Destroyers Hc1977:

Modern U. S. Navy Destroyers Stephen F. Tomajczyk, 2001 **United States Navy Destroyers** Michael Green, 2021-01-31 This pictorial history examines the key role played by US Navy destroyers from the turn of the twentieth century through the Cold War and beyond The first sixteen United States Navy destroyers were ordered in 1898 Prior to America s entry into the First World War another sixty three destroyers were commissioned and due to the U boat threat 267 more were authorized by Congress once hostilities were joined Between 1932 and Pearl Harbor ten new classes totaling 169 destroyers came into service During the Second World War American shipyards turned out a further 334 vessels Of the three classes the 175 Fletcher class were judged the most successful The Cold War years saw the development of seven more classes while more recent additions include eighty two of the stealth shaped Arleigh Burke class In this comprehensive account author and military expert Michael Green combines a superb collection of historical images with an authoritative text Destroyers in the United States Navy United States. Naval History Division, 1962 *US Destroyers 1942-45* Dave McComb, 2011-12-20 Few if any 20th century warships were more justly acclaimed than the destroyers of the U S Navy s Fletcher class Admired as they were for their advanced and rakish design it was their record as workhorses of the Pacific War that placed them among the most battle tested and successful fighting ships of all time This title describes the Fletchers and their Allen M Sumner and Gearing class derivatives their machinery armament and construction with a listing of all 343 ships by hull number and builder It features an operational history of the 287 ships commissioned during World War II which traces the evolution of night surface action tactics in the Solomon Islands and the parallel development of the Combat Information Center the drive across the Pacific and liberation of the Philippines with tables showing the rapid introduction of new squadrons and the radar pickets climactic stand against kamikaze aircraft at Okinawa With summaries of losses and decorations and specially commissioned artwork this is a definitive book on the wartime US destroyer classes

Sumner-Gearing-class Destroyers Robert F. Sumrall, 1995 The US Navy s Sumner Gearing class destroyers served as a standard for post WWII destroyer design and development In this outstandingly illustrated work bandw throughout with a 16 page color center spread Sumrall traces the origins and evolution of these destroyers over nearly forty years and through three wars showing the advances made in ordnance fire control and steam engineering Annotation copyright by Book News Inc Portland OR *Destroyers* Michael Green, 1998-08 Discusses the history weapons missions and possible future of U S Navy destroyers Destroyers Michael Green, Gladys Green, 2004-09 Describes the Arleigh Burke destroyer including its history equipment weapons tactics and future use with the U S Navy Includes photo diagram **DD 891** John G. Denham, 2007-05-18 DD 891 Captain John G Denham USN Retired There was no DD891 The Martin DD891 is a mythical Gearing class destroyer that represents nearly all of the long hull Sumner class destroyers completed as Gearings the last wartime designed tin cans Although 152 were originally ordered only 98 were built and most were completed after WWII The

officers and enlisted personnel assigned to the Gearing class destroyers were impressed with the living and working spaces and the arrangement of the modern equipment installed. With an allowance of a dozen officers and over 300 in the crew, operational capability and working conditions were improved as was the hotel support features for all on board. The chiefs were still forward and the snipes were aft, no change. New constructions drew the best people and therefore the original crew of the Martin DD891 consisted of experienced leaders and qualified petty officers in all key positions. As time passed, change was the only constant factor. The demands of naval operations required that the 25-hour day remain routine in destroyers. USS meant underway Saturday and Sunday. For 30 years the Martin aged and survived with competent leadership and dedicated crews. DD891 is not just about a ship but its people and the families that support those who chose the Navy and its life. The Martin was a unit in a four-ship destroyer division that was part of a squadron in a flotilla that made up the Pacific fleet destroyer force. As each crew member is a part of a team, each destroyer is part of a mission-oriented task organization and must be ready when needed and prepared to function when called. The Martin and her people successfully fulfilled many missions for 30 years. The Martin, as were her cohorts, was commissioned to keep the peace; therefore the officers and men spent the majority of their time deterring those enemies threatening that objective. From beginning to end, Ready was the Martin's motto. The main characters are real except for the names. The events and times are factual as are most of the scenarios; however, some spice, humor, and embellishment was added to preserve relevance. *Destroyers in Action* Richard A. Shafter, 1945

