ARTIFICIAL INTELLIGENCE AND CONTEMPORARY MEDIA Dr. Moon Jana, Dr. Shourini Banerjee,2025-06-13 Artificial Intelligence plays a pivotal role in transitioning from generic uniform content to personalised experiences tailored for individualistic approach Utilising sophisticated algorithms AI platforms analyse user sentiments behaviours and engagement patterns to curate tailored content news feed videos articles and advertisements This book aims at understanding different viewpoints from authors on Artificial Intelligence technology and the contemporary media scenario

Artificial Intelligence Tools Book Manish Soni,2024-11-13 Welcome to the exciting and rapidly evolving world of artificial intelligence AI This book Artificial Intelligence Tools Unlocking the Power of Intelligent Systems is designed to be your comprehensive guide to understanding implementing and leveraging the cutting edge tools that drive the advancements in AI Whether you are a seasoned professional in the field or a curious newcomer this book aims to provide you with valuable insights and practical knowledge to navigate the multifaceted landscape of AI tools From machine learning algorithms to neural networks readers will gain insights into the core concepts that form the backbone of intelligent systems We aim to make complex ideas accessible ensuring that readers regardless of their technical background can grasp the essentials of AI Furthermore we recognize the ethical implications and societal considerations surrounding AI In a dedicated section we address the responsible use of AI tools discussing issues such as bias in algorithms transparency and accountability It is crucial for individuals working with AI to understand the ethical dimensions of their work and strive towards the development of AI systems that align with human values and promote inclusivity In addition to the technical aspects this book emphasizes the importance of continuous learning and adaptation in the rapidly evolving field of AI The final sections explore emerging trends such as reinforcement learning autonomous systems and AI driven creativity offering readers a glimpse into the future of artificial intelligence

Key Features

- 1 Extensive Theoretical Content The book covers the full spectrum of topics from fundamental concepts to advanced techniques Each chapter is designed to build on the previous one ensuring a logical progression and deep comprehension of the subject matter
- 2 Online Test Papers To reinforce your learning we provide a series of online test papers that mimic real world scenarios and challenges These tests are designed to evaluate your understanding and help you identify areas that need further study
- 3 Video Tutorials Understanding concepts can sometimes be challenging through text alone Our book includes links to a series of video tutorials that provide visual and auditory explanations of complex topics These videos are created by experts and are intended to complement the written material offering a more immersive learning experience
- 4 Practical Applications Each chapter includes real world examples and case studies that illustrate how application is applied across different industries
- 5 Self Assessment Tools At the end of each chapter self assessment questions and exercises allow you to test your understanding and track your progress These tools are invaluable in helping you gauge your readiness and build confidence as you move forward Whether you are an aspiring

data scientist a business professional exploring AI application or an academic researcher pushing the boundaries of knowledge Artificial Intelligence Tools is crafted to be a valuable companion on your journey As you embark on this exploration of artificial intelligence we encourage you to engage with the content experiment with the tools and contribute to the ongoing dialogue surrounding the responsible development and application of intelligent systems The future of AI is in your hands and we are excited to be part of your learning journey

Artificial Intelligence for Medicine

Shai Ben-David, Giuseppe Curigliano, David Koff, Barbara Alicja Jereczek-Fossa, Davide La Torre, Gabriella Pravettoni, 2024-03-14 Artificial Intelligence for Medicine An Applied Reference for Methods and Applications introduces readers to the methodology and AI ML algorithms as well as cutting edge applications to medicine such as cancer precision medicine critical care personalized medicine telemedicine drug discovery molecular characterization and patient mental health Research in medicine and tailored clinical treatment are being quickly transformed by artificial intelligence AI and machine learning ML The content in this book is tailored to the reader's needs in terms of both type and fundamentals It covers the current ethical issues and potential developments in this field Artificial Intelligence for Medicine is beneficial for academics professionals in the IT industry educators students and anyone else involved in the use and development of AI in the medical field Covers the basic concepts of Artificial Intelligence and Machine Learning methods and practices and advanced topics and applications to clinical and precision medicine Presents readers with an understanding of how AI is revolutionizing medicine by demonstrating the applications of computational intelligence to the field along with an awareness of how AI can improve upon traditional medical structures Provides researchers practitioners and project stakeholders with a complete guide for applying AI techniques in their projects and solutions

