings of the Technical Conference on Artificial Insemination and Reproduction** ,2006