U.S. Destroyers Norman Friedman, 2004 For two decades Norman Friedman's account of the development of American destroyers has been a standard reference. The revised edition includes the two eventful decades of designs since the Spruance and Perry classes. The design evolution of the Arleigh Burke class, which has become the standard U.S. surface combatant, is described in detail for the first time based on official sources. Friedman also describes the attempts to develop a follow-on class beginning in the late 1980s and culminating in the current DD(X) program. Abortive attempts to develop new frigates are also detailed. Friedman provides fully detailed and illustrated descriptions of all classes of U.S. destroyers from their torpedo boat forebears onward. Detailed ship profiles by the renowned naval expert A.D. Baker III are included along with section views that show internal arrangements. Engineering plant features and complete descriptions of anti-aircraft and anti-submarine weapon systems also are given. An entire chapter is devoted to destroyer combat experience in World War II, which had a major influence on ship design and development. As the only history of U.S. destroyers based on internal, formerly classified papers of the U.S. Navy, the book is vital reading for all who have served on board these ships and for all who would like to understand the origins of the present destroyer force and its future. *Destroyers* Eric W. Osborne, 2005-06-22

On July 4, 1991, the Arleigh Burke class of destroyers, the most powerful surface combatants in naval history, was commissioned. It was the culmination of a century and a half evolution of the destroyer, an evolution captured in this vivid and timely history of the world's most popular warship. *Destroyers: An Illustrated History of Their Impact* tells the

story of one of the most recent most rapidly evolving additions to the world's navies. Coverage ranges from the 1882 launch of the first destroyer through the nonstop technical and strategic innovations of the world war eras to the current high watermarks of destroyer design such as the Arleigh Burke class named for the navy's most famous destroyer squadron combat commander. With its ship by ship analysis, this masterful volume shows how destroyers have continually met the challenge of protecting naval and land operations from ever more dangerous attacks. The book also captures the flavor of shipboard life for officers and crew and looks at the crucial role of the destroyer as a standard bearing status symbol of naval might and political intention.

Tin Can Titans John Wukovits, 2017-03-14 An epic narrative of World War II naval action that brings to life the sailors and exploits of the war's most decorated destroyer squadron. When Admiral William Halsey selected Destroyer Squadron 21, Desron 21, to lead his victorious ships into Tokyo Bay to accept the Japanese surrender, it was the most battle-hardened US naval squadron of the war. But it was not the squadron of ships that had accumulated such an inspiring resume; it was the people serving aboard them. Sailors, not metallic superstructures and hulls, had won the battles and become the stuff of legend. Men like Commander Donald MacDonald, skipper of the USS O'Bannon, who became the most decorated naval officer of the Pacific war; Lieutenant Hugh Barr Miller, who survived his ship's sinking and waged a one-man battle against the enemy while stranded on a Japanese-occupied island; and Doctor Dow Doc Ransom, the beloved physician of the USS La Vallette, who combined a mixture of humor and medical expertise to treat his patients at sea, epitomize the sacrifices made by all the men and women of World War II. Through diaries, personal interviews with survivors, and letters written to and by the crews during the war, preeminent historian of the Pacific theater John Wukovits brings to life the human story of the squadron that bested the Japanese in the Pacific and helped take the war to Tokyo.

US Navy Destroyer Escorts of World War II Mark Lardas, 2020-11-26 The Destroyer Escort was the smallest ocean-going escort built for the United States Navy, a downsized destroyer with less speed, fewer guns, and fewer torpedoes than its big brother, the fleet destroyer. Destroyer escorts first went into production because the Royal Navy needed an escort warship which was larger than a corvette but which could be built faster than a destroyer. Lacking the shipyards to build these types of ships in Britain, they ordered them in the US. Once the US unexpectedly entered World War II, its navy suddenly also needed more escort warships, even warships less capable than destroyers, and the destroyer escort was reluctantly picked to fill the gap. Despite the Navy's initial reservations, these ships did yeoman service during World War II, fighting in both the Atlantic and Pacific, taking on both U-boats and Japanese submarines, and serving as the early warning pickets against kamikazes. Later in the war, they also participated in such dramatic actions as the Battle of Samar, where a group of destroyers and destroyer escorts fought Japanese battleships and cruisers to protect the escort carriers they were shielding, and the capture of the U-505, the only major naval vessel captured at sea by the US Navy. The destroyer escorts soldiered on after World War II in both the United States Navy and a large number of navies throughout the world, with several serving into the twenty-first century. This

book tells the full story of these plucky ships from their design and development to their service around the world complete with stunning illustrations and contemporary photographs *British Destroyers: J-C and Battle Classes* Les