Lie Group Machine Learning

Fanzhang Li, Li Zhang, Zhao Zhang, 2018-11-05 This book explains deep learning concepts and derives semi supervised learning and nuclear learning frameworks based on cognition mechanism and Lie group theory Lie group machine learning is a theoretical basis for brain intelligence Neuromorphic learning NL advanced machine learning and advanced artificial intelligence The book further discusses algorithms and applications in tensor learning spectrum estimation learning Finsler geometry learning Homology boundary learning and prototype theory With abundant case studies this book can be used as a reference book for senior college students and graduate students as well as college teachers and scientific and technical personnel involved in computer science artificial intelligence machine learning automation mathematics management science cognitive science financial management and data analysis In addition this text can be used as the basis for teaching the principles of machine learning Li Fanzhang is professor at the Soochow University China He is director of network security engineering laboratory in Jiangsu Province and is also the director of the Soochow Institute of industrial large data He published more than 200 papers 7 academic monographs and 4 textbooks Zhang Li is professor at the School of Computer Science and Technology of the Soochow University She published more than 100 papers in journals and conferences and holds 23 patents Zhang Zhao is

currently an associate professor at the School of Computer Science and Technology of the Soochow University He has authored and co authored more than 60 technical papers *Caring is Sharing — Exploiting the Value in Data for Health and Innovation* Maria Häggglund,Madeleine Blusi,Stefano Bonacina,Lina Nilsson,Inge Cort Madsen,Sylvia Pelayo,Anne Moen,2023-06-15 Modern information and communication technologies make it easier for individuals to be involved in their own health and social care They also facilitate contact between individuals and service providers and deliver more efficient tools for healthcare staff Artificial Intelligence AI promises to bring even more benefits in the future with more effectiveness and the provision of decision support This book presents the proceedings of the 33rd Medical Informatics Europe Conference MIE2023 held in Gothenburg Sweden from 22 to 25 May 2023 The theme of MIE2023 was Caring is Sharing Exploiting Value in Data for Health and Innovation stressing the increasing importance of sharing digital health data and the related challenges The sharing of health data is developing rapidly both in Europe and beyond so the focus of the conference was on the enabling of trustworthy sharing of data to improve health Topics covered include healthcare community care self care public health and the innovation and development of future proof digital health solutions and the almost 300 papers divided into 10 chapters also cover important advances in the sub domains of biomedical informatics decision support systems clinical information systems clinical research informatics knowledge management and representation consumer health informatics natural language processing public health informatics privacy ethical and societal aspects among them Describing innovative approaches to the collection organization analysis and data sharing related to health and wellbeing the book contributes to the expertise required to take medical informatics to the next level and will be of interest to all those working in the field Cross-Modal Learning: Adaptivity, Prediction and Interaction Jianwei Zhang,Stefan Wermter,Fuchun Sun,Changshui Zhang,Andreas K. Engel,Brigitte Röder,Xiaolan Fu,Gui Xue,2023-02-02 The purpose of this Research Topic is to reflect and discuss links between neuroscience psychology computer science and robotics with regards to the topic of cross modal learning which has in recent years emerged as a new area of interdisciplinary research The term cross modal learning refers to the synergistic synthesis of information from multiple sensory modalities such that the learning that occurs within any individual sensory modality can be enhanced with information from one or more other modalities Cross modal learning is a crucial component of adaptive behavior in a continuously changing world and examples are ubiquitous such as learning to grasp and manipulate objects learning to walk learning to read and write learning to understand language and its referents etc In all these examples visual auditory somatosensory or other modalities have to be integrated and learning must be cross modal In fact the broad range of acquired human skills are cross modal and many of the most advanced human capabilities such as those involved in social cognition require learning from the richest combinations of cross modal information In contrast even the very best systems in Artificial Intelligence AI and robotics have taken only tiny steps in this direction Building a system that composes a global perspective from multiple distinct sources types of data and sensory

modalities is a grand challenge of AI yet it is specific enough that it can be studied quite rigorously and in such detail that the prospect for deep insights into these mechanisms is quite plausible in the near term Cross modal learning is a broad interdisciplinary topic that has not yet coalesced into a single unified field Instead there are many separate fields each tackling the concerns of cross modal learning from its own perspective with currently little overlap We anticipate an accelerating trend towards integration of these areas and we intend to contribute to that integration By focusing on cross modal learning the proposed Research Topic can bring together recent progress in artificial intelligence robotics psychology and neuroscience

The World of Galaxies Harold G. Corwin, Lucette Bottinelli, 1989 From 12 April to 14 April 1988 120 of Gerard and Antoinette de Vaucouleurs's friends and colleagues gathered at the Institut d'Astrophysique in Paris to celebrate Gerard's 70th birthday and his remarkable career in Astronomy The gathering also honored the memory of Antoinette who died 29 August 1987 after a long illness and her own no less remarkable career This volume collects the 24 invited review papers and the 60 contributed poster papers presented at the meeting Gerard de Vaucouleurs Gerard de Vaucouleurs was born on 25 April 1918 in Paris where he spent his boyhood He became an active amateur astronomer in the early 1930's making extensive observations of Mars Jupiter and variable stars including the bright supernova of 1937 in IC 4182 He also began life long interests in astronomical photography and galaxy cataloguing during this period In 1939 he met the director of the Paris transport system and an equally avid amateur astronomer Julien Peridier De Vaucouleurs worked at Peridier's private observatory at Le Houga in southwestern France on and off throughout the next decade His undergraduate work was in mathematics astronomy and experimental physics this combined with his interest in observational astronomy formed his life long empirical approach to science After spending 18 months in the French army early in 1939 41 Gerard returned to the Peridier observatory and then in 1943 to his studies at the Sorbonne where he met Antoinette
